

## U.S. Government Standard General Ledger USSGL Account Attributes

To meet external reporting requirements, agencies need data at a level below the 4-digit USSGL account. Agencies' systems must capture this information at the transaction level by recording transactions using USSGL 4-digit accounts plus attributes. This section provides USSGL attribute tables for the FMS administered FACTS I and FACTS II "trial-balance" reporting systems.

Attributes are like adjectives that further describe a USSGL account in order to meet a specific reporting requirement. Domain values are all of the possible valid choices within an attribute. For example, if in a room there is a red chair and a blue chair, then you only need one attribute to describe them: color. The valid domain values within the attribute "color" would be "red" or "blue." If you wanted the red chair, there would be no need to use additional adjectives such as weight, height, or size to describe it. This is because, in this example, color is enough to uniquely identify the chair. Therefore, only those attributes and those domain values that are necessary to uniquely identify the reporting requirement appear on the crosswalks.

Note: Some USSGL accounts do not have certain attributes in this document for reporting purposes, but do require these attributes for accounting purposes. An example is downward adjustments of prior-year obligations. For FACTS II reporting, USSGL accounts 4871, 4872, 4971, and 4972 do not need the reimbursable flag attribute with the domain values of direct and reimbursable. However, at yearend these accounts close to USSGL accounts 4801, 4802, 4901, and 4902 that do require the reimbursable flag attribute for FACTS II reporting. Therefore, an agency must similarly identify the adjustment accounts to close them properly.

The attributes in the FACTS I data table are used to prepare the Financial Report of the United States Government and do not include all of the attributes used to prepare agency financial statements required by OMB Bulletin No. 01-09, Form and Content of Agency Financial Statements.

### **Attributes Used to Prepare the Financial Report of the United States Government (Financial Report)**

USSGL attributes are one component of detailed data in agencies' financial systems related to the external reporting financial statements. The FACTS I data table shows the USSGL account balances and the related attribute information captured at the transaction level that support production of the Financial Report. The USSGL crosswalks for the financial statements reference these attributes as a requirement for proper reporting on the particular financial statement line items.

### **Form and Content Agency Financial Reports**

The FACTS I data table does not show all the USSGL account attributes necessary to produce agency financial statements required by OMB. Refer to Section V: Crosswalks to Standard External Reports.

### **Attribute Definition Report**

This report provides definitions for the attributes associated with each proprietary USSGL account for FACTS I reporting. Agencies are required to report their adjusted trial balances and selected NOTES amounts in FACTS I with attributes described in the detailed financial information.

### **FACTS I USSGL Accounts and Attributes**

The USSGL account and related attribute tables show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS I reporting. The tables also show the related attributes agencies must provide for each USSGL account reported in FACTS I; these columns contain one of three values:

Space	This attribute is <b>not</b> reported in FACTS I for the USSGL account.
Y	Yes, report this attribute in FACTS I when this account is submitted. A list of the valid values for each attribute is on the last page of the attribute crosswalk.
Other	In some cases, attributes are filled in with a value other than "Y" or space. For example, Federal/non-Federal attribute domain values often appear with an "F" (Federal) in a shaded cell. Shaded attributes show the domain value that FACTS I predefines as appropriate for a specific USSGL account. The FACTS I system will supply shaded attribute values for the designated USSGL accounts.

The FACTS I team will update crosswalks periodically between TFM releases. For the latest information, log onto Web site at [www.fms.treas.gov/cfs/de v](http://www.fms.treas.gov/cfs/de v).

### **Attributes Used to Prepare Budgetary Reports**

USSGL attributes are one component of a data model that describes how detailed data in agencies' financial systems (e.g., USSGL account balances with related attributes captured at the transaction level) relate to external requirements. The data model also shows the relationships between the budget accounts published in the President's budget and the Treasury appropriation/fund symbols collected in FACTS II, which are published in the Treasury Annual Report - Appendix. The data model includes:

- ◆ Entity Relationship Diagram
- ◆ Entity Definition Report
- ◆ Attribute Definition Report
- ◆ FACTS II USSGL Account Attribute Table

#### ***Entity Relationship Diagram***

This diagram shows the relationship between entities or groups of data. It includes budget formulation accounts, Treasury appropriation/fund symbols, USSGL accounts and related attributes as well as financial data reported by Federal agencies to OMB and Treasury. The diagram shows the relationships between (1) information published in the President's budget and the Treasury Annual Report/Appendix, and (2) detailed data captured in agencies' financial systems and summaries of these data presented in OMB and Treasury publications.

