## Integrated OCE (IOCE)

## CMS Specifications

## V9. 2 (R2) - Effective 07/01/08

This 'integrated' OCE program processes claims for outpatient institutional providers including hospitals that are subject to the Outpatient Prospective Payment System (OPPS) as well as hospitals that are NOT (Non-OPPS). The Fiscal Intermediary/Medicare Administrative Contractor (FI/MAC) will identify the claim as 'OPPS' or 'Non-OPPS' by passing a flag to the OCE in the claim record, $1=$ OPPS, $2=$ Non-OPPS; a blank, zero, or any other value is defaulted to 1 .

This version of the OCE processes claims consisting of multiple days of service. The OCE will perform three major functions:

Edit the data to identify errors and return a series of edit flags.
Assign an Ambulatory Payment Classification (APC) number for each service covered under OPPS, and return information to be used as input to an OPPS PRICER program.
Assign an Ambulatory Surgical Center (ASC) payment group for qualifying services on claims from certain NonOPPS hospitals (bill type 83x) - in the PC program/interface only [v8.2 - v8.3 only].

Each claim will be represented by a collection of data, which will consist of all necessary demographic (header) data, plus all services provided (line items). It will be the user's responsibility to organize all applicable services into a single claim record, and pass them as a unit to the OCE. The OCE only functions on a single claim and does not have any cross claim capabilities. The OCE will accept up to 450 line items per claim. The OCE software is responsible for ordering line items by date of service.

The OCE not only identifies individual errors but also indicates what actions should be taken and the reasons why these actions are necessary. In order to accommodate this functionality, the OCE is structured to return lists of edit numbers. This structure facilitates the linkage between the actions being taken, the reasons for the actions and the information on the claim (e.g., a specific diagnosis) that caused the action.

In general, the OCE performs all functions that require specific reference to HCPCS codes, HCPCS modifiers and ICD-9-CM diagnosis codes. Since these coding systems are complex and annually updated, the centralization of the direct reference to these codes and modifiers in a single program will reduce effort and reduce the chance of inconsistent processing.

The span of time that a claim represents will be controlled by the From and Through dates that will be part of the input header information. If the claim spans more than one calendar day, the OCE will subdivide the claim into separate days for the purpose of determining discounting and multiple visits on the same calendar day.

Some edits are date driven. For example, Bilateral Procedure is considered an error if a pair of procedures is coded with the same service date, but not if the service dates are different.

Information is passed to the OCE by means of a control block of pointers. Table 1 contains the structure of the OCE control block. The shaded area separates input from return information. Multiple items are assumed to be in contiguous locations.

| Pointer Name |  | UB-04 <br> Form <br> Locator | Number | Size (bytes) | Comment |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Dxptr | ICD-9-CM diagnosis codes | 70 a-c (Pt's rvdx) 67 (pdx) 67A-Q (sdx) | Up to 16 | 6 | Diagnosis codes apply to whole claim and are not specific to a line item (left justified, blank filled). First listed diagnosis is considered 'patient's reason for visit dx', second diagnosis is considered 'principal dx' |
| Ndxptr | Count of the number of diagnoses pointed to by Dxptr |  | 1 | 4 | Binary fullword count |
| Sgptr | Line item entries | 42, 44-47 | Up to 450 | Table 2 |  |
| Nsgptr | Count of the number of Line item entries pointed to by Sgptr |  | 1 | 4 | Binary fullword count |
| Flagptr | Line item action flag Flag set by FI/MAC and passed by OCE to Pricer |  | Up to 450 | 1 | (See Table 7) |
| Ageptr | Numeric age in years |  | 1 | 3 | 0-124 |
| Sexptr | Numeric sex code | 11 | 1 | 1 | 0, 1, 2 (unknown, male, female) |
| Dateptr | From and Through dates (yyyymmdd) | 6 | 2 | 8 | Used to determine multi-day claim |
| CCptr | Condition codes | 18-28 | Up to 7 | 2 | Used to identify partial hospitalization and hospice claims |
| NCCptr | Count of the number of condition codes entered |  | 1 | 4 | Binary fullword count |
| Billptr | Type of bill | $\begin{aligned} & 4 \\ & (\text { Pos 2-4) } \end{aligned}$ | 1 | 3 | Used to identify CMHC and claims pending under OPPS. It is presumed that bill type has been edited for validity by the Standard System before the claim is sent to OCE |
| NPIProvptr | National provider identifier (NPI) | 56 | 1 | 13 | Pass on to Pricer |
| OSCARPro vptr | OSCAR Medicare provider number | 57 | 1 | 6 | Pass on to Pricer |
| PstatPtr | Patient status | 17 | 1 | 2 | UB-92 values |
| OppsPtr | Opps/Non-OPPS flag |  | 1 | 1 | 1=OPPS, $2=$ Non-OPPS (A blank, zero or any other value is defaulted to 1 ) |
| OccPtr | Occurrence codes | 31-34 | Up to 10 | 2 | For FI/MAC use |
| NOccptr | Count of number of occurrence codes |  | 1 | 4 | Binary fullword count |
| Dxeditptr | Diagnosis edit return buffer |  | Up to 16 | Table 3 | Count specified in Ndxptr |
| Proceditptr | Procedure edit return buffer |  | Up to 450 | Table 3 | Count specified in Nsgptr |
| Mdeditptr | Modifier edit return buffer |  | Up to 450 | Table 3 | Count specified in Nsgptr |
| Dteditptr | Date edit return buffer |  | Up to 450 | Table 3 | Count specified in Nsgptr |
| Rceditptr | Revenue code edit return buffer |  | Up to 450 | Table 3 | Count specified in Nsgptr |
| APCptr | APC/ASC return buffer |  | Up to 450 | Table 7 | Count specified in Nsgptr |
| Claimptr | Claim return buffer |  | 1 | Table 5 |  |
| Wkptr | Work area pointer |  | 1 | 512K | Working storage allocated in user interface |
| Wklenptr | Actual length of the work area pointed to by Wkptr |  | 1 | 4 | Binary fullword |

Table 1: OCE Control block

The input for each line item contains the information described in Table 2.

| Field | UB-04 <br> Form <br> Locator | Number | Size <br> (bytes) | Comments |
| :---: | :---: | :---: | :---: | :---: |
| HCPCS procedure code | 44 | 1 | 5 | May be blank |
| HCPCS modifier | 44 | $5 \times 2$ | 10 |  |
| Service date | 45 | 1 | 8 | Required for all lines |
| Revenue code | 42 | 1 | 4 |  |
| Service units | 46 | 1 | 7 | A blank or zero value is defaulted to 1 |
| Charge | 47 | 1 | 10 | Used by PRICER to determine outlier payments |

Table 2: Line item input information

There are currently78 different edits in the OCE. The occurrence of an edit can result in one of six different dispositions.

Claim Rejection There are one or more edits present that cause the whole claim to be rejected. A claim rejection means that the provider can correct and resubmit the claim but cannot appeal the claim rejection.

Claim Denial There are one or more edits present that cause the whole claim to be denied. A claim denial means that the provider can not resubmit the claim but can appeal the claim denial.

Claim Return to There are one or more edits present that cause the whole claim to Provider (RTP) be returned to the provider. A claim returned to the provider means that the provider can resubmit the claim once the problems are corrected.

Claim There are one or more edits present that cause the whole claim to Suspension

Line Item
Rejection

Line Item
Denials be suspended. A claim suspension means that the claim is not returned to the provider, but is not processed for payment until the FI/MAC makes a determination or obtains further information.

There are one or more edits present that cause one or more individual line items to be rejected. A line item rejection means that the claim can be processed for payment with some line items rejected for payment. The line item can be corrected and resubmitted but cannot be appealed.
There are one or more edits present that cause one or more individual line items to be denied. A line item denial means that the claim can be processed for payment with some line items denied for payment. The line item cannot be resubmitted but can be appealed.

In the initial release of the OCE, many of the edits had a disposition of RTP in order to give providers time to adapt to OPPS. In subsequent releases of the OCE, the disposition of some edits may be changed to other more automatic dispositions such as a line item denial. A single claim can have one or more edits in all six dispositions. Six $0 / 1$ dispositions are contained in the claim return buffer that indicate the presence or absence of edits in each of the six dispositions. In addition, there are six lists of reasons in the claim return buffer that contain the edit numbers that are associated with each disposition. For example, if there were three edits that caused the claim to have a disposition of return to provider, the edit numbers of the three edits would be contained in the claim return to provider reason list. There is more space allocated in the reason lists than is necessary for the current edits in order to allow for future expansion of the number of edits.

In addition to the six individual dispositions, there is also an overall claim disposition, which summarizes the status of the claim.

