U.S. Department of Agriculture Animal and Plant Health Inspection Service Plant Protection and Quarantine 4700 River Road, Unit 133 Riverdale, Maryland 20737

ENTRY STATUS OF SEEDS FOR PLANTING - SUMMARY Revised May, 2006

General information for all types of seeds

Pulp: Seeds for planting, except from Canada, must be free from pulp.

<u>Phytosanitary Certification</u>: Shipments of imported seed from all origins other than Canada require a phytosanitary certificate from the country of origin, except as noted in the section below for small lots of seed. For Canadian seed, a seed analysis certificate (PPQ form 925 or CFIA form 5289) may be used in lieu of a phytosanitary certificate. One certificate per lot is required.

<u>Small lots of seed:</u> Lots of seed may be imported without a phytosanitary certificate under the following conditions:

- (1) The importation of the seed is authorized by a written permit.
- (2) The seed is not of any prohibited genus; is not of any Federal noxious weed; does not require an additional declaration on a phytosanitary certificate; does not require treatment; is not a parasitic plant; is not genetically modified; and if a field crop or vegetable seed, it meets the requirements of the Federal Seed Act import provisions.
- (3) The seed meets the following packaging and shipping requirements:
 - (i) Each seed packet is clearly labeled with the name of the collector/shipper, the country of origin, and the scientific name at least to the genus, and preferably to the species, level;
 - (ii) There are a maximum of 50 seeds of 1 taxon (taxonomic category such as genus, species, cultivar, etc.) per packet; or a maximum weight not to exceed 10 grams of seed of 1 taxon;
 - (iii) There are a maximum of 50 seed packets per shipment;
 - (iv) The seeds are free from pesticides;
 - (v) The seeds are securely packaged in packets or envelopes and sealed to prevent spillage;
 - (vi) The shipment is free from soil, plant material other than seed, other foreign matter or debris, seeds in the fruit or seed pod, and living organisms such as parasitic plants, pathogens, insects, snails, mites; and
 - (vii) At the time of importation, the shipment is sent to either the Plant Germplasm Quarantine Center in Beltsville, MD, or an approved port of entry listed in the permit.

Coated or pelleted seed: Obscured seed is prohibited because it cannot be inspected. Commercial seed shipments otherwise allowed entry to the United States without treatment or other restrictions will be considered for entry under the following protocol. Importers must submit a permit application (PPQ form 587), a statement from Plant Protection Organization of the country of origin stating the name of the sampling officials, a phone and fax number for the sampling official, and a letter from the sampling official stating that the sampling will be done according to International Seed Testing Association requirements. If approved, authorized samplers will draw an official seed sample from each lot before the seed is processed in the country of origin. The sealed sample will accompany the shipment of coated or pelleted seed for inspection by PPQ at the port of entry.

Additional information for field crop and vegetable seeds

Except as indicated in the small lots of seed provision above, and the special requirements section below, seeds in this category are enterable without a written permit. Seeds in this category are subject to the import provisions of the Federal Seed Act. Each lot must be accurately labeled as to kind, variety, origin, and lot designation. If the seed is treated, the declaration of labeling and each container must be further labeled. Inspectors will sample and inspect each lot of field crop and vegetable seed at the port of entry. If inspectors find noxious weeds or other pests, they may refuse admission or allow the seed to be cleaned or processed under supervision. Canadian-grown crop and vegetable seed must be accompanied by a Seed Analysis Certificate (PPQ form 925) in lieu of sampling.

See special requirements section below for certain kinds of field crop and vegetable seeds.

Additional information for flower and other herbaceous plant seeds (as distinguished from seeds of trees and shrubs)

Except as indicated in the small lots of seed provision above, and in the special requirements section below, seeds in this category are enterable without a written permit. However, all seeds in this category are subject to inspection and, if findings warrant, to such treatment needed to prevent the risks of pest introduction.

Prohibitions and special requirements for seeds in the above two categories:

Bamboo - all genera of the tribe Bambuseae- prohibited from all sources. **Broad Bean** (*Vicia faba*) - see Vetch.

Citrus family (Rutaceae), all members - enterable with written permit. Treatment required. Corn (Zea) and related genera (Coix, Chionachne, Echinochloa, Eleusine, Euchlaena, Miscanthus, Panicum, Pennisetum, Polytoca, Sclerachne, Setaria, Sorghum,

Trilobachne, Tripsacum.) - enterable from approved sources under written permit; prohibited from other sources. Write for details naming seeds, country of origin, and purpose of importation.

Cotton (*Gossypium*) - entry limited to certain ports and subject to fumigation. Written permit required.

Flatpea, roughpea, sweet pea or peavine (*Lathyrus* **spp.**) - enterable under written permit. Treatment required.

