

# U.S. SOLID WOOD PRODUCT TRADE CLASSIFICATIONS

## Appendix I

Please be advised that for Chapter 44 (Wood and Articles of Wood), there are 25 new export codes and 85 new import codes that became effective with the release of the January 2002 trade data.

Periodically, commodity codes are replaced, re-defined or re-categorized. These codes become obsolete and are replaced by new codes. Once a code becomes obsolete, data is no longer reported for it. Instead, it is reported in the newly defined code(s). If you use the predefined BICO or FAS commodity aggregations, these commodity changes will be automatically incorporated. If you have developed your own commodity aggregations, please update them to incorporate the new commodity codes.

The list of commodity codes that changed can be found at the following location:

<http://www.fas.usda.gov/ffpd/forestcirculars.htm/classifications.html>

Due to the U.S. wood products industry's significant expansion in the volume and variety of traded products over the last several years and the addition of dozens of new commodities to the Department of Commerce's export and import classification system in 1997, the Forest and Fishery Products Division developed new export and import groupings. A new group, called Builders' Carpentry, replaces the Fabricated Structural Members group and is expanded to include all products that fall under code 4418 in the Harmonized System, except for parquet panels, 4418300000. The creation of Builders' Carpentry will reduce the number of commodities covered under the Other Wood Products group.

The following table lists export commodity groupings commonly used by the Forest and Fishery Products Division in its circulars and in answering general inquiries for U.S. trade information. The list includes only the Harmonized System codes effective since January 1, 1989.

Please be advised that for Chapter 44 (Wood and Articles of Wood), there are 25 new export codes and 85 new import codes that will become effective with the release of the January 2002 trade data.

Periodically, commodity codes are replaced, re-defined or re-categorized. These codes become obsolete and are replaced by new codes. Once a code becomes obsolete, data is no longer reported for it. Instead, it is reported in the newly defined code(s). If you use the predefined BICO or FAS commodity aggregations, these commodity changes will be automatically incorporated. If you have developed your own commodity aggregations, please update them to incorporate the new commodity codes.

The list of commodity codes that changed can be found at the following location:

<http://www.fas.usda.gov/ffpd/forestcirculars.htm/classifications.html>

The following table lists import commodity groupings commonly used by the Forest and Fishery Products Division in its circulars and in answering general inquiries for U.S. trade information. This appendix lists all Harmonized System codes effective since 1 January 1989.
