

# Local Area Personal Income for 2001–2003

By David G. Lenze

**I**N 2003, local area personal income growth accelerated across the country, reflecting a quickening pace of recovery from the recession of 2001. Personal income in micropolitan areas grew 3.7 percent (up from 2.2 percent), while personal income in metropolitan areas grew 3.1 percent (up from 1.8 percent).

The latest estimates of personal income for local areas in 2003—in concert with employment and population growth estimates—shed new light on the nature of the recovery in its second year:

- Personal income grew strongly despite weak job growth or even job losses in many areas.
- Personal income in areas with a large military presence or large tourism, real estate, or motor vehicle manufacturing industries tended to grow the fastest.
- Personal income in areas with large air transportation, securities, information, or computer manufacturing industries tended to grow the slowest.

- Personal income in rural counties accelerated substantially, rising 4.3 percent, compared with 0.8 percent the previous year.<sup>1</sup>

## Metropolitan Statistical Areas

### Personal income and employment

Personal income declined in a smaller percentage of metropolitan statistical areas (MSAs) in 2003 than in the previous year. In fact, out of 361 MSAs, only 2—Yuma, Arizona and Santa Cruz-Watsonville, California—recorded declines in personal income. Per capita personal income declined in just five MSAs. In 2002, by contrast, personal income declined in more than 20 MSAs, and per capita personal income declined in 60.

In most areas, personal income grew in the face of tepid job growth or job losses (chart 1). In fact, 178 of

1. In this article, rural counties consist of counties that are outside micropolitan and metropolitan statistical areas.

**Chart 1. MSA Income and Employment Growth: Percent Change, 2003**

the 361 MSAs recorded job losses, while nearly all of the MSAs recorded gains in personal income. Even after accounting for the 1.9-percent rate of inflation, personal income decreased in only 39 MSAs, or roughly 10 percent.<sup>2</sup>

The growth in personal income in 2003 mostly stemmed from growth in personal current transfer receipts, proprietors' income, employer contributions for employee pension and insurance funds, and military earnings.

Personal current transfer receipts—which includes social security, Medicare, and Medicaid—grew 4.1 percent; reflecting growth in population, inflation, and an increase in the cost of medical care. Proprietors' income—the income of the self-employed—grew 8.5 percent. Employer contributions for employee pension and insurance funds grew 10.7 percent; the increase was mostly due to an unusually large payment to reduce unfunded pension liabilities rather than to major gains in employment. Military earnings grew 14.5 percent; most of the growth represented additional payments to activated reservists and active duty military forces as a consequence of the wars in Iraq and Afghanistan rather than to an increase in military employment, which rose only slightly.

### Performance of individual MSAs

Personal income growth in individual MSAs reflected each area's industrial makeup. In the fastest growing MSAs in 2003, local economies were generally dependent upon the military and the motor vehicle manufacturing (the industry making the biggest contribution to pension funds), tourism, or real estate industries.<sup>3</sup> In the slowest growing MSAs, local economies were generally dependent on the air transportation, securities, information, or computer manufacturing industries.

Bridgeport-Stamford-Norwalk, Connecticut, had the highest per capita personal income in 2003 (table A). Its average income of \$60,803 was nearly double the national average and was nearly 30 percent above the second-ranked MSA, San Francisco-Oakland-Fremont, California. All of the top 10 MSAs in 2003 were in the top 10 in 2002.

McAllen-Edinburg-Mission, Texas, had the lowest per capita personal income. Its average income of \$15,184 was slightly less than half of the national average. Nine of the 10 MSAs with the lowest per capita in-

comes in 2003 also had the lowest incomes in 2002. Provo-Orem, Utah, replaced Las Cruces, New Mexico.

**Table A. Per Capita Personal Income for Metropolitan Statistical Areas**

## Micropolitan Statistical Areas

### Comparison with metropolitan areas

Micropolitan statistical areas outperformed metropolitan areas in 2003. In micropolitan areas, per capita personal income grew 3.1 percent, compared with 2.0 percent in metropolitan areas.<sup>4</sup> This difference in performance stems from two main factors. Population growth in micropolitan areas was slower, 0.6 percent compared with 1.1 percent in metropolitan areas, and earnings growth in micropolitan areas (5.2 percent) was higher than in metropolitan areas (4.1 percent).<sup>5</sup>

The difference in earnings growth reflects key differences in industrial structure (table B). In micropolitan areas, almost 42 percent of earnings was accounted for by manufacturing and government, while 11 percent was accounted for by professional and financial services. In metropolitan areas, by contrast, only 28 percent of earnings was accounted for by manufacturing and government, and 26 percent was accounted for by professional and financial services.