Hibiscus (*Hibiscus* spp.) - enterable under written permit. Treatment required.

Kenaf (Hibiscus cannabinus) - enterable under written permit. Treatment required.

Lentils (*Lens* **spp.**) - prohibited from South America. Enterable from other sources under written permit. Treatment required.

Niger (*Guizotia abyssinica*) – written permit and heat treatment required. Niger seed contains many noxious weeds and quarantine-significant seeds.

Okra (Abelmoschus spp.) - enterable under written permit. Treatment required.

Parasitic plants - prohibited except under plant pest permit.

Peanut (*Arachis* spp.) - prohibited from Burkino Faso, China, India, Indonesia, Ivory Coast, Japan, the Philippines, Senegal, Thailand, and Taiwan because of *peanut stripe virus*.

Potato true seeds (*Solanum tuberosum*) - prohibited from all sources except Canada, New Zealand, and Region of Chile.

Rice (*Oryza* **spp.**) - prohibited from all sources except from Mexico, which requires a written permit.

Soybeans (*Glycine max*) – must be free of leaves, stems, pods, soil peds.

Vetch (*Vicia* **spp.**) - enterable under written permit. Treatment required.

Weeds - Federal noxious weeds are prohibited except under plant pest permit. Refer to Federal noxious weed list at http://www.aphis.usda.gov/ppq/weeds/.

Wheat - (*Triticum, and relatives; e.g. Tritordeum, Tritosecale, Aegilops*)- prohibited entry from many sources. Write for details giving country of origin and purpose of importation.

Wild rice (Zizania spp.) - prohibited from all sources except Canada.

Additional information for woody plant seeds (trees, shrubs, palms and other plants of a woody nature).

Seeds in this category are generally enterable under a written permit, except for the following:

Avocado (*Persea* spp.) - prohibited from Mexico, Central America and South America.

Barberry (Berberis spp.), Mahonia, and Mahoberberis - prohibited from all sources.

Chestnut (*Castanea* spp.) - enterable under written permit with treatment required.

Coconut (*Cocos* **spp.**) - prohibited from all sources except Jamaica and Costa Rica. Written permit required from Jamaica and Costa Rica.

Coffee, unroasted (Coffea spp.) - prohibited from all sources into Hawaii and Puerto Rico;

enterable to other destinations.

Elm (*Ulmus* spp.) - prohibited from Europe; enterable under written permit from other sources. **Gooseberry** (*Ribes* spp.) - written permit required if destined to MA, NY, WV, WI.

Mango (*Mangifera* spp.) - Prohibited from all sources except Guimaras Islands (Republic of the Philippines) and North and South America (excluding Barbados, the British Virgin Islands, Dominica, French Guiana, Grenada, Guadeloupe, Martinique, St. Lucia St. Vincent and the Grenadines, and Trinidad and Tobago). Prohibition not applicable to seeds imported into Guam, Hawaii, and the Northern Mariana Islands.

Oak (Quercus spp.) - enterable under written permit. Treatment required.

Prunus spp. - because of plum pox disease, *Prunus* spp. other than *Prunus avium*, *P. cerasus*, *P. canescans*, *P. mahaleb*, *P. padus*, *P. serotina*, *P. serrula*, *P. serrulata*, *P. subhirtella*, *P. laurocerasus*, *P. virginiana*, *P. effusa*, *P. sargentii*, and *P. yedoensis* from Europe must be accompanied by a phytosanitary certificate declaring the seeds were produced in a nursery free of plum pox virus in Belgium, France, Federal Republic of Germany, the Netherlands, or Great Britain, and the seeds are free from plum pox virus based on testing of parent stock. Seeds of *Prunus* spp. susceptible to plum pox disease from all countries outside of Europe, Cyprus, Syria, and Turkey, must be accompanied by a phytosanitary certificate declaring the seeds were grown in the country specified on the certificate and plum pox virus does not occur in that country.

Rutaceae - enterable under written permit. Treatment required if from certain countries listed in CFR 319.37-6(e).

Weeds - Federal noxious weeds are prohibited except under plant pest permit. A few are woody plants. Refer to the Federal noxious weed list at http://www.aphis.usda.gov/ppq/weeds/.

Endangered Species

Some seeds are regulated by the Endangered Species Act (ESA) and Convention on International Trade in Endangered Species (CITES). If the seeds you want to import are not common species, contact the Permit Unit for a list of ESA- and CITES- regulated seeds.

Genetically Engineered Seeds

For the importation, interstate movement and environmental release of genetically engineered seeds, apply using APHIS Form 2000, Application for Permit.

Permit Information

For a written permit, submit a PPQ form 587 permit application. For a plant pest permit, submit a PPQ form 526.

Relevant Regulations
