

Tropical Products: World Markets and Trade

**World Coffee Production in 2006/07
Revised Up 4.9 Million Bags**

*Forecast

**World Coffee Exports in 2006/07
Revised Upward from June Forecast**

*Forecast

World coffee production in 2006/07 is forecast at 128.6 million bags (60 kilograms or 132.276 pounds), up 4.9 million bags from the first forecast made in June, and up 14.9 million bags from the 2005/06 season. Brazil's coffee production in 2006/07 is now estimated at 46.5 million bags, up 1.7 million bags from the June 2006 forecast due to better-than-expected dehusking yields in some growing areas and up 10.4 million bags from 2005/06. Vietnam's coffee crop for 2006/07 is now estimated at 16.5 million bags, up 19 percent from the June forecast, as better weather and growing conditions promote higher yields and newer cultivation comes to maturity. Colombia's coffee production in 2006/07 was increased 600,000 bags from the June forecast. Indonesia's coffee production for 2006/07 was raised to 7.1 million bags, up 230,000 bags from the June forecast.

World coffee exports in 2006/07 are forecast to increase by nearly 10 percent or 8.5 million bags from last year's revised level. Brazil's total exports of coffee in 2006/07 are forecast at 27.0 million bags, a decrease of about 750,000 bags from the June forecast. However, that level represents a 10-percent rise from the 2005/06 level. Vietnam's exports of coffee in 2006/07 are estimated at 15.3 million bags, up 2.4 million bags from 2005/06. World coffee stocks at the end of 2006/07 are forecast at 23.0 million bags, up from the low level of 2005/06. Ending stocks in 2005/06 are estimated at 19.8 million bags, historically low levels.

Coffee Updates

Summary

World coffee production in 2006/07 is forecast at 128.6 million bags (60 kilograms or 132.276 pounds), up 4.9 million bags from the first forecast made in June, and up 14.9 million bags from the 2005/06 season. Brazil's coffee production in 2006/07 is now estimated at 46.5 million bags, up 1.7 million bags from the June 2006 forecast due to better-than-expected dehusking yields in some growing areas and up 10.4 million bags from 2005/06. Vietnam's coffee crop for 2006/07 is now estimated at 16.5 million bags, up 19 percent from the June forecast, as better weather and growing conditions promote higher yields and newer cultivation comes to maturity. Colombia's coffee production in 2006/07 was increased 600,000 bags from the June forecast. Indonesia's coffee production for 2006/07 was raised to 7.1 million bags, up 230,000 bags from the June forecast.

As a result of the higher production levels, total coffee supply in producing countries in 2006/07 is forecast at 151.0 million bags, up 4.1 million bags from the June forecast and up 12.7 million bags from the revised 2005/06 level.

World coffee exports in 2006/07 are forecast to increase by nearly 10 percent or 8.5 million bags from last year's revised level. Brazil's total exports of coffee in 2006/07 are forecast at 27.0 million bags, a decrease of about 750,000 bags from the June forecast. However, that level represents a 10-percent rise from the 2005/06 level. Vietnam's exports of coffee in 2006/07 are estimated at 15.3 million bags, up 2.4 million bags from 2005/06. World coffee stocks at the end of 2006/07 are forecast at 23.0 million bags, up from the low level of 2005/06. Ending stocks in 2005/06 are estimated at 19.8 million bags, historically low levels.

World coffee consumption in 2005/06 is estimated at 119.0 million bags, up less than 1 percent from the preliminary 2004/05 level—about 87.9 million bags in importing countries and 31.1 million bags in exporting countries. Although USDA does not maintain an official database for importing and consuming countries, world consumption is calculated using the information that is available. World consumption can be estimated based on net exports from producing countries, the change in major importers' stock levels, plus consumption in producer countries. Exports from producing countries are assumed to be consumed in the importing countries, after adjusting for changes in the stock levels in the importing countries.

United States

U.S. coffee stocks at the end of October 2006 totaled 5.2 million bags, up 23,314 bags from the September 30, 2006, level.

1/ Coffee marketing year begins October in some countries and April or July in others. Exportable production represents total harvested production minus estimated domestic consumption. Countries with the result of zero (0) may indicate domestic consumption equal to production or a country that imports more coffee than they export, in which case they are not regarded as having exportable production. 2/ One bag = 132.276 pounds. Green Bean Equivalent.

Note: The United States includes Puerto Rico and Hawaii.
