

CRUISE REPORT

Cruise Number: MF94-06  
FOCI Number: FOCI 6MF94

NOAA Ship: Miller Freeman  
Area of Operations: Western Gulf of Alaska

Itinerary:  
Departed Larsen Bay, May 22, 1994  
Arrived Kodiak, June 2, 1994

Participating Organizations

Alaska Fisheries Science Center (AFSC)  
Pacific Marine Environmental Laboratory (PMEL)

Chief Scientist:

Mike Canino AFSC

Personnel

	Affiliation
Matt Wilson	AFSC
Steve Porter	AFSC
Art Kendall	AFSC
Susan Picquelle	AFSC
Kathy Mier	AFSC
Mike Canino	AFSC
Dan Dougherty	PMEL
Leslie Lawrence	PMEL

Objectives of Cruise: (1) To continue acquisition of long-term biological and physical time series; (2) to conduct a survey of walleye pollock larvae for use in estimating distribution, drift, and mortality rates; (3) to collect samples of pollock larvae for studies on growth and condition; (4) service two moorings and retrieve one mooring.

Summary of Cruise

Cruise MF94-06 departed from Larsen Bay on schedule and proceeded to FOCI Line 8. Oceanographic mooring #9402 was recovered, mooring # 9401 failed to respond to acoustic signals and was not recovered. Standard hydrographic and biological sampling was conducted at FOCI Line 8. The larval survey then proceeded southwest along the Alaska peninsula, occupying inshore stations along FOCI grid lines B and D to the Shumagin islands. Sampling then proceeded northeasterly to Chirikof island. Preliminary estimates of larval pollock abundance and satellite drifter tracks indicated that the main 'patch' of larvae, identified during cruise MF94-05, had moved southwest and now occupied a position along the central axis of the sampling grid.

FOCI Lines 16 and 17 were occupied for standard hydrographic and biological sampling. In addition, several live tows were used to collect gut content samples of pollock larvae in the area. Mooring #9443 was then recovered from its location near Sutwik island. A CTD chlorophyll calibration cast and triplicate CalVET tows were conducted at the mooring site.

The larval survey continued northeasterly to encompass the remaining FOCI grid stations. Inshore stations along Wide Bay and Puale Bay, in addition to FOCI grid lines 33 and 35, were sampled for larval abundance. A final unsuccessful search pattern for mooring #9401 was executed prior to return to Kodiak.

No delays were experienced due to weather or equipment failure. CMDR. R. Palowski, LTCMDR. D. Seem, and LT. Scott Hill provided quality, professional service throughout the cruise..