## The following special processing conditions currently apply only to OPPS claims:

1) Partial hospitalizations are paid on a per diem basis. There is no HCPCS code that specifies a partial hospitalization related service. Partial hospitalizations are identified by means of condition codes, bill types and HCPCS codes specifying the individual services that constitute a partial hospitalization (See Appendix $\mathrm{C}-\mathrm{a}$ ). Thus, there are no input line items that directly correspond to the partial hospitalization service. In order to assign the partial hospitalization APC to one of the line items, the payment APC for one of the line items that represent one of the services that comprise partial hospitalization is assigned the partial hospitalization APC. All other partial hospital services on the same day are packaged - SI changed from Q to N , and a special packaging flag is assigned. Lines that are denied or rejected are ignored in PHP processing.
2) Reimbursement for a day of outpatient mental health services in a non-PH program is capped at the amount of the partial hospital per diem. On a non-PHP claim, the OCE totals the payments for all the designated MH services with the same date of service; if the sum of the payments for the individual MH services exceeds the partial hospital per-diem, the OCE assigns a special "Mental Health Service" composite payment APC to one of the line items that represent MH services. All other MH services for that day are packaged - SI changed from Q to N, and a special packaging flag is assigned (See appendix C-b). The payment rate for the Mental Health Services composite APC is the same as that for the partial hospitalization APC. Lines that are denied or rejected are ignored in the Daily Mental Health logic.
3) For outpatients who undergo inpatient-only procedures on an emergency basis and who expire before they can be admitted to the hospital, a specified APC payment is made to the provider as reimbursement for all services on that day. The presence of modifier CA on the inpatient-only procedure line assigns the specified payment APC and associated status and payment indicators to the line. The packaging flag is turned on for all other lines on that day. Payment is only allowed for one procedure with modifier CA. If multiple inpatient-only procedures are submitted with the modifier-CA, the claim is returned to the provider. If modifier CA is submitted with an inpatient-only procedure for a patient who did not expire (patient status code is not 20), the claim is returned to the provider.
4) Inpatient-only procedures that are on the separate-procedure list are bypassed when performed incidental to a surgical procedure with Status Indicator T. The line(s) with the inpatient-separate procedure is rejected and the claim is processed according to usual OPPS rules.
5) When multiple occurrences of any APC that represents drug administration are assigned in a single day, modifier-59 is required on the code(s) in order to permit payment for multiple units of that APC, up to a specified maximum; additional units above the maximum are packaged. If modifier -59 is not used, only one occurrence of any drug administration APC is allowed and any additional units are packaged (see Appendix I). (v6.0 - v7.3 only)
6) The use of a device, or multiple devices, is necessary to the performance of certain outpatient procedures. If any of these procedures is submitted without a code for the required device(s), the claim is returned to the provider. Discontinued procedures (indicated by the presence of modifier 52,73 or 74 on the line) are not returned for a missing device code.
Conversely, some devices are allowed only with certain procedures, whether or not the specific device is required. If any of these devices is submitted without a code for an allowed procedure, the claim is returned to the provider.
7) Observations may be paid separately if specific criteria are met; otherwise, the observation is packaged into other payable services on the same day. (See Appendix H-a) [v3.1- v8.3].
Observation is a packaged service; may be used to assign Extended Assessment and Management composite APCs, effective v9.0 (See appendix K).
8) Direct admission from a physician's office to observation may be used in the assignment of an extended assessment and management composite, packaged into T, V or critical care service procedure if present; otherwise, the direct admission is processed as a medical visit (see Appendix H-b).
9) In some circumstances, in order for Medicare to correctly allocate payment for blood processing and storage, providers are required to submit two lines with different revenue codes for the same service when blood products are billed. One line is required with revenue code 39X and an identical line (same HCPCS, modifier and units) with revenue code 38X (see Appendix J).
10) Certain wound care services may be paid an APC rate or from the Physician Fee Schedule, depending on the circumstances under which the service was provided. The OCE will change the status indicator and remove the APC assignment when these codes are submitted with therapy revenue codes or therapy modifiers.
11) Providers must append modifier 'FB' to procedures that represent implantation of replacement devices that are obtained at no cost to the provider. Modifier ' FC ' is appended if the replacement device is obtained at reduced cost. If there is an offset payment amount for the procedure, the OCE will reduce the APC rate by the full offset amount (for FB), or by 50\% of the offset amount (for FC) before determining the highest rate for multiple or terminated procedure discounting. If the modifier is used inappropriately (appended to procedure with SI other than S, T, X or V), the claim is returned to the provider. If both the FB and FC modifiers are appended to the same line, the FB modifier will take precedence and the full offset reduction will be applied.
12) Certain special HCPCS codes are always packaged when they appear with other specified services on the same day; however, they may be assigned to an APC and paid separately if there is none of the other specified service on the same day. Some codes are packaged in the presence of any code with status indicator of S, T, V or X (STVX-packaged); other codes are packaged only in the presence of codes with status indicator T (T-packaged). The OCE will change the SI from Q to N for packaging, or to the payable SI and APC specified for the code. If there are multiple STVX and/or T packaged HCPCS codes on a specific date and no other service with which the codes would be packaged on the same date, the code assigned to the APC with the highest payment rate will be paid. All other codes are packaged.
13) Submission of the trauma response critical care code requires that the trauma revenue code ( 068 x ) and the critical care E\&M code (99291) also be present on the claim for the same date of service. Otherwise, the trauma response critical care code will be rejected.
14) Certain codes may be grouped together for reimbursement as a "composite" APC when they occur together on the same claim with the same date of service. When the composite criteria for a group are met, the primary code is assigned the composite APC and status indicator for payment; non-primary codes, and additional primary codes from the same composite group, are assigned status indicator N and packaged into the composite APC. Special payment adjustment flags identify each composite and all the packaged codes on the claim that are related to that composite. Multiple composites, from different composite groups, may
be assigned to a claim for the same date. Terminated codes (modifier 52 or 73 ) are not included in the composite criteria. If the composite criteria are not met, each code is assigned an individual SI/APC for standard OPPS processing (see appendix K). Some composites may also have additional assignment criteria. Lines that are denied or rejected are ignored in the composite criteria.
15) Certain nuclear medicine procedures are performed with specific radiopharmaceuticals. If any specified nuclear medicine procedure is submitted without a code for one of the specified radiopharmaceuticals on the same claim, the claim is returned to the provider. Nuclear medicine procedures that are terminated (indicated by modifier 52, 73 or 74 ) are not returned for a missing radiopharmaceutical.

## The following special processing conditions apply Only to Non-OPPS HOPD claims:

1) Bill type of $83 x$ is consistent with the presence of an ASC procedure on the bill and a calculated ASC payment. The Integrated OCE will assign bill type flags to Non-OPPS HOPD claims (opps flag =2) indicating that the bill type should be 83 x when there is an ASC procedure code present; and, should not be 83 x when there is no ASC procedure present.

Some processing conditions apply to OPPS HOPD and to some Non-OPPS institutional claims:

## Antigens, Vaccine Administration, Splints, and Casts

Vaccine administration, antigens, splints, and casts are paid under OPPS for hospitals. In certain situations, these services when provided by HHA's not under the Home Health PPS, and to hospice patients for the treatment of a non-terminal illness, are also paid under OPPS.
(See appendix N for the specific list of HCPCS codes for reporting antigens, vaccine administration, splints and casts).

## Correct Coding Initiative (CCI) Edits

The Integrated OCE generates CCI edits for OPPS hospitals. All NCCI edits are incorporated into the IOCE with the exception of anesthesiology, E\&M and mental health code pairs. Modifiers and coding pairs in the OCE may differ from those in the NCCI because of differences between facility and professional services.

Effective January 1, 2006, these CCI edits also apply to ALL services billed, under bill types 22X, 23X, 34X, 74X, and 75X, by the following providers: Skilled Nursing Facilities (SNF's), Outpatient Physical Therapy and Speech-Language Pathology Providers (OPT's), CORF's, and Home Health Agencies (HHA's).

The CCI edits are applied to services submitted on a single claim, and on lines with the same date of service. CCI edits address two major types of coding situations. One type, referred to as the comprehensive/component edits, are those edits to code combinations where one of the codes is a component of the more comprehensive code. In this instance only the comprehensive code is paid. The other type, referred to as the mutually exclusive edits, are those edits applied to code combinations where one of the codes is considered to be either impossible or improbable to be performed with the other code. Other unacceptable code combinations are also included. The edit is set to pay the lesser-priced service.

Version 14.1 of CCI edits is included in the July, 2008 IOCE.

NOTE: The CCI edits in the IOCE are always one quarter behind the Carrier CCI edits.
See Appendix Fa and Fb "OCE Edits Applied by Bill Type" for bill types that the IOCE will subject to these and other OCE edits.

All institutional outpatient claims, regardless of facility type, will go through the Integrated Outpatient Code Editor (IOCE)*; however, not all edits are performed for all sites of service or types of claim. Appendix F (a) contains OCE edits that apply for each bill type under OPPS processing; appendix F (b) contains OCE edits that apply to claims from hospitals not subject to OPPS.
*Note: Effective for dates of service on or after 1/1/08 (v9.0), claims for $83 x$ bill type will not go through the Integrated OCE.

The OPPS PRICER would compute the standard APC payment for a line item as the product of the payment amount corresponding to the assigned payment APC, the discounting factor and the number of units for all line items for which the following is true:

Criteria for applying standard APC payment calculations
APC value is not 00000
Payment indictor has a value of 1 or 5
Packaging flag has a value of zero or 3
Line item denial or rejection flag is zero or the line item action flag is 1
Line item action flag is not 2,3 or 4
Payment adjustment flag is zero or 1
Payment method flag is zero
If payment adjustments are applicable to a line item (payment adjustment flag is not 0 or 1 ) then nonstandard calculations are necessary to compute payment for a line item (See Appendix G). The line item action flag is passed as input to the OCE as a means of allowing the FI/MAC to override a line item denial or rejection (used by FI/MAC to override OCE and have PRICER compute payment ignoring the line item rejection or denial) or allowing the FI/MAC to indicate that the line item should be denied or rejected even if there are no OCE edits present. The action flag is also used for handling external line item adjustments. For some sites of service (e.g., hospice) only some services are paid under OPPS.

The line item action flag also impacts the computation of the discounting factor in Appendix D. The Payment Method flag specifies for a particular site of service which of these services are paid under OPPS (See Appendix E). OPPS payment for the claim is computed as the sum of the payments for each line item with the appropriate conversion factor, wage rate adjustment, outlier adjustment, etc. applied. Appendix L summarizes the process of filling in the APC return buffer.

