

Wisconsin 2007 Honey Yield and Production Slips

Honey production from producers with 5 or more colonies in Wisconsin totaled 5.04 million pounds in 2007, a decrease of 15 percent from 2006. The number of honey producing colonies in the state dropped from 64,000 colonies last year to 60,000 colonies this year. This number does not include those producers with less than 5 colonies or those who did not harvest honey. Yield per colony averaged 84 pounds, a decrease of 9 pounds per colony from the previous year. The state's rank in honey production for 2007 was eighth, one spot lower than last year.

On December 15, 2007, producer honey stocks in Wisconsin were 3.02 million pounds, an increase of 21 percent from 2006. Wisconsin's 2007 honey crop was valued at \$5.80 million, down 15 percent from last year's \$6.79 million. The average price for a pound of honey in Wisconsin was \$1.15, up 1 cent from the previous year. State level honey prices reflect the portions of honey sold through retail, co-op, and private channels.

National honey production in 2007 was 148 million pounds, a decrease of 4 percent from 2006. There were 2.44 million honey producing colonies in the U.S., up 2 percent from 2.39 million last year. The average yield fell 6 percent to 60.8 pounds per colony. On December 15, 2007, honey producers held 52.5 million pounds in stock, down 13 percent from last year.

Honey prices in the U.S. averaged \$1.03 per pound in 2007. This is down slightly from a year ago. Prices are based on retail sales by producers and sales to private processors and cooperatives.
