

BOTH INTERNATIONAL & INLAND The tow shown is made up of inconspicuous, partly submerged vessels and is 150 meters in length. The towed vessels are less than 25 meters in breadth and less than 100 meters in length. Which lights would be displayed from the towed vessels?

A. sidelights and stern light on each vessel towed.

Incorrect. This display of lights is for a vessel or object being towed, other than an inconspicuous, partly submerged vessel or object being towed.

B. one all-round white light at the after end of each vessel towed

Incorrect. An inconspicuous, partly submerged vessel or object being towed that is less than 25 meters in breadth, in addition to an all-round white light at the after end, shall display an all-round white light at the forward end of each vessel or object towed.

C. one all-round white light at or near each end of each vessel towed

Correct. Since the vessel or object being towed is less than 25 meters in breadth, according to Rule 24(g)(i), only one all-round white light at or near the end of each vessel or object being towed is required.

D. one all-round white light at each end and one all-round white light at the extremities of its breadth of each vessel towed.

Incorrect. This display of lights is for an inconspicuous, partly submerged vessel or object being towed that is 25 meters or more in breadth.