If a claim spans more than one day, the OCE subdivides the claim into separate days for the purpose of determining discounting and multiple visits on the same day. Multiple day claims are determined based on calendar day. The OCE deals with all multiple day claims issues by means of the return information. The Pricer does not need to be aware of the issues associated with multiple day claims. The Pricer simply applies the payment computation as described above and the result is the total OPPS payment for the claim regardless of whether the claim was for a single day or multiple days. If a multiple day claim has a subset of the days with a claim denial, RTP or suspend, the whole claim is denied, RTP or suspended.

## General Programming Notes:

In composite processing, prime/non-prime lines that are denied or rejected (CCI or other edits) will not be included in the composite criteria.

Edits that use status indicator (SI) in their criteria will use the final SI, after any special (SI = Q) processing that could change the SI. (Exception: edits that are stipulated in the overview to be performed before the special processing).

For codes where the default SI is a ' Q ', if special logic to change the SI is not performed because of the bill type or because the line is denied or rejected, the default SI will be carried through to the end of processing and will be returned as the final SI.

If the SI or APC of a code is changed during claims processing, the newly assigned SI or APC is used in computing the discount formula.

For the purpose of determining the version of the OCE to be used, the From date on the header information is used.

The edit return buffers consist of a list of the edit numbers that occurred for each diagnosis, procedure, modifier, date or revenue code. For example, if a 75 -year-old male had a diagnosis related to pregnancy it would create a conflict between the diagnosis and age and sex. Therefore, the diagnosis edit return buffer for the pregnancy diagnosis would contain the edit numbers 2 and 3 . There is more space allocated in the edit return buffers than is necessary for the current edits in order to allow future expansion of the number of edits. The edit return buffers are described in Table 3.

| Name | Bytes | Number | Values | Description | Comments |
| :--- | :---: | :---: | :--- | :--- | :--- |
| Diagnosis edit <br> return buffer | 3 | 8 | $0,1-5$ | Three-digit code specifying the edits <br> that applied to the diagnosis. | There is one 8x3 buffer for each <br> of up to 16 diagnoses. |
| Procedure edit <br> return buffer | 3 | 30 | $0,6,8-9,11-21$, <br> $28,37-40$, <br> $42-45,47$, <br> $49-50,52-64$, <br> $66-74,76, ~ 77, ~$ <br> 78 | Three-digit code specifying the edits <br> that applied to the procedure. | There is one 30x3 buffer for each <br> of up to 450 line items. |
| Modifier edit <br> return buffer | 3 | 4 | $0,22,75$ | Three-digit code specifying the edits <br> that applied to the modifier. | There is one 4x3 buffer for each <br> of the five modifiers for each of <br> up to 450 line items. |
| Date edit <br> return buffer | 3 | 4 | 0,23 | Three-digit code specifying the edits <br> that applied to line item dates. | There is one 4x3 buffer for each <br> of up to 450 line items. |
| Revenue center <br> edit return <br> buffer | 3 | 5 | $0,9^{\text {a }} 41,48$, <br> $50^{\text {b }}, 65$ | Three-digit code specifying the edits <br> that applied to revenue centers. | There is one 5x3 buffer for each <br> of up to 450 line items |

Table 3: Edit Return Buffers
${ }^{\text {a }}$ Revenue codes 099x with SI of E when submitted without a HCPCS code (OPPS only)
${ }^{\mathrm{b}}$ Revenue code 0637 with SI of E when submitted without a HCPCS code (OPPS \& Non-OPPS)
Each of the return buffers is positionally representative of the source that it contains information for, in the order in which that source was passed to the OCE. For example, the seventh diagnosis return buffer contains information about the seventh diagnosis; the fourth modifier edit buffer contains information about the modifiers in the fourth line item.

There are currently 78 different edits in the OCE, ten of which are inactive for the current version of the program. Each edit is assigned a number. A description of the edits is contained in Table 4.

| $\begin{gathered} \text { Edit } \\ \# \\ \hline \end{gathered}$ | Description | Non-OPPS <br> Hospitals | Disposition |
| :---: | :---: | :---: | :---: |
| 1 | Invalid diagnosis code | Y | RTP |
| 2 | Diagnosis and age conflict | Y | RTP |
| 3 | Diagnosis and sex conflict | Y | RTP |
| $4^{4}$ | Medicare secondary payor alert (v1.0-v1.1) |  | Suspend |
| $5^{4}$ | E-diagnosis code cannot be used as principal diagnosis | Y | RTP |
| 6 | Invalid procedure code | Y | RTP |
| 7 | Procedure and age conflict (Not activated) |  | RTP |
| 8 | Procedure and sex conflict | Y | RTP |
| 9 | Non-covered for reasons other than statute | Y | Line item denial |
| 10 | Service submitted for denial (condition code 21) | Y | Claim denial |
| 11 | Service submitted for FI/MAC review (condition code 20) | Y | Suspend |
| 12 | Questionable covered service | Y | Suspend |
| 13 | Separate payment for services is not provided by Medicare (v1.0 - v6.3) |  | Line item rejection |
| 14 | Code indicates a site of service not included in OPPS (v1.0 - v6.3) |  | Claim RTP |
| 15 | Service unit out of range for procedure ${ }^{1}$ | Y | RTP |
| 16 | Multiple bilateral procedures without modifier 50 (see Appendix A) (v1.0 - v6.2) |  | RTP |
| 17 | Inappropriate specification of bilateral procedure (see Appendix A) | Y | RTP |
| 18 | Inpatient procedure ${ }^{2}$ |  | Line item denial |
| 19 | Mutually exclusive procedure that is not allowed by NCCI even if appropriate modifier is present |  | Line item rejection |
| 20 | Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present |  | Line item rejection |
| 21 | Medical visit on same day as a type "T" or "S" procedure without modifier 25 (see Appendix B) |  | Line item rejection |
| 22 | Invalid modifier | Y | RTP |
| 23 | Invalid date | Y | RTP |
| 24 | Date out of OCE range | Y | Suspend |
| 25 | Invalid age | Y | RTP |
| 26 | Invalid sex | Y | RTP |
| 27 | Only incidental services reported ${ }^{3}$ |  | Claim rejection |
| 28 | Code not recognized by Medicare; alternate code for same service may be available | Y | Line item rejection |
|  | (See Appendix C for logic for edits 29-36, and 63-64) |  |  |
| 29 | Partial hospitalization service for non-mental health diagnosis |  | RTP |
| 30 | Insufficient services on day of partial hospitalization |  | Suspend |
| 31 | Partial hospitalization on same day as ECT or type T procedure (v1.0 - v6.3) |  | Suspend |
| 32 | Partial hospitalization claim spans 3 or less days with insufficient services on a least one of the days |  | Suspend |
| 33 | Partial hospitalization claim spans more than 3 days with insufficient number of days having partial hospitalization services |  | Suspend |
| 34 | Partial hospitalization claim spans more than 3 days with insufficient number of days meeting partial hospitalization criteria |  | Suspend |
| 35 | Only Mental Health education and training services provided |  | RTP |
| 36 | Extensive mental health services provided on day of ECT or type T procedure (v1.0 v6.3) |  | Suspend |
| 37 | Terminated bilateral procedure or terminated procedure with units greater than one |  | RTP |
| 38 | Inconsistency between implanted device or administered substance and implantation or associated procedure |  | RTP |
| 39 | Mutually exclusive procedure that would be allowed by NCCI if appropriate modifier were present |  | Line item rejection |
| 40 | Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present |  | Line item rejection |

## Table 4: Description of edits/claim reasons (Part 1 of 2)

[^0]| Edit | Description | Non-OPPS <br> Hospitals | Disposition |
| :---: | :---: | :---: | :---: |
| 41 | Invalid revenue code | Y | RTP |
| 42 | Multiple medical visits on same day with same revenue code without condition code G0 (see Appendix B) |  | RTP |
| 43 | Transfusion or blood product exchange without specification of blood product |  | RTP |
| 44 | Observation revenue code on line item with non-observation HCPCS code |  | RTP |
| 45 | Inpatient separate procedures not paid |  | Line item rejection |
| 46 | Partial hospitalization condition code 41 not approved for type of bill | Y* | RTP |
| 47 | Service is not separately payable |  | Line item rejection |
| 48 | Revenue center requires HCPCS |  | RTP |
| 49 | Service on same day as inpatient procedure |  | Line item denial |
| 50 | Non-covered based on statutory exclusion | Y | RTP |
| 51 | Multiple observations overlap in time (Not activated) |  | RTP |
| 52 | Observation does not meet minimum hours, qualifying diagnoses, and/or ' T ' procedure conditions (V3.0-V6.3) |  | RTP |
| 53 | Codes G0378 and G0379 only allowed with bill type 13x or 85x | $\mathrm{Y}^{*}$ | Line item rejection |
| 54 | Multiple codes for the same service | Y | RTP |
| 55 | Non-reportable for site of service |  | RTP |
| 56 | E/M-condition not met and line item date for obs code G0244 is not $12 / 31$ or $1 / 1$ (Active V4.0 - V6.3) |  | RTP |
| 57 | Composite E/M condition not met for observation and line item date for code G0378 is 1/1 |  | Suspend |
| 58 | G0379 only allowed with G0378 |  | RTP |
| 59 | Clinical trial requires diagnosis code V707 as other than primary diagnosis |  | RTP |
| 60 | Use of modifier CA with more than one procedure not allowed |  | RTP |
| 61 | Service can only be billed to the DMERC | Y | RTP |
| 62 | Code not recognized by OPPS; alternate code for same service may be available |  | RTP |
| 63 | This OT code only billed on partial hospitalization claims (See appendix C) |  | RTP |
| 64 | AT service not payable outside the partial hospitalization program (See appendix C) |  | Line item rejection |
| 65 | Revenue code not recognized by Medicare | Y | Line item rejection |
| 66 | Code requires manual pricing |  | Suspend |
| 67 | Service provided prior to FDA approval | Y | Line item rejection |
| 68 | Service provided prior to date of National Coverage Determination (NCD) approval | Y | Line item rejection |
| 69 | Service provided outside approval period | Y | Line item rejection |
| 70 | CA modifier requires patient status code 20 |  | RTP |
| 71 | Claim lacks required device code |  | RTP |
| 72 | Service not billable to the Fiscal Intermediary/Medicare Administrative Contractor | Y | RTP |
| 73 | Incorrect billing of blood and blood products |  | RTP |
| 74 | Units greater than one for bilateral procedure billed with modifier 50 |  | RTP |
| 75 | Incorrect billing of modifier FB or FC |  | RTP |
| 76 | Trauma response critical care code without revenue code 068x and CPT 99291 |  | Line item rejection |
| 77 | Claim lacks allowed procedure code |  | RTP |
| 78 | Claim lacks required radiopharmaceutical |  | RTP |

