Description of Suggested Enhancement or Problem with Program

Please describe the nature of the problem, where the computer code stops execution, or the error message that appears when you try to execute the program. Please indicate where in the application the program encounters a problem such as start-up, reading a data file, graphing data, or applying the correct emission mask. If possible attach the data file that you were trying to use. If a program enhancement is suggested, please give a complete description.   Feel free to use additional pages.
