

BAY AREA
AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

December 6, 2004

TO: Parents or guardians of children enrolled at the following school:

Wilson Elementary School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application for the following source(s) of air pollution:

**Catahoula Coffee Company and Roastery
Coffee Roaster, San Franciscan, Model SF25B abated by Thermal Oxidizer
12472 San Pablo Avenue
Richmond, CA 94805**

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

The coffee roaster is complete with a cyclone separator designed as a separate chamber after the roaster. This cyclone separator serves two functions: 1) to separate chaff and the other particulate matter from the hot air exhausted from the roaster and, 2) to provide an air entrance into the thermal oxidizer. The hot air discharge from the roaster is processed in the thermal oxidizer at a minimum of 1250 degrees F and with a residence time in excess of 0.5 seconds.

The District has determined that the increase in health risks resulting from toxic air contaminant emissions from the proposed source(s) are within acceptable levels, and that the project will comply with all other applicable air pollution control requirements. Accordingly, the District plans to issue a Permit to Operate for the proposed project.

If you are interested in getting more information on the District's evaluation of this proposed project, you may request copies of the applicable staff report(s) by calling the District at the telephone number listed at the end of this notice. This information also can be viewed or downloaded from the District website at:
