Table I.1. Personal Income and Per Capita Personal Income by Metropolitan Area, 2001-2003

Table with columns for Area name, Personal income (Millions of dollars, Percent change), Per capita personal income (Dollars, Rank in U.S.), and Area name, Personal income (Millions of dollars, Percent change), Per capita personal income (Dollars, Rank in U.S.). Rows list various metropolitan areas like Lawrence, KS and Yuma, AZ.

1. Per capita personal income was computed using Census Bureau midyear population estimates.

2. Percent change calculated from unrounded data.

3. The personal income level shown for the United States is derived as the sum of the county estimates. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

4. The metropolitan area definitions used by BEA for its personal income estimates are the new county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February 2004 and February 2005) for Federal statistical purposes.
