FROM: Bay Area Air Quality Management District

RE: Permit Application for the following source of air pollution:

**Emergency Diesel Generator  
Peninsula Eye Surgery Center  
1128 W El Camino Real  
Mountain View, CA**

---

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

Peninsula Eye Surgery Center is applying for an Authority to Construct and/or Permit to Operate an Emergency Standby Generator-Diesel Engine. It will be used to generate power during emergency conditions only. The generator is a Cummins 170 HP engine.

The District has determined that the increase in health risk resulting from toxic air contaminant emissions from the proposed source are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report(s) by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