#### ***Entity Definition Report***

This report provides definitions and business rules for relationships between all entities.

#### ***Attribute Definition Report***

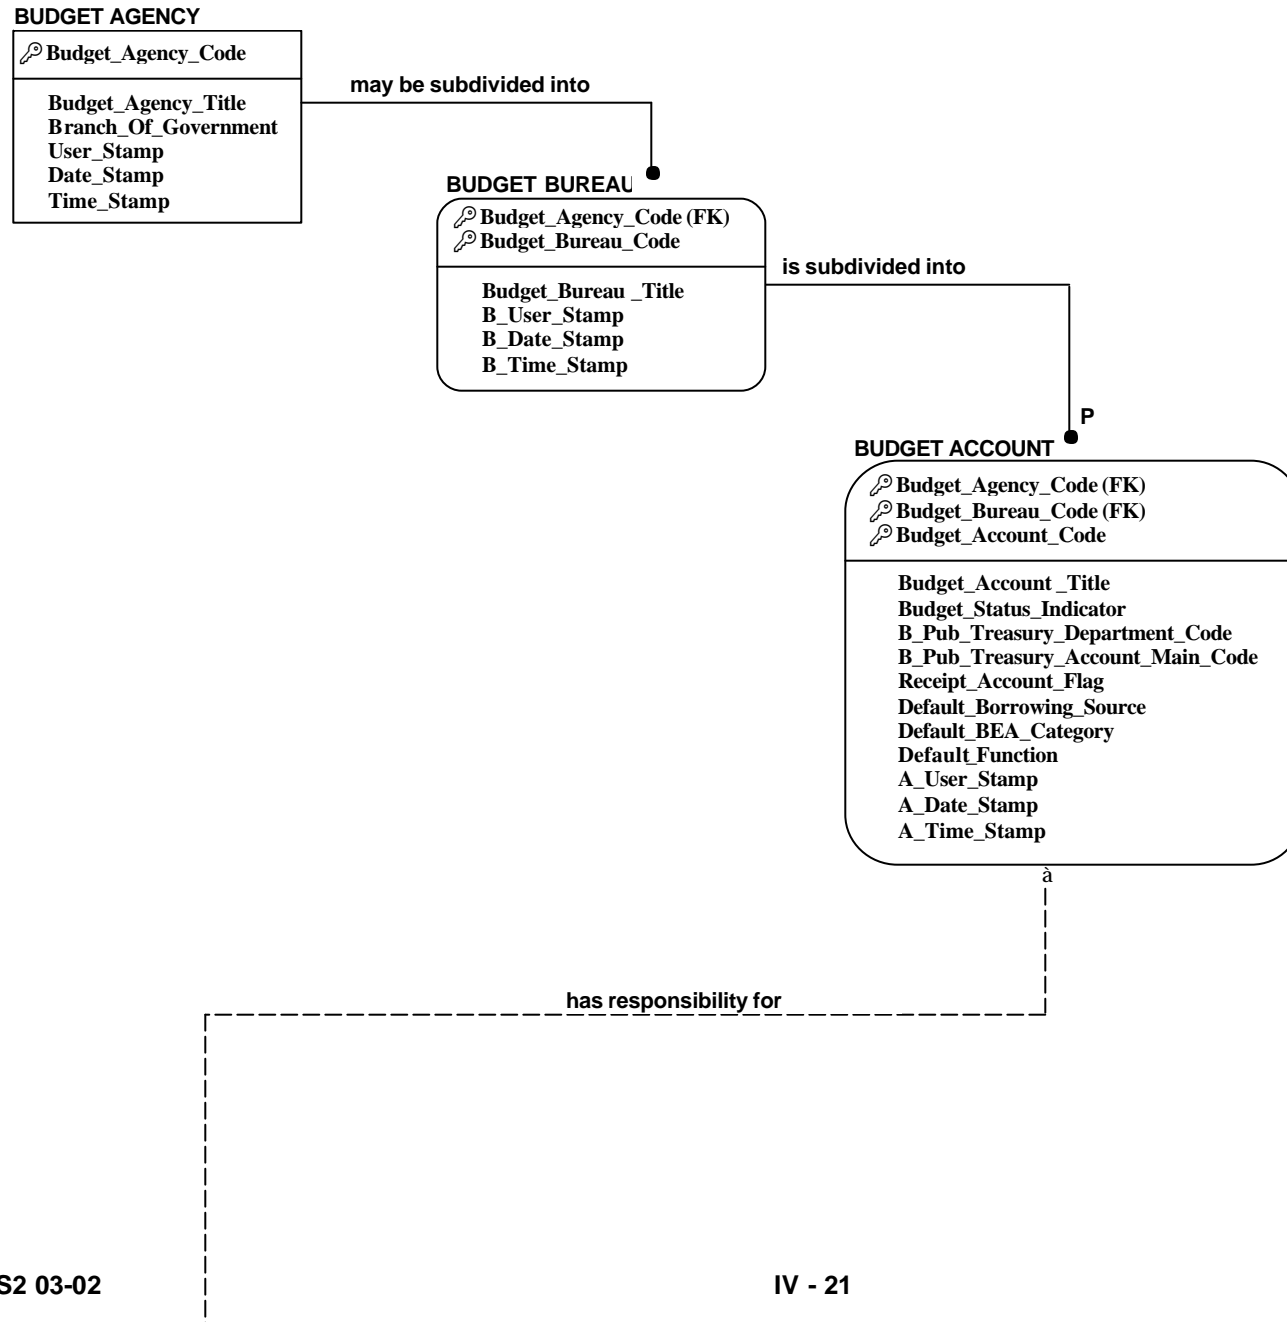

This report provides definitions and related information for all attributes associated with each entry. Agencies will report on those attributes described in the detailed financial information entity.

