Table 40.--	Roundwood products, logging residues, and other removals from growing-stock and other sources by species group, region, and subregion, 2006
Table 41.--	Weight of bark and wood residue from primary wood-using mills by type of material, species group, region, subregion, and type of use, 2006

These RPA 2007 national assessment tables are presented for public review. If you find errors or have questions about these tables please contact Pat Miles at pmiles@fs.fed.us or Brad Smith at bsmith12@fs.fed.us.

Your review guide:

- 1 When files are put in pdf, spacing often can fluctuate so don't worry about character spacing.
- 2 Do worry about misspellings, missing punctuation, incorrect titles or errant text.
- 3 Focus mainly on the data values - do they look reasonable, do they show something you think should not be there?
(i.e. pinyon juniper in Alaska or more timberland than there is forest land in a State)
- 4 Does something need a footnote for clarification?

NOTES:

- 1 Private ownership is now 'private corporate' and 'private non-coporate' and is shown only for 2007. Previous ownerships included 'forest industry' which can no longer be displayed due to disclosure issues.
- 2 Historic area data have been adjusted for the removal of chaparral as a forest cover [about 6 million acres]
- 3 Mississippi data in this report is for 1994. A post-Katrina inventory is now underway and a fact sheet flyer will be prepped for inclusion in final at a later date

DEPARTMENT OF AGRICULTURE

Forest Service

Forest Inventory and Analysis RPA Assessment tables

AGENCY: Forest Service, USDA.

ACTION: Notice of release of draft RPA assessment tables for public review

SUMMARY: The Forest Service Forest is releasing draft tables for the 2007 RPA Forest Resources of the United States document for public review. These tables will be the basis for analysis of status and trends in the nation's forests and includes data for 1953, 1977, 1987, 1997, and 2007. The public is encouraged to review and comment on these draft tables.

DATES: The public review period is 60 days following the date of this notice [insert date of publication in the FEDERAL REGISTER].

ADDRESSES: The draft review tables are available in pdf format at <http://fia.fs.fed.us>. Requests for additional information regarding the tables may be directed to Dr. Richard Guldin, Director, Quantitative Sciences Staff - Forest Service, Mail Stop 1119, Washington, DC 20090-6090; by electronic mail to SPPII@fs.fed.us; or by fax to (703) 605-5131. Documents are also available for inspection in the office of the Quantitative Sciences Staff at 1601 N. Kent Street, Arlington, VA, Suite 4110, between regular business hours of 8:30 a.m. and 4:30 p.m. Monday through Friday. To facilitate entrance into building, visitors are encouraged to call ahead (703-605-4177).

FOR FURTHER INFORMATION CONTACT: W. Brad Smith, Quantitative Sciences Staff by phone at (703) 605-4177 or by email to bsmith2@fs.fed.us.

SUPPLEMENTARY INFORMATION: Through its Research organization, the Forest Service conducts continuous Statewide inventories of the Nation's forest resources to ascertain trends in the extent, condition, ownership, quantity, and quality of the forest resources in compliance with Forest and Rangeland Renewable Resources Research Act of 1978 (16 U.S.C. 1600, 1641-1648). This information is collected by the Forest Inventory and Analysis (FIA) program and forest statistics and subsequent analyses are released as State, Regional, and National reports and are based on data collected at sample locations on all land ownerships across the United States. Every 5 years, the FIA program compiles a summary of this data into standard tables as part of the RPA Assessment' Forest Resources of the United States report.

Ann M. Bartuska
Deputy Chief, Research & Development

^a It is no longer possible to classify private forest as forest industry and nonindustrial private due to disclosure issues. The new classes are private corporate and non-corporate. Native American lands are included in private non-corporate.

Note: Data may not add to totals because of rounding.

^a Estimates for 1630, 1907 and 1938 include forest area for regions that would become the 50 States within the current United States. Estimates for 2007 and historic years have been adjusted for forest definition change to minimum 10% cover and removal of chaparral as a forest type- refer to 1997 RPA tables for historic estimates prior to this change.

^b Data for 1997 based on Smith et al. (2001). Adjusted for removal of chaparral type.

^c Data for 1987 based on Waddell et al. (1989). Adjusted for removal of chaparral type.

^d Data for 1977 based on USDA Forest Service (1982). Adjusted for removal of chaparral type.

^e Data for 1963 based on USDA Forest Service (1965). Adjusted for removal of chaparral type.

^f Data for 1953 based on USDA Forest Service (1958). Adjusted for removal of chaparral type.

^g Data for 1938 based on U.S. Congress (1938). Adjusted for removal of chaparral type.

^h Data for 1920 based on Capper Report. Adjusted for removal of chaparral type.

ⁱ Data for 1907 based on Kellogg (1909). Adjusted for removal of chaparral type.

^j Data for 1630 were also from Kellogg (1909) as an estimate of the original forest area based on the current estimate of forest and historic land clearing information. These data are provided here for general reference purposes only to convey the relative extent of the forest estate, in what is now the United States, at the time of European settlement.

Note: Data may not add to totals because of rounding.

^a Productivity classes are displayed as cubic feet per acre per year.

^b Poorly stocked reserved and other forest lands have insufficient data to determine a forest type.

Note: Data may not add to totals because of rounding.

^a Growing-stock volume cut or knocked down during harvest but left at the harvest site.

^b Wood volume other than growing stock cut or knocked down during harvest but left on the ground. This volume is net of wet rot or advanced dry rot, and excludes old punky logs; consists of material sound enough to chip; includes downed dead and cull trees, tops above the 4-inch growing-stock top, and smaller than 5 inches d.b.h.; excludes stumps and limbs.

^c Growing-stock volume removed by cultural operations or timberland clearing.

^d Wood volume other than growing stock removed by cultural operations or timberland clearing. This volume is net of wet rot or advanced dry rot, and excludes old punky logs; consists of material sound enough to chip; includes downed dead and cull trees, tops above the 4-inch growing-stock top, and smaller than 5 inches dbh; excludes stumps and limbs.

Note: Data may not add to totals because of rounding.