Table 4: Description of edits/claim reasons (Part 2 of 2)

* Non-OPPS hospital bill types allowed for edit condition

Y = edits apply to Non-OPPS hospital claims

The claim return buffer described in Table 5 summarizes the edits that occurred on the claim.

|  | Bytes | Number | Values | Description |
| :---: | :---: | :---: | :---: | :---: |
| Claim processed flag | 1 | 1 | 0-3, 9 | 0 - Claim processed. <br> 1 - Claim could not be processed (edits 23, 24, $46^{\text {a }}$, TOB 83x or other invalid bill type). <br> 2 - Claim could not be processed (claim has no line items). <br> 3 - Claim could not be processed (edit 10 - condition code 21 is present). <br> 9 - Fatal error; OCE can not run - the environment can not be set up as needed; exit immediately. |
| Num of line items | 3 | 1 | nnn | Input value from Nsgptr, or 450, whichever is less. |
| National provider identifier (NPI) | 13 | 1 | aaaaaaaaaaaa | Transferred from input, for Pricer. |
| OSCAR Medicare provider number | 6 | 1 | aaaaaa | Transferred from input, for Pricer. |
| Overall claim disposition | 1 | 1 | 0-5 | 0 - No edits present on claim. <br> 1 - Only edits present are for line item denial or rejection. <br> 2 - Multiple-day claim with one or more days denied or rejected. <br> 3 - Claim denied, rejected, suspended or returned to provider, or single day claim w all line items denied or rejected, w only post payment edits. <br> 4 - Claim denied, rejected, suspended or returned to provider, or single day claim w all line items denied or rejected, w only pre-payment edits. <br> 5 - Claim denied, rejected, suspended or returned to provider, or single day claim w all line items denied or rejected, w both post-payment and pre-payment edits. |
| Claim rejection disposition | 1 | 1 | 0-2 | 0 - Claim not rejected. <br> 1 - There are one or more edits present that cause the claim to be rejected. <br> 2 - There are one or more edits present that cause one or more days of a multiple-day claim to be rejected. |
| Claim denial disposition | 1 | 1 | 0-2 | 0 - Claim not denied. <br> 1 - There are one or more edits present that cause the claim to be denied. <br> 2 - There are one or more edits present that cause one or more days of a multiple-day claim to be denied, or single day claim with all lines denied (edit 18 only). |
| Claim returned to provider disposition | 1 | 1 | 0-1 | 0 - Claim not returned to provider. <br> 1 - There are one or more edits present that cause the claim to be returned to provider. |
| Claim suspension disposition | 1 | 1 | 0-1 | 0 - Claim not suspended. <br> 1 - There are one or more edits present that cause the claim to be suspended. |
| Line item rejection disposition | 1 | 1 | 0-1 | 0 - There are no line item rejections. <br> 1 - There are one or more edits present that cause one or more line items to be rejected. |
| Line item denial disposition | 1 | 1 | 0-1 | 0 - There are no line item denials. <br> 1 - There are one or more edits present that cause one or more line items to be denied. |
| Claim rejection reasons | 3 | 4 | 27 | Three-digit code specifying edits (See Table 6) that caused the claim to be rejected. There is currently one edit that causes a claim to be rejected. |
| Claim denial reasons | 3 | 8 | 10, | Three-digit code specifying edits (see Table 6) that caused the claim to be denied. There is currently one active edit that causes a claim to be denied. |
| Claim returned to provider reasons | 3 | 30 | $\begin{aligned} & 1-3,5-6,8, \\ & 14-17,22-23, \\ & 25-26,29,35, \\ & 37-38,41-44, \\ & 46,48,50,52, \\ & 54,55,56,58- \\ & 63,70-75,77, \\ & 78 \end{aligned}$ | Three-digit code specifying edits (see Table 6) that caused the claim to be returned to provider. <br> There are 43 edits that could cause a claim to be returned to provider. |
| Claim suspension reasons | 3 | 16 | $\begin{aligned} & 4,11,12,24, \\ & 30-34,36,57, \\ & 66 \end{aligned}$ | Three-digit code specifying the edits that caused the claim to be suspended (see Table 6). There are 12 edits that could cause a claim to be suspended. |
| Line item rejection reasons | 3 | 12 | $\begin{aligned} & 13,19,20,21, \\ & 28,39,40,45, \\ & 47,50,53,64, \\ & 65,67-69,76 \\ & \hline \end{aligned}$ | Three-digit code specifying the edits that caused the line item to be rejected (See Table 6). There are 16 edits that could cause a line item to be rejected. |
| Line item denied reasons | 3 | 6 | 9, 18, 49 | Three-digit code specifying the edits that caused the line item to be denied (see Table 6). There are currently 3 active edits that cause a line item denial. |
| APC/ASC return buffer flag | 1 | 1 | 0-1 | 0 - No services paid under OPPS. APC/ASC return buffer filled in with default values and ASC group number (See App F). <br> 1 - One or more services paid under OPPS. APC/ASC return buffer filled in with APC. |
| VersionUsed | 8 | 1 | yy.vv.rr | Version ID of the version used for processing the claim (e.g., 2.1.0). |
| Patient Status | 2 | 1 |  | Patient status code - transferred from input. |
| Opps Flag | 1 | 1 | 1-2* | OPPS/Non-OPPS flag - transferred from input. <br> *A blank, zero or any other value is defaulted to 1 |
| Non-OPPS bill type flag | 1 | 1 | 1-2 | Assigned by OCE based on presence/absence of ASC code <br> 1 = Bill type should be 83x (v8.2-v8.3 only; ASC list \& 83x TOB removed v9.0) <br> 2 = Bill type should not be 83x |

Table 5: Claim Return Buffer
$\mathbf{a}_{\text {Edit }} 46$ terminates processing only for those bill types where no other edits are applied (See App. F).

Table 6 summarizes the edit return buffers, claim disposition and claim reasons. Table 6 also summarizes the pre and post payment status of each edit.

Table 6: Relationship between Edits, Disposition and Reasons (part 1 of 2)
Day denial or rejection means that all line items occurring on the day of the day denial or rejection will have the line item denial or rejection indicator (Table 7) set to 1.

${ }^{\bar{a}}$ Edit 9 will be returned in the Revenue code edit return buffer for revenue code 099 x when no HCPCS code is on the line ${ }^{\mathrm{b}}$ Edit 50 will be returned in the Revenue code edit return buffer for revenue code 0637 when no HCPCS code is on the line

Table 7 describes the APC/ASC return buffer. The APC/ASC return buffer contains the APC for each line item along with the relevant information for computing OPPS payment for OPPS hospital claims. Two APC numbers are returned in the APC/ASC fields: HCPCS APC and payment APC. Except when specified otherwise (e.g., partial hospitalization, mental health, observation logic, codes with SI of Q, etc.), the HCPCS APC and the payment APC are always the same. The APC/ASC return buffer contains the information that will be passed to the OPPS PRICER. The APC is only returned for claims from HOPDs that are subject to OPPS, and for the special conditions specified in Appendix F-a.

The APC/ASC return buffer for the PC program interface also contains the ASC payment groups for procedures on certain Non-OPPS hospital claims. The ASC group number is returned in the payment APC/ASC field, the HCPCS ASC field is zero-filled [v8.2-v8.3 only].