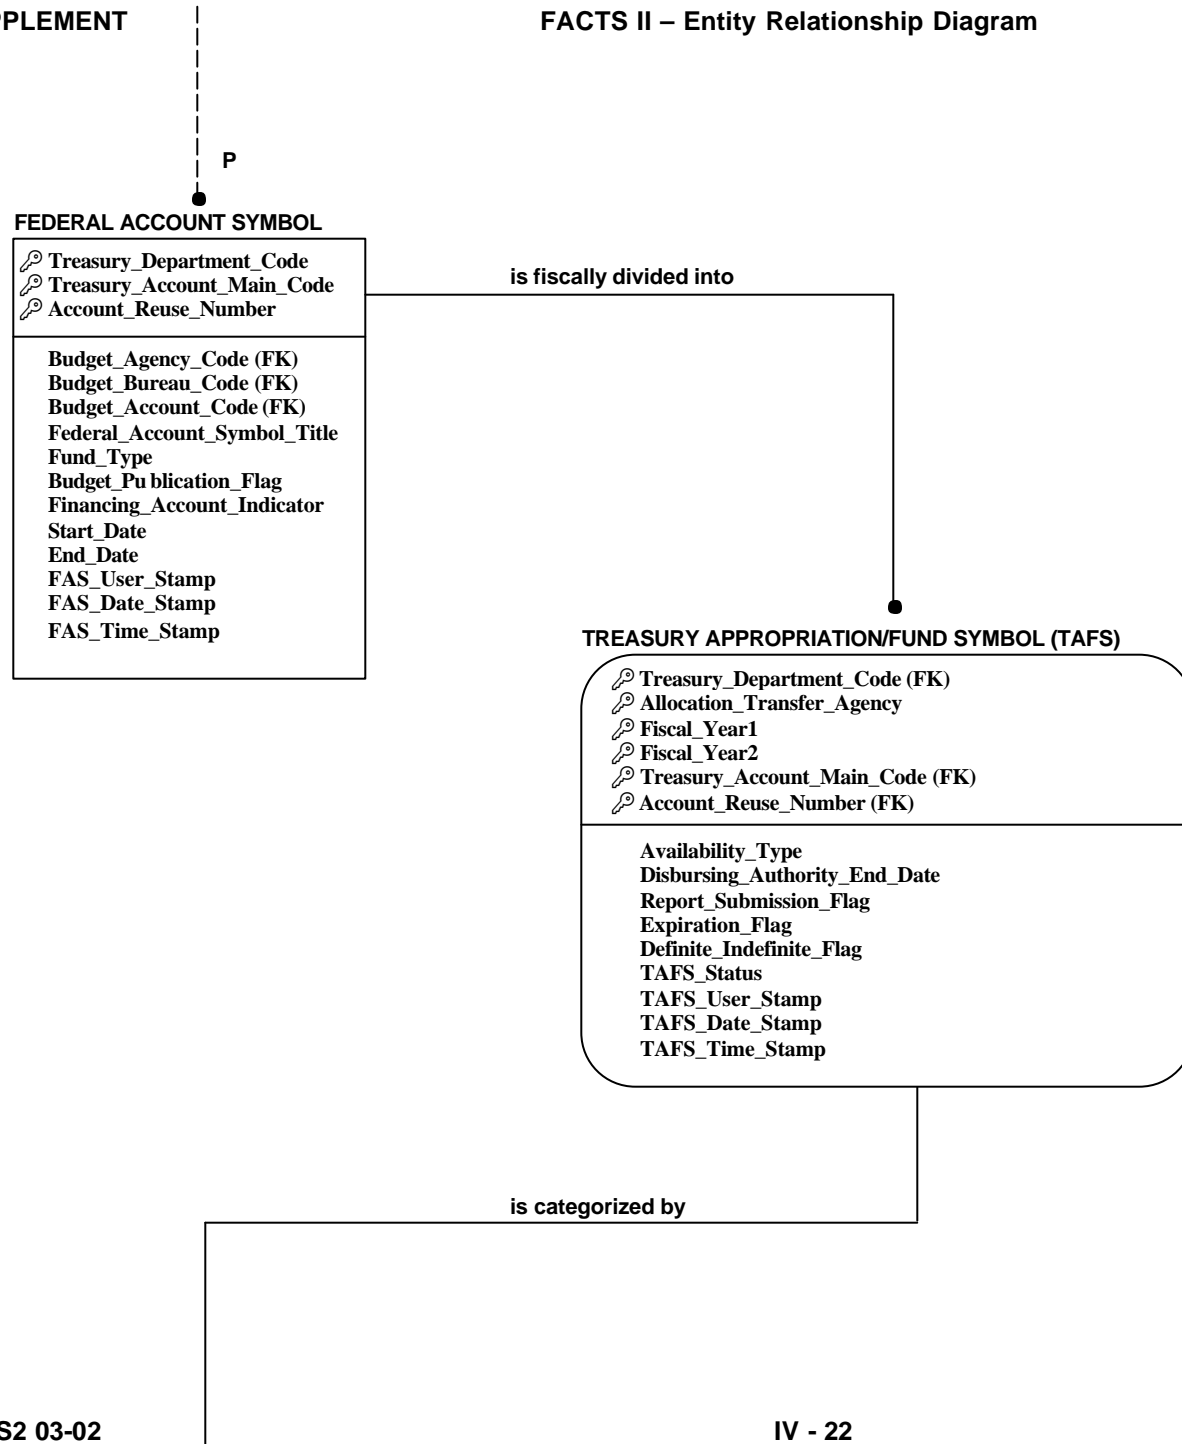

#### ***FACTS II USSGL Account Attribute Tables (Fiscal 2003 and 2004)***

The FACTS II attribute tables for fiscal 2003 and 2004 show USSGL accounts, account titles, and normal balance indicators for USSGL accounts that agencies will use for FACTS II reporting. Also, the tables show related attributes agencies must provide for each USSGL account reported in FACTS II; these columns contain one of three values:

- Space            This attribute is **not reported** in FACTS II for the USSGL account.
- Y                 Yes, report this attribute in FACTS II when this USSGL account is submitted. To determine valid domain values, refer to the Detailed Financial Information portion of the “FACTS II - Attribute Definition Report” in this section.
- Other             In some cases, attributes are filled in with a value other than “Y” or space. For example, Begin\_End often appears with an “E” (end balance) in a shaded cell. Shaded attributes show the only valid value that FACTS II will accept for a specific USSGL account.
