

The number of Part I offenses known to law enforcement agencies throughout the United States decreased 0.2 percent during 2002 when compared to the figures reported during 2001. The violent crime category, which includes murder, forcible rape, robbery, and aggravated assault, decreased 1.4 percent. Overall, property crime, consisting of the offenses of burglary, larceny-theft, and motor vehicle theft, remained virtually the same when compared to the 2001 figure. The Modified Crime Index is the sum of the Part I offenses including arson. Data for arson are not included in the total property crime.

The trends for the Crime Index presented in Tables 1 and 2 indicate the percent change in offenses known to law enforcement for the calendar year 2002 as compared to those in 2001. The trends for the Crime Index illustrated in Table 3 indicate the percent change in offenses known to law enforcement for the calendar years indicated. Table 4 presents a two-year comparison of offenses known to law enforcement for cities 100,000 and more in population for the calendar years 2002 and 2001. The figures reflecting the offenses from the events of September 11, 2001, are not included in the trend data.

¹Complete arson data for 2001 and/or 2002 are not available.

²Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police are not in accordance with national UCR guidelines. Therefore, the figures are excluded from the forcible rape, Crime Index, and Modified Crime Index categories.

³Due to changes in reporting practices and/or incomplete data, figures are not comparable to previous years' data.

⁴Complete January through December data for 2001 are not available.

⁵The 2001 murder and nonnegligent homicide figure does not include the 2,792 homicides reported as a result of the terrorist attack of the World Trade Center on September 11, 2001.

⁶The 2001 data for anthrax assaults are not available.

NOTE: Trends in all tables of this report are based on the volume of crime reported by comparable units. Agency reports which are determined to be influenced by change in reporting practices for all or specific offenses or by annexations are removed from trend tables. All 2002 figures are preliminary. Final figures and crime rates per unit of population will be published in *Crime in the United States, 2002* scheduled to be released in the fall of 2003.

PLEASE NOTE

Figures used in this report are submitted voluntarily by law enforcement agencies throughout the country. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities because many factors affect the amount and type of crime from place to place. Some of these factors are listed in the annual publication *Crime in the United States*. More valid use can be made of these figures by determining deviations from national averages and by comparing averages for cities in similar population groups (Table 1). It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control. Data users can obtain assistance by calling 304-625-4995.

Data users are cautioned against comparing crime trends presented in this report with those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results. The Department of Justice's fact sheet, *The Nation's Two Crime Measures*, contains a detailed description of the NCVS and Uniform Crime Reports.
