

Louisiana Crop Weather Summary

Cooperating with the Louisiana Department of Agriculture
Louisiana Field Office · 5825 Florida Blvd · Baton Rouge, LA 70806
(225) 922-1362 · (225) 922-0744 FAX www.nass.usda.gov/la

For Crop Week Ending Sunday, August 5, 2007

Released August 6, 2007

Volume 07 Number 23

CROP INFORMATION

Days suitable for fieldwork: 4.3

Soil moisture supplies: 8% short, 60% adequate and 32% surplus

Field Crops Report

Many areas of the state received scattered afternoon thunderstorms last week. Rainfall slowed the rice harvest. Rice producers who were able to harvest reported good yields in most areas. Soybean producers were facing increased disease pressure. Soybean rust was being found in many fields. The abundant rainfall and hot temperatures were stimulating sugarcane growth. Sugarcane producers were spraying for borers and began preparing land for planting.

Fruits, Vegetables and Specialty Crops

Citrus producers were scouting for insects. Vegetable producers were preparing for fall crops.

Livestock, Pasture and Range Report

Rainfall hindered the second cutting of hay in some areas. Cattlemen were taking hay samples for quality. Rain was causing mud and insect problems in feeding areas.

PERCENT OF PROGRESS					
CROP	STAGE	Current Week	Last Week	2006	5 YR AVG
Corn	Dough	100	99	100	99
	Mature	85	62	94	83