|  | $\begin{gathered} \text { Size } \\ \text { (bytes) } \end{gathered}$ | Values | Description |
| :---: | :---: | :---: | :---: |
| HCPCS procedure code | 5 | Alpha | For potential future use by Pricer. Transfer from input |
| Payment APC/ASC* | 5 | 00001-nnnnn | APC used to determine payment. If no APC assigned to line item, the value 00000 is assigned. For partial hospitalization and some inpatient-only procedure claims the payment APC may be different than the APC assigned to the HCPCS code. <br> ASC group for the HCPCS code. |
| HCPCS APC | 5 | 00001-nnnnn | APC assigned to HCPCS code |
| Status indicator** | 2 | Alpha <br> [Right justified, blank filled] | A - Services not paid under OPPS; paid under fee schedule or other payment system. <br> B - Non-allowed item or service for OPPS <br> C - Inpatient procedure <br> E - Non-allowed item or service <br> F - Corneal tissue acquisition; certain CRNA services and hepatitis B vaccines <br> G - Drug/Biological Pass-through <br> H - Pass-through device categories, brachytherapy sources, and radiopharmaceutical agents <br> J - New drug or new biological pass-through ${ }^{1}$ <br> K - Non pass-through drugs and biologicals, blood and blood products <br> L - Flu/PPV vaccines <br> M - Service not billable to the FI/MAC <br> N - Items and Services packaged into APC rates <br> P - Partial hospitalization service <br> Q - Packaged services subject to separate payment based on payment criteria <br> S - Significant procedure not subject to multiple procedure discounting <br> T-Significant procedure subject to multiple procedure discounting <br> V - Clinic or emergency department visit <br> W - Invalid HCPCS or Invalid revenue code with blank HCPCS <br> X - Ancillary service <br> Y - Non-implantable DME <br> Z - Valid revenue with blank HCPCS and no other SI assigned |
| Payment indicator** | 2 | Numeric (1-nn) <br> [Right justified, blank filled]. | 1 - Paid standard hospital OPPS amount (status indicators K, S, T, V, X) <br> 2 - Services not paid under OPPS; paid under fee schedule or other payment system (SI A) <br> 3 - Not paid (Q, M, W,Y, E), or not paid under OPPS (B, C, Z) <br> 4 - Paid at reasonable cost (status indicator F, L) <br> 5 - Paid standard amount for pass-through drug or biological (status indicator G) <br> 6 - Payment based on charge adjusted to cost (status indicator H) <br> 7 - Additional payment for new drug or new biological (status indicator J) <br> 8 - Paid partial hospitalization per diem (status indicator P) <br> 9 - No additional payment, payment included in line items with APCs (status indicator N , or no HCPCS code and certain revenue codes, or HCPCS codes G0176 <br> (activity therapy), G0129 (occupational therapy), or G0177 (patient education and training service)) |
| Discounting formula number** | 1 | 1-9 | See Appendix D for values |
| Line item denial or rejection flag** | 1 | 0-2 | 0 - Line item not denied or rejected <br> 1 - Line item denied or rejected (edit return buffer for line item contains a $9,13,18,19,20,21,28,39,40,45,47,49,53,64,65,67,68,69,76)$ <br> 2- The line is not denied or rejected, but occurs on a day that has been denied or rejected (not used as of 4/1/02-v3.0). |
| Packaging flag** | 1 | 0-4 | 0 - Not packaged <br> 1 - Packaged service (status indicator N, or no HCPCS code and certain revenue codes) <br> 2 - Packaged as part of partial hospital per diem or daily mental health service per diem <br> 3 - Artificial charges for surgical procedure (submitted charges for surgical HCPCS < \$1.01) <br> 4 - Packaged as part of drug administration APC payment (v6.0 - v7.3 only) |

Table 7: APC/ASC Return Buffer (Part 1 of 2)

| Name | $\begin{gathered} \text { Size } \\ \text { (bytes) } \end{gathered}$ | Values | Description |
| :---: | :---: | :---: | :---: |
| Payment adjustment flag** | 2 | $0-8,91-99$ <br> [Right justified, blank filled] | 0 - No payment adjustment <br> 1 - Paid standard amount for pass-through drug or biological (status indicator G) <br> 2 - Payment based on charge adjusted to cost (status indicator H ) <br> 3 - Additional payment for new drug or new biological applies to APC (status indicator J) ${ }^{1}$ <br> 4 - Deductible not applicable (specific list of HCPCS codes) <br> 5 - Blood/blood product used in blood deductible calculation <br> 6 - Blood processing/storage not subject to blood deductible <br> 7 - Item provided without cost to provider <br> 8 - Item provided with partial credit to provider <br> 91-99 Each composite APC present, same value for prime and non-prime codes. |
| Payment Method Flag** | 1 | 0-4 | 0 - OPPS pricer determines payment for service <br> 1 - Based on OPPS coverage or billing rules, the service is not paid <br> 2 - Service is not subject to OPPS <br> 3 - Service is not subject to OPPS, and has an OCE line item denial or rejection <br> 4 - Line item is denied or rejected by FI/MAC; OCE not applied to line item |
| Service units | 7 | 1-x | Transferred from input, for Pricer. For the line items assigned APCs 33 or 34, the service units are always assigned a value of one by the OCE even if the input service units were greater than one <br> [Input service units also may be reduced for some Drug administration APCs, based on Appendix I (v6.0 - v7.3 only)] |
| Charge | 10 | nnnnnnnnnn | Transferred from input, for Pricer; COBOL pic 9(8)v99 |
| Line item action flag** | 1 | 0-4 | Transferred from input to Pricer, and can impact selection of discounting formula (AppxD). <br> 0 - OCE line item denial or rejection is not ignored <br> 1 - OCE line item denial or rejection is ignored <br> 2 - External line item denial. Line item is denied even if no OCE edits <br> 3 - External line item rejection. Line item is rejected even if no OCE edits <br> 4 - External line item adjustment. Technical charge rules apply. |

Table 7: APC/ASC Return Buffer (Part 2 of 2)
${ }^{1}$ Status indicator J was replaced by status indicator G starting in April, 2002 (V3.0)

* ASC \# returned only for TOB 83x, on the PC version output report, for v8.2 \& v8.3
** Not activated for claims with Opps flag $=2$ (blanks are returned in the APC/ASC Return Buffer)

## Appendix A (OPPS \& Non-OPPS) <br> Bilateral Procedure Logic

There is a list of codes that are exclusively bilateral if a modifier of 50 is present*. The following edits apply to these bilateral procedures*.

| Condition | Action | Edit |
| :--- | :--- | :---: |
| The same code which can be performed bilaterally <br> occurs two or more times on the same date of service, <br> all codes without a 50 modifier | Return claim to provider | 16 |
| The same code which can be performed bilaterally <br> occurs two or more times (based on units and/or lines) <br> on the same date of service, all or some codes with a 50 <br> modifier | Return claim to provider | 17 |

There is a list of codes that are considered inherently bilateral even if a modifier of 50 is not present. The following edit applies to these bilateral procedures**.

| Condition | Action | Edit |
| :--- | :--- | :--- |
| The same bilateral code occurs two or <br> more times (based on units and/or <br> lines) on the same date of service | Return claim to provider | $17^{* * *}$ |

There are two lists of codes, one is considered conditionally bilateral and the other independently bilateral if a modifier 50 is present. The following edit applies to these bilateral procedures (effective 10/1/06). [OPPS claims only]

| Condition | Action | Edit |
| :--- | :--- | :--- |
| The bilateral code occurs with modifier <br> 50 and more than one unit of service on <br> the same line | Return claim to provider | 74 |

Note: For ER and observation claims, all services on the claim are treated like any normal claim, including multiple day processing.
*Note: The "exclusively bilateral" list was eliminated, effective 10/1/05 (v6.3); edits 16 and 17 will not be triggered by the presence/absence of modifier 50 on certain bilateral codes for dates of service on or after 10/1/05.
** Exception: For codes with SI of V that are also on the Inherent Bilateral list, condition code 'G0' will take precedence over the bilateral edit; these claims will not receive edit 17 nor be returned to provider.
*** Exception: Edit 17 is not applied to Non-OPPS TOB 85x

# Appendix B (OPPS Only) Rules for Medical and Procedure Visits on the Same Day and for Multiple Medical Visits on Same Day 

Under some circumstances, medical visits on the same date as a procedure will result in additional payments. A modifier of 25 with an Evaluation and Management (E\&M) code, status indicator V, is used to report a medical visit that takes place on the same date that a procedure with status indicator S or T is performed, but that is significant and separately identifiable from the procedure. However, if any E\&M code that occurs on a day with a type " T " or " S " procedure does not have a modifier of 25 , then edit 21 will apply and there will be a line item rejection.

If there are multiple E\&M codes on the same day, on the same claim the rules associated with multiple medical visits are shown in the following table.

| E\&M Code | Revenue Center | Condition Code | Action | Edit |
| :---: | :---: | :---: | :---: | :---: |
| 2 or more | Revenue center is different for each E\&M code, and all E\&M codes have units equal to 1 . | Not G0 | Assign medical APC to each line item with E\&M code | - |
| 2 or more | Two or more E\&M codes have the same revenue center <br> OR <br> One or more E\&M codes with units greater than one had same revenue center | Not G0 | Assign medical APC to each line item with E\&M code and Return Claim to Provider | 42 |
| 2 or more | Two or more E\&M codes have the same revenue center <br> OR <br> one or more E\&M codes with units greater than one had same revenue center | G0* | Assign medical APC to each line item with E\&M code | - |

The condition code G0 specifies that multiple medical visits occurred on the same day with the same revenue center, and that these visits were distinct and constituted independent visits (e.g., two visits to the ER for chest pain).

* For codes with SI of V that are also on the Inherent Bilateral list, condition code 'G0' will take precedence over the bilateral edit to allow multiple medical visits on the same day.

## Appendix C-a (OPPS Only) Partial Hospitalization Logic

## Appendix C-b (cont'd) Mental Health Logic

Assign Mental Health Service Composite APC
The first listed line item with HCPCS code from the list of Daily MH services (DMH list) is assigned a payment APC of 34 , a status indicator of P, a payment indicator of 8 , a discounting factor of 1 , a line item denial or rejection indicator of 0 , a packaging flag of 0 , a payment adjustment flag of 0 and a service unit of 1 .

For all other line items with a daily mental health service (DMH list), the SI is changed to N and the packaging flag is set to 2 .
*NOTE: The use of code G0177 (ET) is allowed on MH claims that are not billed as Partial Hospitalization

## Appendix D Computation of Discounting Fraction (OPPS Only)

## Type "T" Multiple and Terminated Procedure Discounting:

Line items with a status indicator of " T " are subject to multiple-procedure discounting unless modifiers 76, 77, 78 and/or 79 are present. The " T " line item with the highest payment amount will not be multiple procedure discounted, and all other "T" line items will be multiple procedure discounted. All line items that do not have a status indicator of "T" will be ignored in determining the multiple procedure discount. A modifier of 52 or 73 indicates that a procedure was terminated prior to anesthesia. A terminated type "T" procedure will also be discounted although not necessarily at the same level as the discount for multiple type " T " procedures.