Importantly, micropolitan areas depend more heavily on the military, motor vehicle, and accommodations industries, which boosted earnings generally in

2. The measure of inflation here refers to the national price index for personal consumption expenditures from the national income and product accounts.

3. Tourism consists of the arts, entertainment, and recreation industry and the accommodation industry.

4. Micropolitan statistical areas are counties with a densely settled central place (called an urban cluster) with a population of at least 10,000 but less than 50,000 and adjacent counties that have high degrees of social and economic integration with the core county as measured by commuting ties.

5. The other components of income—property income and transfer receipts—grew at roughly the same rates in both areas.

2003. Micropolitan areas are less dependent than metropolitan areas on the air transportation, securities, information, and computer manufacturing industries, which generated weak earnings growth in 2003.

Overall, personal income increased in 558 of the Nation's 575 micropolitan statistical areas in 2003; in 2002, personal income in 471 areas increased. Per capita personal income increased in 545 micropolitan areas, and it increased faster than the inflation rate in 441 areas.

**Table B. Industrial Structure of Metropolitan and Micropolitan Statistical Areas and Rural Areas, 2003**

Industry	Earnings by place of work (billions of dollars)			Percent of total		
	Metro- politan	Micro- politan	Rural	Metro- politan	Micro- politan	Rural

<b>Total .....</b>	<b>6,369.3</b>	<b>489.6</b>	<b>254.8</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

NOTE: Natural resources consists of farm; forestry, fishing, related activities, and other; and mining. Financial activities consists of finance and insurance and real estate, rental, and leasing. Professional and business services consists of professional and technical services; management of companies and enterprises; and administrative and waste services. Leisure, hospitality, and other consists of arts, entertainment, and recreation; accommodation and food services; and other services except public administration.

### Performance of individual micropolitan areas

Per capita personal income was above the national average in only 23 micropolitan areas, reflecting lower average compensation, lower participation in the labor force, and lower costs of living, particularly lower housing costs.

Jackson, Wyoming-Idaho, had the highest per capita personal income in 2003 (table C). Its average income was nearly 90 percent above the national average. Nine of the top ten micropolitan areas in 2003 were in the top ten in 2002, reflecting a stability in rankings similar to that of the metropolitan areas. Aberdeen, South Dakota, is new to the top 10 and displaces Silverthorne, Colorado.

Rio Grande City-Roma, Texas, had the lowest per capita income. Its average income was not much more than a third of the national average. Three areas

moved into the bottom 10—Deming, New Mexico; Tuskegee, Alabama; and Tallulah, Louisiana.

Rio Grande City-Roma, TX.....	10,365	10,805	33.6	34.3

### Rural Areas

Rural counties on average grew much faster than either metropolitan areas or micropolitan areas, but growth in per capita personal income varied more. In rural counties, per capita income grew 4.0 percent in 2003, but in 7 percent of counties (90 of 1,351), per capita income decreased, and in nearly a fourth of the counties, per capita income did not keep pace with inflation. Like micropolitan areas, rural counties tended to depend heavily on manufacturing and government. These two industries and natural resources (farming, forestry, and mining) generated more than 50 percent of rural earnings in 2003.

### Source Data and Revisions

The primary data sources used by the Bureau of Economic Analysis (BEA) to prepare the estimates of local area personal income for 2003 are wages and salaries from the Bureau of Labor Statistics, farm production and income from the U. S. Department of Agriculture and state agricultural statistical agencies, benefits paid by the Social Security Administration, medical care benefits from the Centers for Medicare and Medicaid Services and state departments of social services, and population from the Census Bureau. The residence adjustment and dividends, interest, and rent for 2003 were extrapolated from tabulations of Federal income

tax returns from the Internal Revenue Service (IRS) for 2002. Estimates of nonfarm proprietors' income were extrapolated from IRS data for 2001.<sup>6</sup>

The revisions to estimates of personal income for 2001 were small: For 79 percent, or 285, of the MSAs, personal income was revised up or down no more than 1 percent (chart 2). The revisions to the 2002 estimates

were generally larger, reflecting the incorporation of newly available data on property and nonfarm proprietors' income (chart 3). The average algebraic revision was only 0.2 percent in 2001 and -0.3 percent in 2002; the mean absolute revisions were somewhat larger—0.6 percent in 2001 and 1.1 percent in 2002.

