1. Per capita personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the

methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 2 "State Personal Income: Second Quarter of 2005 and Revised Estimates for 2002-2005:1" in the October 2005 issue of the SURVEY OF CURRENT BUSINESS.

1. Per capita disposable personal income was computed using midyear population estimates of the Bureau of the Census.

2. Percent change was calculated from unrounded data.

NOTE: The personal income level shown for the United States is derived as the sum of the state estimates. It differs from

the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 3 "State Personal Income: Second Quarter of 2005 and Revised Estimates for 2002-2005:1" in the October 2005 issue of the SURVEY OF CURRENT BUSINESS.

NOTE: Totals shown for the United States differ from the national income and product account estimates of gross domestic product (GDP) because GSP excludes and GDP includes the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad and for mili-

tary equipment, except office equipment. Also, GSP and GDP have different revision schedules.
