This catalog listing indicates the various imagery coverage used by the U.S. Department of Agriculture (USDA) from 1955 to the present. It shows imagery used primarily by the Farm Service Agency (FSA) and the Natural Resouces and Conservation Service (NRCS). For imagery prior to 1955, please contact the National Archives at:

Coverage is listed alphabetically by county. A Federal Information Processing Standard (FIPS) numerical code was assigned to each county after July 1, 1971. The prior years of imagery were assigned an alpha code, shown in parenthesis.

Some form of an index (i.e. digital, line, photo, spot) is available for most imagery projects. The number of index sheets required for each project is shown on this listing.

Rectified enlargements are available upon request from imagery that was used for the FSA and some NRCS programs. Rectified means scale, tip and tilt data has been computed through an analytical aerotriangulation system and this allows for the production of true-to-scale enlargements for indicated projects.

Current aerial imagery is now obtainable in a digital format on CD or DVD media. Compressed County Mosaics (CCM) and associated Quarter Quads (QQ) are available as indicated in the catalog listing. NAIP 2002 will have no CCM's.

Scanning aerial imagery film on repository at the APFO can also produce digital imagery products. Please review information provided at <http://www.fsa.usda.gov/FSA/apfoapp?area=home&subject=prod&topic=pds> or, contact our Customer Service Section for further details on these products.

Offered in the catalog listing at each of the county's headings, is the FSA office address and phone number for that particular county. You may wish to visit this office to view the current imagery and have them assist you in purchasing aerial imagery from the APFO.
