

Important Information About your OHP pharmacy benefits

You may have recently received a second DMAP Medical Care ID for October 2007. It does not show a DMAP Pharmacy listing in the Managed Care/TPR field (8a). If you previously had a pharmacy listed there and it's now blank, this means you have been removed from the Oregon Health Plan (OHP) Pharmacy Management Program.

**You still have prescription
drug coverage**

Pharmacy Management Program

The Pharmacy Management Program limits where OHP clients may get their OHP prescriptions filled.

If you are in the program, your DMAP Medical Care ID shows one drugstore (or brand of drugstore) where you can get OHP prescriptions filled. That's in Field 8a, called Managed Care/TPR on the ID.

When you are not in the Pharmacy Management Program, you may fill prescriptions at any pharmacy that takes DMAP Medical IDs.

In January you may again be assigned to the Pharmacy Management Program based on your prescription usage and other information.

This Means

- You still have the same OHP coverage for prescription drugs.
- You are not restricted to using one pharmacy right now.
- You may use your DMAP Medical ID at any pharmacy that accepts OHP clients.

We apologize for the confusion the new Medical Care ID may have caused.

If you have trouble filling a prescription

If a pharmacy refuses to fill a prescription for you, have them call to verify that you are still eligible for OHP pharmacy benefits. Your pharmacist knows the number to call.

Questions?

- ☎ Contact the DMAP Client Services Unit at 1-800-273-0557 if you have questions about this letter.
- ☎ **Contact your OHP worker** if you need this notice in a larger print size or in a different format.
