## **Preface**

This reference booklet provides significant summary information about health expenditures and Centers for Medicare & Medicaid Services (CMS) programs. The information presented was the most current available at the time of publication. Significant time lags may occur between the end of a data year and aggregation of data for that year.

The data are organized as follows:

Highlights - Growth in CMS Programs	Page
and Health Expenditures	1
I. Populations	5
II. Providers/Suppliers	15
III. Expenditures	23
IV. Utilization	33

### Highlights

# Growth in CMS programs and health expenditures

#### **Populations**

- Persons enrolled for Medicare coverage increased from 19.1 million in 1966 to a projected 42.1 million in 2005, a 120 percent increase.
- On average, the number of Medicaid enrollees in 2005 is estimated to be about 44.7 million, the largest group being children (21.7 million or 48.5 percent).
- In 2002, 17.9 percent of the population was enrolled in the Medicaid program.
- Medicare enrollees with end-stage renal disease increased from 66.7 thousand in 1980 to 359.4 thousand in 2004, an increase of 439 percent.
- Medicare State buy-ins have grown from about 2.8 million beneficiaries in 1975 to 6.3 million beneficiaries in 2003, an increase of about 122 percent.

 About 7.2 million persons on average were dually eligible for both Medicare and Medicaid in FY 2002.

#### **Providers/Suppliers**

- The number of inpatient hospital facilities decreased from 6,770 in December 1975 to 6,117 in December 2004. Total inpatient hospital beds have dropped from 46.5 beds per 1,000 enrolled in 1975 to 22.9 in 2004, a decrease of 51 percent.
- The total number of Medicare certified beds in shortstay hospitals showed a steady increase from less than 800,000 at the beginning of the program and peaked at 1,025,000 in 1984-86. Since that time, the number has dropped to 821,000. (NOTE: A portion of this decline is due to the reclassification of some short-stay hospitals as critical access hospitals.)
- The number of psychiatric hospitals grew to about 400 by 1976, where it remained until the start of the prospective payment system (PPS) in 1983. After PPS, the number increased to over 700 in the early 1990's and has since dropped to 470.
- The number of skilled nursing facilities (SNFs) increased rapidly during the 1960s, decreased during the first half of the 1970s, generally increased thereafter to over 15,000 in the late 1990's and again decreased, reaching 14,986 in 2004.
- The number of participating home health agencies has fluctuated considerably over the years, most recently almost doubling in number from 1990 to almost 11,000 in 1997, when the Balanced Budget Act was passed.

The number decreased sharply but has since stablized, reaching 7,519 in 2004.

#### **Expenditures**

- National health expenditures were \$1,678.9 billion in 2003, 15.3 percent of the gross domestic product.
- In 2004, total net Federal outlays for CMS programs were \$449.9 billion, 19.6 percent of the Federal budget.
- Medicare skilled nursing facility benefit payments increased from \$15.7 billion in 2004 to \$17.0 billion in 2005.
- Medicare home health agency benefit payments increased slightly between 2004 and 2005 from \$10.5 billion to \$12.5 billion.
- National health expenditures per person were \$205 in 1965 and grew steadily to reach \$5,670 by 2003.

#### Utilization of Medicare and Medicaid services

- Between 1990 and 2003, the number of short-stay hospital discharges increased from 10.5 million to 12.7 million, an increase of 21 percent.
- The short-stay hospital average length of stay decreased significantly from 9.0 days in 1990 to 5.9 days in 2003, a decrease of 34 percent. Likewise, the average length of stay for excluded units decreased significantly from 19.5 days in 1990 to 11.5 days in 2003, a decrease of 41 percent.

- About 31.8 million persons received a reimbursed service under Medicare fee-for-service during 2002.
   Comparably, almost 46 million persons used Medicaid services or had a premium paid on their behalf in 2002.
- The ratio of Medicare aged users of any type of covered service has grown from 367 per 1,000 enrolled in 1967 to 918 per 1,000 enrolled in 2002.
- 7.4 million persons received reimbursable fee-forservice inpatient hospital services under Medicare in 2002.
- 31.0 million persons received reimbursable fee-forservice physician services under Medicare during 2002. 21.0 million persons received reimbursable physician services under Medicaid during 2002.
- 23.0 million persons received reimbursable fee-forservice outpatient hospital services under Medicare during 2002. During 2002, 14.2 million persons received Medicaid reimbursable outpatient hospital services.
- Over 1.6 million persons received care in SNFs covered by Medicare during 2002. 1.5 million persons received care in nursing facilities, which include SNFs and all other nursing facilities other than mentally retarded, covered by Medicaid during 2002.
- 23.9 million persons received prescribed drugs under Medicaid during 2002.

# **Populations**

#### Information about persons covered by Medicare, Medicaid, or SCHIP

For Medicare, statistics are based on persons enrolled for coverage. Historically, for Medicaid, recipient (beneficiary) counts were used as a surrogate of persons eligible for coverage, as well as for persons utilizing services. Current data systems now allow the reporting of total eligibles for Medicaid and for SCHIP. Statistics are available by major program categories, by demographic and geographic variables, and as proportions of the U.S. population. Utilization data organized by persons served may be found in the Utilization section.

NOTES: Some totals for 1990 and later years may not equal the sum of categories because of rounding. Aged and Blind/Disabled eligibility groups include Qualified Medicare Beneficiaries (QMB) and Specified Low-Income Medicare Beneficiaries (SLMB). Children and Adult groups include both AFDC/TANF and poverty level recipients who are not disabled. Projections for fiscal years 2003-2005 were prepared by the Office of the Actuary for the President's 2006 budget.

In 1997, the Other Title XIX category was dropped and the enrollees therein were subsumed in the remaining categories. Medicaid data after 2001 exclude enrollees in outlying territories and possessions.

# **Expenditures**

Information about spending for health care services by Medicare, Medicaid, SCHIP, and for the Nation as a whole

Health care spending at the aggregate levels is distributed by source of funds, types of service, geographic area, and broad beneficiary or eligibility categories. Direct out-ofpocket, other private, and non-CMS-related expenditures are also covered in this section. Expenditures on a perunit-of-service level are covered in the Utilization section.

### **Utilization**

# Information about the use of health care services

Utilization information is organized by persons receiving services and alternately by services rendered. Measures of health care usage include: persons served, units of service (e.g., discharges, days of care, etc.), and dimensions of the services rendered (e.g., average length of stay, charge per person or per unit of service). These utilization measures are aggregated by program coverage categories, provider characteristics, type of service, and demographic and geographic variables.

# Medicaid/financing

- 1. Federal contributions (ranging from 50 to 77.08 percent for fiscal year 2005)
- 2. State contributions (ranging from 22.92 to 50 percent for fiscal year 2005)

<sup>1</sup>The Omnibus Reconciliation Act of 1993 eliminated the Annual Maximum Taxable Earnings amounts for 1994 and later. For these years, the contribution rate is applied to all earnings in covered employment.

<sup>2</sup>Premium paid for voluntary participation of individuals aged 65 and over not otherwise entitled to hospital insurance and certain disabled individuals who have exhausted other entitlement. A reduced premium of \$189 is available to individuals aged 65 and over who are not otherwise entitled to hospital insurance but who have, or whose spouse has or had, at least 30 quarters of coverage under Title II of the Social Security Act.