6. For details about the estimation methodology and data sources, see *Local Area Personal Income and Employment Methodology* on BEA's Web site at <[www.bea.gov/bea/regional/articles/lapi2003](http://www.bea.gov/bea/regional/articles/lapi2003)>.

Tables 1 through 3 follow on page 26.

**Chart 2. Frequency Distribution of Revisions to MSA Personal Income, 2001**

**Chart 3. Frequency Distribution of Revisions to MSA Personal Income, 2002**

### Alternative Measures of County Employment and Wages

Three widely used measures of county employment and wages by place of work are employment and payroll in the *County Business Patterns* (CBP) series from the Census Bureau, employment and wages from the Quarterly Census of Employment and Wages (QCEW) program from the Bureau of Labor Statistics (BLS), and wage and salary disbursements and employment from the Bureau of Economic Analysis (BEA). These measures differ in source data and coverage.

The CBP data are derived from Census Bureau business establishment surveys and Federal administrative records. The QCEW data are BLS tabulations of monthly employment and quarterly wages of workers who are covered by state unemployment insurance programs or by the unemployment insurance program for Federal employees.<sup>1</sup> The BEA estimates of employment and wages are primarily derived from the BLS data; the estimates for industries that are either not covered or not fully covered in the QCEW data are also based on supplemental data from other agencies, such as the Department of Defense, the U.S. Department of Agriculture, and the Railroad Retirement Board.

The coverage of the Census Bureau data differs from that of the BLS data primarily because the Census Bureau data exclude most government employees and because the BLS data cover civilian government employees.<sup>2</sup> The BLS data also include some farm and private household employees that are excluded from the Census Bureau data. However, the Census Bureau data cover the employees of educational institutions, membership organizations, and small nonprofit organizations in other industries more completely than the BLS data.<sup>3</sup> In addition, the Census Bureau reports employment only for the month of March; the BLS employment data are quarterly and annual averages of monthly data.

In 2001, both BLS and BEA began to include employees of Indian tribal councils in local government. These employees were previously included in the relevant private industries.<sup>4</sup> In the Census Bureau data, these employees are still classified in private industries.

The BEA estimates of employment and wages differ from the BLS data because BEA adjusts the estimates to account for employment and wages that are not covered or that are not fully

covered by the unemployment insurance programs. BEA adds estimates of employment and wages to the BLS data to bridge small gaps in coverage for nonprofit organizations that do not participate in the unemployment insurance program (in several industries), for students and their spouses employed by colleges or universities, for elected officials and members of the judiciary, for interns employed by hospitals and by social service agencies, and for insurance agents classified as statutory employees. In addition, BEA uses supplemental source data to estimate most, or all, of the employment and wages for the following: Farms, farm labor contractors and crew leaders, private households, private elementary and secondary schools, religious membership organizations, rail transportation, military, and U.S. residents who are employed by international organizations and by foreign embassies and consulates in the United States. BEA also adjusts for employment and wages subject to unemployment insurance, but not reported by employers. Other adjustments to wages include estimates for unreported tips, judicial fees paid to jurors and witnesses, compensation of prison inmates, and marriage and license fees paid to justices of the peace.<sup>5</sup>

The Census Bureau released 2002 data for total employment and payrolls for counties on its Web site on November 22, 2004; go to <[www.census.gov/epcd/cbp/view/cbpview.html](http://www.census.gov/epcd/cbp/view/cbpview.html)>. BLS released county data on total employment and average weekly pay for the fourth quarter of 2003 on its Web site on July 8, 2004; go to <[www.bls.gov/cew/](http://www.bls.gov/cew/)>. Annual QCEW data for 2003 are also available. BEA released preliminary estimates for 2003 and revised estimates for 2001–2002 of total wage employment and total wage and salary disbursements for counties on its Web site on December 29, 2004; go to <[www.bea.gov/bea/regional/reis/](http://www.bea.gov/bea/regional/reis/)>.

