Wheat	Bu	60	27.2	

The above table on weights, measures and conversion factors covers crops included in the North Dakota Agricultural Statistics estimating program. The information has been assembled from state schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight at harvest has been used.
