

Louisiana Crop Weather Summary

Cooperating with the Louisiana Department of Agriculture
Louisiana Field Office · 5825 Florida Blvd · Baton Rouge, LA 70806
(225) 922-1362 · (225) 922-0744 FAX www.nass.usda.gov

For Crop Week Ending Sunday, June 10, 2007

Released June 11, 2007

Volume 07 Number 15

CROP INFORMATION

Days suitable for fieldwork: 5.3

Soil moisture supplies: 4% very short, 16% short, 71% adequate and 9% surplus

Field Crops Report

Parts of the state received heavy rainfall, while other areas only received scattered showers. Some soybean fields were stressed by the wet conditions. Rice producers were spraying fungicides and scouting for cercospora. Sugarcane farmers were completing their lay-by operations and preparing fallow land. There were some reports of rust in sugarcane fields, but overall the warm and moist conditions were aiding in sugarcane growth.

Fruits, Vegetables and Specialty Crops

Vegetable producers were busy harvesting and selling produce. Some tomato plants were showing signs of bacteria wilt. Peach producers were harvesting. Crawfish producers were draining their ponds and repairing levees.

Livestock, Pasture and Range Report

Cattle producers were working cattle and breeding cows. Livestock producers were beginning to prepare for hot weather. Warm temperatures and adequate moisture were helping pasture conditions.

PERCENT OF PROGRESS					
CROP	STAGE	Current Week	Last Week	2006	5 YR AVG
Corn	Silked	93	73	85	69
