

MEMORANDUM
Oregon State Police

DATE: January 31, 2006

TO: LEDS Users

FROM: Terry O'Connell, Director
Criminal Justice Information Systems Section

Reference: **CRIMEvue V3**

Effective March 27, 2006 at 0800 hrs the LEDS CRIMEvue V2 database will change over to the new CRIMEvue V3, NCIC 2000 transaction format. Some of the current LEDS transactions you perform may not work if your system is not appropriately upgraded to the CRIMEvue V3 transaction definitions. The latest definitions can be obtained from the LEDS Operations Center, or the CJIS Section Director Terry OConnell.

The transition to CRIMEvue V3 will take approximately four hours during which time LEDS specific transactions will not be processed (i.e. Oregon only Person files, and stolen article/vehicle files). LEDS will still continue to process queries to DMV and NCIC.

A new LEDS manual will be available online at our Website in late February, or early March for you to review. The new manual will only be available in electronic format, either from our website, or a CD provided upon request.

It is critical that this information be passed to all LEDS users, technical personnel, and your vendors. Contact the LEDS Operations Center at 503-378-5565, or myself (503 378 3055 x 55020), if you have further questions.
