This comment is in regard to Docket no. 9311 SCState Board of Denistry

Even though the consent order was good, I did not feel that it was strong enough especially after reading all the facts and knowing how many children of SC have been and or still being denied the most simple of dental care. There are thousands of children in this state that are being denied dental services from these hygienists because dentist call their school members to vote not to allow these hygienists from coming into their schools to perform their services. It is absolutely astounding that in this day and age this is allowed. The only way that this could be prevented and more people get access to dental care is for the hygienists to have their own governing board. This is what I had hoped and prayed that the FTC would have mandated. Every major health paper you read, says that NO health care profession should be under the control of another. If there is anyway that this could inserted in the order, it would be a god send to the people of this state especially the children who doesn't have anybody to speak for them except these hygienists. Please, please consider this . If I can be of any assistance, please let me know.
