Louisiana 2006 Crop Acreage and Production  
Grain and Rice Stocks  
Winter Wheat Seedings

**Louisiana 2006 Crop Acreage and Production**

In spite of all the varied weather conditions Louisiana's producers faced during 2006, most crops yields were average or above. Soybeans set a new record yield, while corn, cotton and sorghum yields reached their second highest levels. On the down side, Louisiana's 2006 rice planted acreage was the lowest planted acreage on record for the state. This was largely due to the effects of the salt water from Hurricane Rita.

**Cotton** production is estimated at 1.25 million bales, up 14 percent from 2005. The 2006 planted acreage was estimated at 635,000 acres, up 4 percent from the previous year. An estimated 630,000 acres were harvested, up 5 percent from 2005. Yield per acre was 952 pounds, up 74 pounds from 2005.

**Sugarcane** production for sugar and seed is estimated at 11.75 million net tons, up 13 percent from 2005. An estimated 435,000 acres were harvested, down 4 percent from 2005. Net yield is estimated at 27.0 tons per acre, up 4.1 tons from the 2005 yield.

**Soybean** production is estimated at 29.4 million bushels, up 2 percent from 2005. Total planted acreage was 870,000 acres, down 10,000 acres from 2005. Louisiana farmers harvested an estimated 840,000 acres, also down 10,000 acres from the previous year. Yield was 35 bushels per acre, up 1 bushel from 2005, setting a new record yield for the state.

**All rice** production is estimated at 20.1 million cwt, down 35 percent from 2005. Production of long grain varieties is estimated at 19.5 million cwt, and production of medium grain varieties is estimated at 596,000 cwt. The planted acreage estimate for rice was 350,000 acres, 180,000 acres fewer than 2005. This is the lowest planted acres recorded in the state since record keeping began in 1929. An estimated 345,000 acres of rice were harvested, down 34 percent from 2005. The statewide yield averaged 5,820 pounds per acre, down 80 pounds from the previous year's record yield.

Production of **corn for grain** is estimated at 40.6 million bushels, down 10 percent from 2005. The state planted and harvested acreage estimates for 2006 were 300,000 acres and 290,000 acres, respectively, both down 12 percent from 2005. Yield per acre, at 140 bushels, was up 4 bushels from 2005.

Production of **sorghum for grain** is estimated at 8.4 million bushels, compared to 8.7 million in 2005. Total planted acreage was estimated at 90,000 acres, of which 87,000 acres were harvested for grain. Yield per acre, at 96 bushels, was down 3 bushels from 2005's record yield.

**Sweet potato** production is estimated at 2.23 million cwt, down 10 percent from 2005. An estimated 18,000 acres were planted in 2006, unchanged from 2005. Harvested acreage was estimated at 13,500 acres, down 21 percent from the previous year. The statewide yield averaged 165 cwt per acre, up 20 cwt from last 2005's yield

**All hay** production in 2006 is estimated at 975,000 tons, up 21 percent from 2005. An estimated 390,000 acres were harvested in 2006, up 40,000 acres from the previous year. Yield was 2.5 tons per acre, up 0.2 ton from 2005.

**Louisiana: Acreage, Yield and Production, 2006, with Comparisons**

<sup>1</sup> 480-pound net weight bale.

<sup>2</sup> Estimates based on 3-year average lint-seed ratio.

<sup>3</sup> Harvested for sugar and seed.

## Louisiana Grain Stocks

**Corn** stocks stored off-farm on December 1, 2006, at 22.67 million bushels, were up 9 percent from last year's 20.77 million bushels. On-farm stocks for Louisiana are not published separately but are included in the U.S. total.

**Soybean** stocks stored off-farm on December 1, 2006, at 11.1 million bushels, were 7 percent above last year's 12.0 million bushels. On-farm stocks for Louisiana are not published separately but are included in the U.S. total.

**All wheat** stocks stored off-farm on December 1, 2006, at 8.3 million bushels, were 31 percent above the 6.3 million bushels stored a year ago. On-farm stocks are not published separately but are included in the U.S. total.

## Louisiana Rice Stocks

**Rough rice** stocks reported in all positions on December 1, 2006, totaled 14.9 million cwt, down 21 percent from last year. On-farm stocks of rice were estimated at 7.8 million cwt, compared to 9.0 million the previous year. Off-farm stocks totaled 7.08 million cwt, down 28 percent from last year.

<sup>1</sup> Includes stocks at mills, elevators, warehouses, ports and in transit.

## Winter Wheat Seedings

Louisiana farmers planted an estimated 220,000 acres of Winter Wheat for 2007, up 91 percent from the previous year. United States winter wheat planted area for harvest in 2007 is estimated at 44.1 million acres, up 9 percent from 2006. Seeding began last August and was slightly behind the 5-year average pace because of a lack of moisture in the southern Great Plains during September and much of October. Precipitation during mid-October relieved moisture concerns somewhat in major producing areas. Warm, dry conditions in November allowed seeding to advance at normal pace during the month. Nearly all of the U.S. acreage was seeded by December 1 with the exception of some intended acres in the Southeast and California.

*The Louisiana Farm Reporter (USPS-0056-7670) is published semi-monthly (twice a month) by the Louisiana Department of Agriculture and Forestry, USDA-NASS Louisiana Field Office, 5825 Florida Blvd., Baton Rouge, La 70806. Subscription is free to respondents and cooperators, \$10.00 annually to all others, and is available from the above address. Periodicals Postage is paid in Baton Rouge, LA and at additional mailing offices. Postmaster: send changes of address to Louisiana Farm Reporter, P. O. Box 65038, Baton Rouge, LA 70896-5038*