Adrienne T. Pilot

#### National Estimates of Wages and Salaries in the BEA County Estimates and Payrolls and Wages From the Census Bureau and BLS

	[Billions of dollars]		
	2001	2002	2003
Total payroll, Census Bureau .....	3,989.1	3,943.2	n.a.
Plus: Differences in coverage:			
Civilian government wages, BLS <sup>1</sup> .....	737.7	777.9	n.a.
Other differences, net <sup>2</sup> .....	-31.6	-6.7	n.a.
Equals: Total wages, BLS .....	4,695.2	4,714.4	4,826.3
Plus: Adjustments by BEA:			
For unreported wages and unreported tips on employment tax returns .....	103.3	106.5	110.4
For selected industries <sup>3</sup> .....	115.3	125.0	134.3
Other adjustments .....	26.1	26.4	27.7
Equals: Wage and salary disbursements, BEA .....	4,939.9	4,972.3	5,098.7

1. BLS wages were adjusted to remove the wages of Indian tribal councils because these data were already included in the Census Bureau's total payroll data.

2. Includes differences of coverage in private education, membership organizations, and government.

3. Consists of the difference between estimates from more comprehensive source data and BLS wages and salaries.

n.a. Not available

1. The QCEW data account for 95 percent of BEA's wages and salaries.

2. The Census Bureau data cover only those government employees who work in government hospitals, federally chartered savings institutions and credit unions, liquor stores, and wholesale liquor establishments. The BLS data in most states exclude state and local elected officials, members of the judiciary, state national and air national guardsmen, temporary emergency employees, and employees in policy and advisory positions.

3. The BLS data do not cover certain religious elementary and secondary schools, because a Supreme Court decision exempts some of these schools from unemployment compensation taxes. The BLS data also exclude college students (and their spouses) who are employed by the school in which they are enrolled and student nurses and interns who are employed by hospitals as part of their training. In half of the states, the BLS data only include nonprofit organizations with four or more employees during 20 weeks in a calendar year.

4. For example, employees of casinos owned by tribal councils were included in the North American Industry Classification System subsector "Amusement, Gambling, and Recreation Industries."

5. For a detailed description of the sources and methods used to prepare the estimates, go to <[www.bea.gov/bea/regional/articles/lapi2003](http://www.bea.gov/bea/regional/articles/lapi2003)>.

### Acknowledgments

The annual estimates of local area personal income were prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. John W. Ruser, Associate Director for Regional Economics, provided general guidance. The preparation of the estimates was a division-wide effort.

The estimates of nonfarm wages and salaries and supplements to wages and salaries were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, John D. Laffman, Michael G. Pilot, Mauricio Ortiz, John A. Rusinko, James M. Scott, and Elizabeth F. Stell. Contributing staff members were Peter Battikha, Michael L. Berry, Kristin M. Chambliss, Susan P. Den Herder, Terence J. Fallon, Tina C. Highfill, Mark W. Hodgins, Russell C. Lusher, Paul K. Medzerian, Katherine M. Yang, Jesse M. Young, and Jaime Zenzano.

The estimates of farm wages and salaries, farm sup-

plements to wages and salaries, proprietors' income, property income, personal current transfer receipts, employee contributions for government social insurance, and the adjustment for residence were prepared by the Regional Income Branch under the supervision of James M. Zavrel, Chief. Major responsibilities were assigned to Charles A. Jolley, Carrie L. Litkowski, and James P. Stehle. Contributing staff members were Merry L. Chee, Daniel R. Corrin, Eli F. Dourado, Michelle A. Harder, Katherine E. Harper, Toan A. Ly, Brian J. Maisano, W. Timothy McKeel, and Troy P. Watson.

The public use tabulations and data files were assembled and the tables were prepared by the Regional Economic Information System Branch under the supervision of Kathy A. Albetski, Chief. Major responsibilities were assigned to Gary V. Kennedy and Callan S. Swenson. Contributing staff members were Giselle M. Cubillos, H. Steven Dolan, Andre Garber, Michael J. Paris, Alison M. Skinner, and Monique B. Tyes.

### Data Availability

This article presents summary estimates of personal income and per capita personal income for 2001–2003. More detailed estimates for 1969–2003 are also available.

