GAIN Report #CH3029

China, Peoples Republic of
FAIRS Product Specific
MRL of Cadmium in Foods - DRAFT FOR
COMMENTS
2003

Approved by:

Larry M. Senger

U.S. Embassy, Beijing

Prepared by:

Wu Bugang, Adam Branson

Report Highlights:

This is an UNOFFICIAL translation of the People's Republic of China DRAFT Standard for Cadmium in Foods and should be used as a guide only. Exporters should carefully discuss regulations and their application with Chinese importers to ensure that their interpretation is accurate.

Includes PSD changes: No
Includes Trade Matrix: No
Unscheduled Report
Beijing [CH1], CH

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Beijing, People's Republic of China for U.S. exporters of domestic food and agricultural products and paid for by the US Codex Office. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Introduction

The People's Republic of China Ministry of Health (MOH) published DRAFT versions of several National Standards in August 2002 on the MOH website (www.moh.gov.cn). This document is an UNOFFICIAL translation of a National Standard that appeared on that website.

The MOH has not published a final version to this DRAFT therefore, the previous standard is still valid. National Standards that are abbreviated 'GB' and issued by MOH are compulsory standards that both China's domestic goods and goods imported into China must satisfy. MOH standards abbreviated 'GB/T' are voluntary.

At this time, U.S. industry and government officials are invited to offer comments on the DRAFTED National Standard. Questions and comments can be submitted to the USDA FAS International Trade Policy Office of Food Safety and Technical Services by fax (202-690-0677) or by email (ofsts@fas.usda.gov). Questions can also be provided to the U.S. Embassy Office of Agricultural Affairs by fax (86-10-6532-2962) or by email (AgBeijing@fas.usda.gov).

Once finalized, the Standard will replace GB 17399-1998 Maximum Levels of Cadmium in Foods

Items noted in the DRAFT for Maximum Levels of Cadmium in Foods

Comparing this standard with GB15201-94, the main modifications are as follows:

- According to CAC standard, the maximum level of cadmium in grains (maize, millet, Chinese sorghum and potato) and fruits are modified.
- Seven maximum levels of cadmium in foods, including; liver and kidney of domestic animals and poultry, shrimp and clam, shellfish, stems and roots of vegetable, leafy vegetable, peanuts and soya bean are added.

GB 15201-XXXX Maximum Levels of Cadmium in Foods

1. Scope

This standard specifies the maximum levels of cadmium in foods

This standard is applied to grains, beans, potatoes, vegetables, fruits, meat, aquatic products, fresh eggs, etc.

2. Documents Cited by this Standard

The clauses in the following documents that were cited by this Standard became clauses of this Standard. For cited documents with a date, all their subsequent modifications or revisions do not apply to this Standard. However, parties having reached an agreement based on cited standards with a date are encouraged to study whether the latest versions of the cited documents with a date are applicable. For cited documents without a date, the latest versions apply to this Standard.

GB/T5009.15 Determination of cadmium in foods

3. Standard of Maximum Levels of Cadmium in Foods

The standards for the Maximum Levels of Cadmium in Foods are shown in Table 1.

Table 1 Standard of the maximum levels of cadmium in foods

Items	Max Levels (MLs, mg/kg)
Grains:	
Rice, soybean, peanut,	0.2
Wheat flour,	0.1
Other grains (maize, millet, Chinese sorghum and potatoes)	0.1
Meat of domestic animals and poultry	0.1