Terminated bilateral procedures or terminated procedures with units greater than one should not occur, and have the discounting factor set so as to result in the equivalent of a single procedure. Claims submitted with terminated bilateral procedures or terminated procedure with units greater than one are returned to the provider (edit 37).

Bilateral procedures are identified from the "bilateral" field in the physician fee schedule. Bilateral procedures have the following values in the "bilateral" field:

1. Conditional bilateral (i.e. procedure is considered bilateral if the modifier 50 is present)
2. Inherent bilateral (i.e. procedure in and of itself is bilateral)
3. Independent bilateral (i.e., procedure is considered bilateral if the modifier 50 is present, but full payment should be made for each procedure (e.g., certain radiological procedures))

Inherent bilateral procedures will be treated as non-bilateral procedures since the bilateralism of the procedure is encompassed in the code. For bilateral procedures the type "T" procedure discounting rules will take precedence over the discounting specified in the physician fee schedule.

All line items for which the line item denial or reject indicator is 1 and the line item action flag is zero, or the line item action flag is 2 , 3 or 4 , will be ignored in determining the discount; packaged line items, (the packaging flag is not zero or 3), will also be ignored in determining the discount. The discounting process will utilize an APC payment amount file. The discounting factor for bilateral procedures is the same as the discounting factor for multiple type "T" procedures.

## Non-Type T Procedure Discounting:

Line items with SI other than "T" (except line items with SI of S and X) are also subject to bilateral procedure discounting with modifier 50, if identified in the physician fee schedule as Conditional bilateral.
All line items with SI other than "T" are subject to terminated procedure discounting when modifier 52 or 73 is present.
There are nine different discount formulas that can be applied to a line item.

1. 1.0
2. $(1.0+\mathrm{D}(\mathrm{U}-1)) / \mathrm{U}$
3. $\mathrm{T} / \mathrm{U}$
4. $(1+\mathrm{D}) / \mathrm{U}$
5. D
6. *TD/U
7. $* D(1+\mathrm{D}) / \mathrm{U}$
8. 2.0
9. $2 \mathrm{D} / \mathrm{U}$

Where
$\mathbf{D}=$ discounting fraction (currently 0.5 )
$\mathbf{U}=$ number of units
$\mathbf{T}=$ terminated procedure discount (currently 0.5)
*Note: Effective 1/1/08 (v9.0), formula \#6 and \#7 discontinued; new formula \#9 created.

The discount formula that applies is summarized in the following table.

|  |  |  | Discounting Formula Number |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Type "T" Procedure |  | Non Type "T" Procedure |  |
| Payment <br> Amount | Modifier 52 or 73 | Modifier 50 | Conditional or Independent Bilateral | Inherent or Non Bilateral | Conditional or Independent Bilateral | Inherent <br> or <br> Non Bilateral |
| Highest | No | No | 2 | 2 | 1 | 1 |
| Highest | Yes | No | 3 | 3 | 3 | 3 |
| Highest | No | Yes | 4 | 2 | 4/8* | 1 |
| Highest | Yes | Yes | 3 | 3 | 3 | 3 |
| Not Highest | No | No | 5 | 5 | 1 | 1 |
| Not Highest | Yes | No | 3 | 3 | 3 | 3 |
| Not Highest | No | Yes | 9 | 5 | 4/8* | 1 |
| Not Highest | Yes | Yes | 3 | 3 | 3 | 3 |

For the purpose of determining which APC has the highest payment amount, the terminated procedure discount (T) and any applicable offset, will be applied prior to selecting the type T procedure with the highest payment amount. If both offset and terminated procedure discount apply, the offset will be applied first, before the terminated procedure discount.
*If not terminated, non-type T Conditional bilateral procedures with modifier 50 will be assigned discount formula \#4; exception, conditional bilateral procedures with SI of "S" or "X", with modifier 50, will be assigned to formula \#8 - effective 4/1/08. Non-type T Independent bilateral procedures with modifier 50 will be assigned to formula \#8.

## Appendix E(a) [OPPS flag =1]

## Logic for Assigning Payment Method Flag Values

Appendix E(b) [OPPS flag = 2] [Not activated].
Logic for Assigning Non-OPPS Hospital Payment Method Flag Values
[PMF values not returned on claims with OPPS flag = 2]

| Bill type | Status Indicator | PMF |
| :--- | :--- | :--- |
| HOPD (12x, 13x, 14x) <br> CAH (85x) <br> ASC (83x <br> W OPPS flag = 2 | C, E,M, W, Y, Z | 1 |
| HOPD (12x, 13x, 14x) <br> CAH (55x) <br> ASC (83x <br> W OPPS flag = 2 | A, B, F, G, H, K, L, N, P, Q, S, T, V, X | 2 |

## Appendix F(a) - OCE Edits Applied by Bill Type [OPPS flag =1]

| Row \# | Provider/Bill Types | Edits Applied (by edit number) | APC buffer |
| :---: | :---: | :---: | :---: |
| 1 | 12X or 14X with condition code 41 | 46 | Buffer not completed |
| 2 | 12 X or 14 X without condition code 41 | $\begin{aligned} & 1-9,11-23,25-28,35-45,47-50,53-54, \\ & 59,61-65,69,71-75,77,78 . \end{aligned}$ | Buffer completed |

## FLOW CHART ROWS ARE IN HIERARCHICAL ORDER.

Notes:

1) Edit 10, and edits 23 and 24 for From/Through dates, are not dependent on Appendix F.
2) If edit 23 is not applied, the lowest service (or From) date is substituted for invalid dates and processing continues.
3) Edit 22 is bypassed if revenue code is 540 .
4) Edit 77 is not applicable to bill type 12x (rows \#1 and \#2).
5) Bypass edit 48 if revenue code is $100 \mathrm{x}, 210 \mathrm{x}, 310 \mathrm{x}, 0500,0509,0521,0522,0524,0525,0527,0528,0583,0637,0660-$ 0663, 0669, 0905-0907, 0931, 0932, 0948, 099x.
6) In V1.0 to V3.2, "vaccines" included all vaccines paid by APC; from V4.0 forward, "vaccines" includes Hepatitis B vaccines only, plus Flu and PPV administration.
7) Bypass diagnosis edits (1-5) for bill types 32X and 33X (HHA) if From date is before October 1 and Through date is on or after October 1.
8) Bill type 24 X deleted, effective 10/1/05.
9) CCI edits (19, 20, 39 and 40) applied to bill types 22X, 23X, 34X, 74X and 75X effective 1/1/06.
10) Edit 28 applied to bill type 22X and 23X effective 10/1/05.

## Appendix F(b) - OCE Edits Applied by Non-OPPS Hospital Bill Type [OPPS flag = 2]

| Row \# | Provider/Bill Types | Edits Applied (by edit number) | APC buffer |
| :---: | :---: | :---: | :---: |
| 1 | 12X or 14X with condition code 41, and OPPS flag $=2$ | 46 | Buffer not completed |
| 2 | 12 X or 14 X without condition code 41, and OPPS flag $=2$ | $\begin{aligned} & 1-3,5,6,8,9,11,12,15,17,22,23,25,26 \text {, } \\ & 27,41,50,53,54,61,65,67-69,72 . \end{aligned}$ | Buffer not completed |
| 3 | 13X with condition code 41, and OPPS flag = 2 | $\begin{aligned} & 1-3,5,6,8,9,11,12,15,17,22,23,25,26, \\ & 28,41,50,54,61,65,67-69,72 . \end{aligned}$ | Buffer not completed |
| 4 | 13X without condition code 41, and OPPS flag = 2 | $\begin{aligned} & 1-3,5,6,8,9,11,12,15,17,22,23,25,26, \\ & 28,41,50,54,61,65,67-69,72 . \end{aligned}$ | Buffer not completed |
| 5 | 85X, and OPPS flag = 2 | $\begin{aligned} & 1-3,5,6,8,9,11,12,15,17,22,23,25,26, \\ & 28,41,50,54,61,65,67-69,72 . \end{aligned}$ | Buffer not completed |
| 6 | 83X, and OPPS flag = 2 | $\begin{aligned} & 1-3,5,6,8,9,11,12,15,17,22,23,25,26, \\ & 28,41,50,53,54,61,65,67-69,72 . \end{aligned}$ | Buffer completed |

FLOW CHART ROWS ARE IN HIERARCHICAL ORDER.
Notes:

1) Edit 10, and edits 23 and 24 for From/Through dates, are not dependent on Appendix F.
2) If edit 23 is not applied, the lowest service (or From) date is substituted for invalid dates and processing continues.
3) Edit 22 is bypassed if revenue code is 540
4) Bypass edit 72 if bill type is $85 X$ and revenue code is $096 x, 097 x$ or $098 x$.
5) Bypass edit 17 if bill type is 85 X
6) 83 X bill type is invalid for IOCE effective for dates of service on or after 1/1/08 (IOCE v9.0).