The following annual estimates for counties, metropolitan statistical areas, micropolitan statistical areas, metropolitan divisions, combined statistical areas, and BEA economic areas are available at <[www.bea.gov/bea/regional/reis](http://www.bea.gov/bea/regional/reis)>:

- Personal income, per capita personal income, and population for 1969–2003
- County income and employment summary (featuring the components of personal income (including nonfarm personal income) and employment totals for a continuous time series) for 1969–2003
- Compensation of employees by North American Industry Classification System (NAICS) subsectors for 2001–2003 and by Standard Industrial Classification System (SIC) two-digit industries for 1998–2000
- Personal income by major source and earnings by NAICS subsectors for 2001–2003 and by SIC two-digit industries for 1969–2000
- Full-time and part-time employment by NAICS subsectors for 2001–2003 and by SIC division-level industries for 1969–2000
- Regional economic profiles (featuring a selection of personal income and employment data) for 1969–2003
- Personal current transfer receipts by major program for 1969–2003
- Farm income and expenses (including the major cate-

gories of gross receipts and expenses for all farms and for measures of farm income) for 1969–2003

- Personal income and per capita personal income for 2001–2003, including 2003 rankings by per capita personal income for counties and counties with the highest and lowest per capita personal incomes in 2003
- Total wage and salary disbursements, total wage and salary employment, and average wage per job for 1969–2003
- BEARFACTS, a narrative that presents the most recent estimates of personal income for an area, the area's growth rates, and a breakdown of the sources of personal income for the area

In addition, the entire set of estimates for all areas are available on a DVD-ROM that includes an updated description of the sources and methods used to estimate local area personal income. To order the DVD-ROM *Regional Economic Information System, 1969–2003* (product number RCN-0352), call the Order Desk at 1-800-704-0415 (outside the United States, call 202-606-9666).

The local area personal income estimates are also available through the members of the BEA User Group, which consists of state agencies and universities that help BEA to disseminate the estimates in their states. The list of the members of the group are available on BEA's Web site at <[www.bea.gov/bea/regional/docs/usergrp.cfm](http://www.bea.gov/bea/regional/docs/usergrp.cfm)>.

For more information, call BEA's Regional Economic Information System at 202-606-5360, fax 202-606-5322, or e-mail [reis.remd@bea.gov](mailto:reis.remd@bea.gov).

Table 1. Personal Income and Per Capita Personal Income by Metropolitan Area, 2001-2003-Continues

Table with 20 columns: Area name, Personal income (Millions of dollars, Percent change, 2001-2003), Per capita personal income (Dollars, Rank in U.S., 2003), Area name, Personal income (Millions of dollars, Percent change, 2001-2003), Per capita personal income (Dollars, Rank in U.S., 2003). Rows include United States, Metropolitan portions, Nonmetropolitan portions, and various metropolitan statistical areas across the United States.

See footnotes at the end of the table.

Table 3. Personal Income and Per Capita Personal Income by County, 2001–2003—Continues

Table with multiple columns: Area name, Personal income (Millions of dollars, Percent change), Per capita personal income (Dollars, Rank in state). Rows include counties from New Castle to Bibb, and Florida counties from District of Columbia to Washington.

See footnotes at end of table.

Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003—Continues

Area name	Personal income				Per capita personal income <sup>1</sup>				Area name	Personal income				Per capita personal income <sup>1</sup>			
	Millions of dollars			Percent change <sup>2</sup>	Dollars			Rank in state		Millions of dollars			Percent change <sup>2</sup>	Dollars			Rank in state

Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003-Continues

Table with columns for Area name, Personal income (Millions of dollars, Percent change, Dollars, Rank in state) and Per capita personal income (Dollars, Rank in state). Rows list Missouri and Montana counties with their respective income and change data for 2001-2003.

See footnotes at end of table.

**Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003—Continues**

Table 3. Personal Income and Per Capita Personal Income by County, 2001–2003—Continues

Table with 19 columns: Area name, Personal income (Millions of dollars, Percent change, Dollars, Rank in state), and Per capita personal income (Millions of dollars, Percent change, Dollars, Rank in state). Rows include states like Oregon, Washington, and Pennsylvania, and numerous counties within those states.

See footnotes at end of table.

Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003—Continues

Area name	Personal income				Per capita personal income <sup>1</sup>				Rank in state	Area name	Personal income				Per capita personal income <sup>1</sup>				Rank in state

Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003—Continues

Table with 18 columns: Area name, Personal income (Millions of dollars, Percent change, Dollars, Rank in state), and Per capita personal income (Millions of dollars, Percent change, Dollars, Rank in state). Rows list counties and cities from Caledonia to Westmoreland.

See footnotes at end of table.

Table 3. Personal Income and Per Capita Personal Income by County, 2001-2003

Area name	Personal income				Per capita personal income <sup>1</sup>				Rank in state	Area name	Personal income				Per capita personal income <sup>1</sup>			
	Millions of dollars			Percent change <sup>2</sup>	Dollars			Rank in state			Millions of dollars			Percent change <sup>2</sup>	Dollars			Rank in state
