

**Oregon DHS NPI Companion Document for 837 ENCOUNTER Institutional Claim  
and 837 Transaction Coordination of Benefits - Examples for Encounter**

The NPI is a single identification number that will be assigned to all covered health care providers. It is intended to improve the efficiency of the health care system and help to reduce fraud and abuse. The intent of the NPI is to eliminate the need for payers and providers to keep numerous identifiers and in turn simplify transaction processing between these entities. This companion guide is meant to be used as a technical reference guide for NPI usage in Oregon.

The objectives of this document are:

\*To clarify what information is needed by the Oregon Dept. of Human Services (OR-DHS) where the guide indicates that the choice is dependent on the Payer.

\*To point out preferred selections for data elements where multiple alternatives exist.

This Companion Guide supplements the 837 Institutional Claim Implementation Guide Version 004010X096A1.

**In order to create an OR-DHS HIPAA compliant transaction, you must first meet the requirements of the Implementation Guide and then incorporate the payer (OR-DHS) specific requirements.**

OR-DHS processes all alpha characters in upper case (except ISA06 and GS02). Do not use special characters.

To properly process 837 transactions, OR-DHS requires only ONE transaction type in each transmission file beginning with the ISA segment and ending with the ISE segment. For example if the submitter sends Reportable/Encounter 837 transaction data for Professional, Dental and Institutional, there would be a separate file for each transaction (e.g. one containing only the 837P professional data, one containing only 837I institutional data and one file containing only 837D dental data.).

For faster adjudication, OR-DHS requires one rendering (performing) provider/billing provider per claim to avoid conflict between claim and line level data.

**Every effort has been made to prevent errors in this document. However, if there is a discrepancy between this document and the Implementation Guide, the Implementation Guide is the final authority.**

In the examples given in this Companion Guide, a lowercase "b" denotes a blank space.

**IMPORTANT NOTE:** When determining the delimiters to use/send, please take data content, communication protocols, and industry standards into account. If transmission or transaction errors can be traced to the choice of a delimiter, trading partners will be notified, and the use of that delimiter will be prohibited. For example: When the EBCDIC character for <new line> is used as a delimiter, and it is converted to ASCII, it becomes two characters - <carriage return> and <line feed>. Systems using ASCII characters encounter extra, non-conforming characters and reject the transmission.

**ISA - Interchange Control Header - Page B3**

Usage: Required

Segment Max Use within Loop: 1

Example: ISA\*00\*bbbbbbbb\*00\*bbbbbbbb\*ZZ\*tp123456bbbbbb\*ZZ\*ORDHSOMAPbbbb\*010801\*1452\*U\*00401\*000000001\*0\*T\*~

ELEMENT	NAME	USE	ATTRIBUTES			Comments
			Min/Max	Data Type	Codes/Values	
ISA01	Authorization Information Qualifier	R	2/2	ID	00	
ISA03	Security Information Qualifier	R	2/2	ID	00	
ISA05	Sender Interchange ID Qualifier	R	2/2	ID	ZZ	
ISA06	Interchange Sender ID	R	15/15	AN		The sender's trading partner (mailbox) number assigned at the beginning of Business-to-Business (B2B) testing, used for testing and production purposes. The letters "tp" should be in lower-case (i.e., tp#####).  Insert spaces <u>after</u> data to meet 15-byte requirement.
ISA07	Interchange Receiver ID Qualifier	R	2/2	ID	ZZ	
ISA08	Interchange Receiver ID	R	15/15	AN	ORDHSOMAP	Insert spaces <u>after</u> data to meet 15-byte requirement.

**GS Functional Group Header-Page-B8**

Usage: Required

Segment Max Use within transmission: >1

Example: GS\*HC\*tp123456\*ORDHSOMAP\*381791480\*20010801\*1452\*000000001\*X\*004010X096A1~

ELEMENT	NAME	USE	ATTRIBUTES			Comments
			Min/Max	Data Type	Codes/Values	
GS02	Application Senders Code	R	2/15			The sender's trading partner (mailbox) number assigned at the beginning of Business-to-Business (B2B) testing, used for testing and production purposes. The letters "tp" should be in lower-case (i.e., tp#####).
GS03	Application Receiver's Code	R	2/15		ORDHSOMAP	

**ST -- Transaction Set Header - 56**

Usage: Required

Segment Max Use within Transaction: 1

Loop ID: None

Example: ST\*837\*987654~

**Note:** In order to ensure this unique number is returned on your 997, do not use this number more than once a day.

ELEMENT	NAME	USE	ATTRIBUTES			Comments
			Min/Max	Data Type	Codes/Values	
ST01	Transaction Identification Code	R	2/2	ID	00	In order to ensure this unique number is returned on your 997, it is recommended this number not repeat for 180 days.
ST02	Transaction Set Control Number	R	1/30	AN		The unique number that will be returned on your 997.

Usage: Situational

Segment Max Use within Loop: 5

Loop ID: 2430

Example: CAS\*CO\*A1\*25~

**NOTE: Prepaid Health Plans (PHP) must send a Claim Adjustment Reason Code (CARC) at the service line level whenever service is denied/not paid.**

**Business Rules relating to Claim Adjustment Reason Codes (Disposition Codes):**

- If the service/detail line is Paid, Accepted, or \$0 paid (formerly Disposition Code = A01) - do not send Loop 2430/CAS segment.
- If the service/detail line is Denied/No Payment (formerly Disposition Code = Reject Code), send Loop 2430 CAS segment w/appropriate/CARC.
- Some CARC Codes do not apply to DHS encounter data. These codes were not cross-walked and the claim will receive an error if you use the codes.

ELEMENT	NAME	USE	ATTRIBUTES			Comments
			Min/Max	Data Type	Codes/Values	
CAS02	Adjustment Reason Code	R	1/5	ID		Use one Claim Adjustment Reason Code only when payment / service is one the PHP has no liability for. Will cross-walk code to the Encounter Disposition Reason Codes.

837 Transaction  
Coordination of Benefits  
Examples for **Encounter**

**Note: These are examples only and are not intended to show all situations that could potentially occur. This is only DHS' expectation of the data for the situations most commonly found for Encounter data received at this time.**

Loop 2000B–Subscriber Hierarchical Level is a required loop and thus is always expected. When a patient is enrolled in a Prepaid Healthcare Plan (Plan), Medicaid (DHS) is never the primary payer. Within this loop the:

- \* SBR01-Payer Responsibility Sequence Number is expected to be “S” showing Medicaid as the secondary payer.
- \* SBR09-Claim Filing Indicator Code must be MC (Medicaid) indicating Medicaid as the payer this information is being sent to and has the current responsibility for adjudication.

When the patient is enrolled in a Plan, the following information is expected when the plan is the primary payer:

- \* Send one 2320-Other Subscriber Information loop with the SBR01-Payer Responsibility Sequence Number Code of “P” (primary) showing the Plan as the Primary payer.
- \* If the service line is paid, accepted or \$0 paid, do not send the CAS segment in the 2320-Other Subscriber Information loop, 2330B-Other Payer Name loop or 2430-Line Adjudication loop.
- \* If the PHP has accepted no liability at the service line , send a 2430-Line Adjudication loop with a CAS segment containing the appropriate Claim Adjustment Reason Code (CARC). When there is a 2430-Line Adjudication loop, send a 2330B-Other Payer Name loop with the NM109-Other Payer Primary Identifier, which must match the SVD01-Other Payer Primary Identifier in the 2430-Line Adjudication loop.