## Appendix G [OPPS Only]

The payment adjustment flag for a line item is set based on the criteria in the following chart:

| Criteria | Payment <br> Adjustment Flag <br> Value |
| :--- | :--- |
| Status indicator G | 1 |
| Status indicator H | 2 |
| Status indicator J ${ }^{1}$ | 3 |
| Code is flagged as 'deductible not applicable’ | 4 |
| Blood product with modifier BL on RC 38X line ${ }^{2}$ | 5 |
| Blood product with modifier BL on RC 39X line ${ }^{2}$ | 6 |
| Item provided without cost to provider | 7 |
| Item provided with partial credit to provider | 8 |
| First composite APC present - prime \& non-prime codes | 91 |
| Second composite APC present - prime \& non-prime codes | 92 |
| Third composite APC present - prime \& non-prime codes | 93 |
| Fourth composite APC present - prime \& non-prime codes | 94 |
| Fifth thru ninth composite APC present - prime \& non- <br> prime | $95-99$ |
| All others | 0 |

${ }^{1}$ Status indicator J was replaced by status indicator G starting in April 2002 (V3.0)
${ }^{2}$ See Appendix J for assignment logic (v6.2)

## Appendix H [OPPS Only]

## OCE Observation Criteria (v3.0 - v8.3)

Rules:

1. Code G0378 is used to identify all outpatient observations, regardless of the reason for observation (diagnosis) or the duration of the service.
2. Code G0379 is used to identify direct admission from a physician's office to observation care, regardless of the reason for observation.
3. Code G0378 has default Status Indicator "Q" and default APC 0
a. If the criteria are met for payable observation, the SI is changed to " S " and APC 339 is assigned.
b. If the criteria for payable observation are not met, the SI is changed to " N ".
4. Code G0379 has default Status Indicator "Q" and default APC 0
a. If associated with a payable observation (payable G0378 present on the same day), the SI for G0379 is changed to "N".
b. If the observation on the same day is not payable, the SI is changed to " V " and APC 604 is assigned.
c. If there is no G0378 on the same day, the claim is returned to the provider.
5. Observation logic is performed only for claims with bill type $13 x$, with or without condition code 41 .
6. Lines with G0378 and G0379 are rejected if the bill type is not $13 x$ (or $85 x$ ).
7. If any of the criteria for separately payable observation is not met, the observation is packaged, or the claim or line is suspended or rejected according to the disposition of the observation edits.
8. In order to qualify for separate payment, each observation must be paired with a unique $\mathrm{E} / \mathrm{M}$ or critical care
a. (C/C) visit, or with code G0379 (Direct admission from physician's office).
$\mathrm{E} / \mathrm{M}$ or $\mathrm{C} / \mathrm{C}$ visit is required the day before or day of observation; Direct admission is required on the day of observation.
9. If an observation cannot be paired with an $E / M$ or $C / C$ visit or Direct admission, the observation is packaged.
10. $\mathrm{E} / \mathrm{M}$ or $\mathrm{C} / \mathrm{C}$ visit or Direct admission on the same day as observation takes precedence over $\mathrm{E} / \mathrm{M}$ or $\mathrm{C} / \mathrm{C}$ visit on the day before observation.
11. E/M, C/C visit or Direct admission that have been denied or rejected, either externally or by OCE edits, are ignored.
12. Both the associated $\mathrm{E} / \mathrm{M}$ or C/C visit (APCs 604-616, 617) and observation are paid separately if the criteria are met for separately payable observation.
13. If a " $T$ " procedure occurs on the day of or the day before observation, the observation is packaged.
14. Multiple observations on a claim are paid separately if the required criteria are met for each one.
15. If there are multiple observations within the same time period and only one meets the criteria for separate APC payment, the observation with the most hours is considered to have met the criteria, and the other observations will be packaged.
16. Observation date is assumed to be the date admitted for observation
17. The diagnoses (patient's reason for visit or principal) required for the separately payable observation criteria are:

| Chest Pain | Asthma | CHF |
| :--- | :--- | :--- |
| $\underline{4110,1,81,89}$ | $\underline{49301,02,11,12,21,22,91,92}$ | 3918 |
| $\underline{4130,1,9}$ |  | 39891 |
| $\underline{78605,50,51,52,59}$ |  | $\underline{40201,11,91}$ |
|  |  | $\underline{40401,03,11,13,91,93}$ |
|  |  | $\underline{4280}, 1,9,20-23,30-33,40-43$ |

18. The APCs required for the observation criteria to identify E/M or C/C visits are 604-616, 617.

## Appendix H-a (cont'd)

OCE Observation Criteria (v3.0-v8.3)

## Appendix H-b (cont'd) Direct Admission Logic

## Appendix H-c (cont'd) Extended Assessment \& Management Composite Criteria* [Effective v9.0]

*See appendix K for general rules and code lists.

## Appendix I [OPPS Only]

## Drug Administration (v6.0 - v7.3 only)

For each APC X subjected to Y maximum allowed units do the following (each day);

## Appendix J [OPPS Only] Billing for blood/blood products

## Appendix K Composite APC Assignment Logic

## LDR prostate brachytherapy and Electrophysiology/ablation composite APC assignment criteria:

a) If a 'prime' code is present with at least one non-prime code from the same composite on the same date of service, assign the composite APC and related status indicator to the prime code; assign status indicator N to the non-primary code(s) present.
-Assign units of service $=1$ to the line with the composite APC

- If there is more than one prime code present, assign the composite APC to the prime code with the lowest numerical value and assign status indicator N to the additional prime code(s) on the same day.
- Assign the indicated composite payment adjustment flag to the composite and all component codes present.
b) If the composite APC assignment criterion is not met, assign the standard APC and related SI to any/all component codes present.
c) Terminated codes (modifier 52 or 73 present) are ignored in composite APC assignment.

The component codes for the composite APC assignments are:

## 1. LDR Prostate brachytherapy composite

| Prime/Group A <br> code | Non-prime/Group B <br> codes | Composite APC |
| :--- | :--- | :--- |
| 55875 | 77778 | 8001 |

## 2. Electrophysiology/ablation composite

| Prime/Group A <br> codes | Non-prime/Group B <br> codes | Composite APC |
| :--- | :--- | :--- |
| 93619 | 93650 | 8000 |
| 93620 | 93651 |  |

## Appendix K (cont'd)

## Composite APC Assignment Logic

## Extended Assessment and Management Composite APC rules:

## (See appendix H-c for flowchart):

a) If the criteria for the composite APC are met, the composite APC and its associated SI are assigned to the prime code (visit or critical care).
b) Only one extended assessment and management APC is assigned per claim.
c) If the criteria are met for a level I and a level II extended assessment and management APC, assignment of the level II composite takes precedence.
d) If multiple qualifying prime codes (visit or CC) appear on the day of or day before G0378, assign the composite APC to the prime code with the highest separately paid payment rate; assign the standard APC to any/all other visit codes present.
e) Visits not paid under an extended assessment and management composite are paid separately.

Exception: Code G0379 is always packaged if there is an extended assessment and management APC on the claim.
f) The SI for G0378 is always N .
g) Level I and II extended assessment and management composite APCs have $\mathrm{SI}=\mathrm{V}$ if paid.
h) The logic for extended assessment and management is performed only for bill type $13 x$, with or without condition code 41.
i) Hours/units of service for observation (G0378) must be at least 8 or the composite APC is not assigned.
j) If a "T" procedure occurs on the day of or day before observation, the composite APC is not assigned.
k) Assign units of service $=1$ to the line with the composite APC.
l) Assign the composite payment adjustment flag to the visit line with the composite APC and to the G0378.
m) If the composite APC assignment criteria are not met, apply regular APC logic for separately paid items, special logic for G0379 and the SI for G0378 $=$ N.

## Level II Extended Assessment and Management criteria:

a) If there is at least one of a specified list of critical care or emergency room visit codes on the day of or day before observation (G0378), assign the composite APC and related SI to the critical care or emergency visit code.
b) Additional emergency or critical care visit codes (whether or not on the prime list) are assigned to their standard APCs for separately paid items.

| Prime/List A codes | Non-prime/List B code | Composite APC |
| :--- | :--- | :--- |
| 99284, 99285, 99291 | G0378 | 8003 |

## Appendix K (cont'd)

## Level I Extended Assessment and Management criteria:

a) If there is at least one of a specified list of prime clinic visit codes on the day of or day before observation (G0378), or code G0379 is present on the same day as G0378, assign the composite APC and related status indicator to the clinic visit or direct admission code.
b) Additional clinic visit codes (whether or not on the prime list) are assigned to their standard APCs for separately paid items.
c) Additional G0379, on the same claim, are assigned $\mathrm{SI}=\mathrm{N}$.

| Prime /List A codes | Non-prime/List B code | Composite APC |
| :--- | :--- | :--- |
| $99205,99215, \mathrm{G} 0379$ | G0378 | 8002 |

Separate Direct Admit (G0379) Processing Logic
(See appendix H-b for flowchart):
a) Code G0378 must be present on the same day
b) No SI = T, E/M, or C/C visit on the same day
c) Code G0379 may be paid under the composite 8002, paid under APC 604, or packaged with SI $=\mathrm{N}$.

## Appendix L OCE overview

1. If claim from/through dates span more than one day, subdivide the line items on the claim into separate days based on the calendar day of the line item service date.

