Introduction

The George Moss Collection was given to the Library of Congress in 1996 by Fairleigh Dickinson University. Originally, the collection contained approximately 5,000 78-rpm discs, nearly 550 cylinders, several phonographs, record catalogs, and twelve boxes of sheet music. This finding aid is a listing in alphabetical order by composer and title of the more than 1,000 sheet music titles. The 78-rpm discs, cylinders, photographs and record catalogs are in the custody of the M/B/RS Division.

There are no restrictions on viewing any of the materials in this collection. The status of copyright and literary rights in any of this material is unclear. Many of the materials in this collection are extremely fragile and patrons are asked to use extreme care in handling.

This Finding Aid was prepared with Corel WordPerfect 8 and Procite. An automated version is available from the staff of the Performing Arts Reading Room.