## For claims with OPPS flag = "1":

2. Assign the default values to each line item in the APC/ASC return buffer.

The default values for the APC return buffer for variables not transferred from input, or not pre-assigned, are as follows:

| Payment APC/ASC | 00000 |
| :--- | :--- |
| HCPCS APC | 00000 |
| Status indicator | W |
| Payment indicator | 3 |
| Discounting formula number | 1 |
| Line item denial or rejection flag | 0 |
| Packaging flag | 0 |
| Payment adjustment flag | 0 |
| Payment method flag | Assigned in steps 8, 20 and 21 |

3. If no HCPCS code is on a line item and the revenue code is from one of four specific lists, then assign the following values to the line item in the APC return buffer.

|  | N-list | E-list | B-list | F-list |
| :--- | :--- | :--- | :--- | :--- |
| HCPCS APC | 00000 | 00000 | 00000 | 00000 |
| Payment APC: | 00000 | 00000 | 00000 | 00000 |
| Status Indicator: | N | E | B | F |
| Payment Indicator | 9 | 3 | 3 | 4 |
| Packaging flag: | 1 | 0 | 0 | 0 |

If there is no HCPCS code on a line, and the revenue center is not on any of the specified lists, assign default values as follows:

| HCPCS APC | 00000 |
| :--- | :--- |
| Payment APC: | 00000 |
| Status Indicator: | $\mathbf{Z}$ |
| Payment Indicator | 3 |
| Packaging flag: | 0 |

If the HCPCS code is invalid, or the revenue code is invalid and the HCPCS is blank, assign default values as follows:

| HCPCS APC | 00000 |
| :--- | :--- |
| Payment APC: | 00000 |
| Status Indicator: | $\mathbf{W}$ |
| Payment Indicator | 3 |
| Packaging flag: | 0 |

4. If applicable based on Appendix F, assign HCPCS APC in the APC/ASC return buffer for each line item that contains an applicable HCPCS code.
5. If procedure with status indicator "C" and modifier CA is present on a claim and patient status $=20$, assign payment APC 375 to "C" procedure line and set the discounting factor to 1 . Change SI to " N " and set the packaging flag to 1 for all other line items occurring on the same day as the line item with status indicator "C" and modifier CA. If multiple lines, or one line with multiple units, have SI = C and modifier CA, generate edit 60 for all lines with $\mathrm{SI}=\mathrm{C}$ and modifier CA.

## Appendix L OCE Overview (cont'd)

6. If edit 18 is present on a claim, generate edit 49 for all other line items occurring on the same day as the line item with edit 18, and set the line item denial or rejection flag to 1 for each of them. Go to step 17 .
7. If all of the lines on the claim are incidental, and all of the line item action flags are zero, generate edit 27. Go to step 17 .
8. If the line item action flag for a line item has a value of 2 or 3 then reset the values of the Payment APC and HCPCS APC to 00000, and set the payment method flag to 4 . If the line item action flag for a line item has a value of 4 , set the payment method flag to 0 . Ignore line items with a line item action flag of 2,3 or 4 in all subsequent steps.
9. If bill type is $13 x$ and condition code $=41$, or type of bill $=76 x$, apply partial hospitalization logic from Appendix C. Go to step 11.
10. If bill type is $12 \mathrm{x}, 13 \mathrm{x}$ or 14 x without condition code 41 apply mental health logic from Appendix
11. Apply general composite logic from appendix K (APCs 8000, 8001)
12. If bill type is $13 x$, apply Extended Assessment and Management composite logic from appendix H-c and Direct Admission for Observation logic from Appendix H-b.
13. If code is on the "sometimes therapy" list, reassign the status indicator to A, APC 0 when there is a therapy revenue code or a therapy modifier on the line.
14. Apply special packaging logic (T-packaged followed by STVX-packaged).
15. If the payment APC for a line item has not been assigned a value in step 9 thru 14, set payment APC in the APC return buffer for the line item equal to the HCPCS APC for the line item.
16. If edits $9,13,19,20,21,28,39,40,45,47,49,53,64,65,67,68,69,76$ are present in the edit return buffer for a line item, the line item denial or rejection flag for the line item is set to 1 .
17. Compute the discounting formula number based on Appendix D for each line item that has a status indicator of "T", a modifier of 52 , 73 or 50 , or is a non type " $T$ " bilateral procedure, or is a non-type "T" procedure with modifier 52 or 73. Note: If the SI or APC of a code is changed during claims processing, the newly assigned SI or APC is used in computing the discount formula. Line items that meet any of the following conditions are not included in the discounting logic.

Line item action flag is 2,3 , or 4
Line item rejection disposition or line item denial disposition in the APC/ASC return buffer is 1 and the line item action flag is not 1
Packaging flag is not 0 or 3
18. If the packaging flag has not been assigned a value of 1 or 2 in previous steps and the status indicator is " N ", then set the packaging flag for the line item to 1 .
19. If the submitted charges for HCPCS surgical procedures ( $\mathrm{SI}=\mathrm{T}$, or $\mathrm{SI}=\mathrm{S}$ in code range 10000-69999) is less than $\$ 1.01$ for any line with a packaging flag of 0 , then reset the packaging flag for that line to 3 when there are other surgical procedures on the claim with charges greater than $\$ 1.00$.

## Appendix L

OCE Overview (cont'd)
20. For all bill types where APCs are assigned, apply drug administration APC consolidation logic from appendix I. (v6.0 - v7.3 only)
21. Set the payment adjustment flag for a line item based on the criteria in Appendix G and Appendix J.
22. Set the payment method flag for a line item based on the criteria in Appendix E(a). If any payment method flag is set to a value that is greater than zero, reset the HCPCS and Payment APC values for that line to '00000'.
23. If the line item denial or rejection flag is 1 or 2 and the payment method flag has been set to 2 in the previous step, reset the payment method flag to 3 .

## For claims with OPPS flag = "2":

2. Set Non-OPPS bill type flag as applicable, based on the presence or absence of ASC procedures.

## Appendix M

## Summary of Modifications

The modifications of the OCE for the July 2008 release (V9.2) are summarized in the attached table.
Readers should also read through the specifications and note the highlighted sections, which also indicate change from the prior release of the software.

Some OCE modifications in the release may also be retroactively added to prior releases. If so, the retroactive date will appear in the 'Effective Date' column.

|  | Mod. <br> Type | Effective <br> Date | Edit |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  |  |  | Modify the software to maintain/retain 28 prior quarters (7 years) of programs \& codes in each <br> release. Remove older versions with each release. <br> (The earliest version date included in the July 2008 release will be 4/1/01). |
| 1. | Logic | $7 / 1 / 08$ | 24 | 50 |
| 2. | Logic | $7 / 1 / 08$ | 50 | Change disposition for edit 50 to RTP. |
| 3. | Logic | $\mathbf{4 / 1 / 0 1}$ |  | Ignore denied or rejected lines in PHP processing and Daily MH assignment criteria |

| 1 | Content |  |  | Make HCPCS/APC/SI changes as specified by CMS |
| :--- | :--- | :--- | :--- | :--- |
| 2 | Content |  | 19,20, <br> 39,40 | Implement version 14.1 of the NCCI file, removing all code pairs which include Anesthesia (00100- <br> $01999), ~ E \& M ~(92002-92014, ~ 99201-99499), ~ o r ~ M H ~(90804-90911) . ~$ |
| 3 | Content | $\mathbf{1 / 1 / 0 8}$ | 17 | Remove codes 92621 and 92627 from the Inherently bilateral list - change bilateral indicator to ‘ 0 '. |
| 4 | Content | $7 / 1 / 08$ | 15 | Change all max units to zero for all codes that currently have max unit values other than zero. |
| 5 | Content | $\mathbf{1 / 1 / 0 8}$ | 78 | Update nuclear medicine/radiopharmaceutical edit requirements |
| 6 | Content | $7 / 1 / 08$ | $71 / 77$ | Update procedure/device \& device/procedure edit requirements |
| 7 | Content | $7 / 1 / 08$ | 22 | Add new modifier CG ("Policy criteria applied") to the valid modifier list. |
| 8 | Doc |  |  | Documented some 'general programming notes' that were in effect but not previously documented |
| 9 | Doc |  |  | Documented the exclusion of denied or reject lines from composite criteria |
| 10 | Doc | $\mathbf{1 / 1 / 0 8}$ | 68 | Implement mid-quarter activation date for specified G codes <br> (Apply to G0398, G0399, G0400 if DOS is before 3/13/08). |
| 11 | Doc |  |  | Create a 508 Compliant version of the document (modify as necessary) - for publication on CMS <br> website |

## Appendix $\mathbf{N}$

## Code Lists Referenced in this Document

## A. HCPCS Codes for Reporting Antigens, Vaccine Administration, Splints, and Casts

| Category | Code |
| :---: | :--- |
| Antigens | $95144,95145,95146,95147,95148,95149,95165,95170,95180,95199$ |
| Vaccine <br> Administration | 90471,90472, G0008, G0009 |
| Splints | $29105,29125,29126,29130,29131,29505,29515$ |
| Casts | $29000,29010,29015,29020,29025,29035,29040,29044,29046,29049,29055,29058$, <br> $29065,29075,29085,29086,29305,29325,29345, ~ 29355, ~ 29358, ~ 29365, ~ 29405, ~ 29425, ~$ <br> $29435,29440, ~ 29445, ~ 29450, ~ 29700, ~ 29705, ~ 29710, ~ 29715, ~ 29720, ~ 29730, ~ 29740, ~ 29750, ~$ <br> 29799 |

## B. Partial Hospitalization Services

| PHP List A | PHP List B |

|  | 96120 |
|  | G0129 |
|  | G0176 |
|  | G0177 |

[^0]:    ${ }^{1}$ For edit 15, units for all line items with the same HCPCS on the same day are added together for the purpose of applying the edit. If the total units exceeds the code's limits, the procedure edit return buffer is set for all line items that have the HCPCS code. If modifier 91 is present on a line item and the HCPCS is on a list of codes that are exempt, the unit edits are not applied.
    ${ }^{2}$ Edit 18 causes all other line items on the same day to be line item denied with Edit 49 (see APC/ASC return buffer "Line item denial or reject flag"). No other edits are performed on any lines with Edit 18 or 49.
    ${ }^{3}$ If Edit 27 is triggered, no other edits are performed on the claim.
    ${ }^{4}$ Not applicable for patient's reason for visit diagnosis
