TEN YEAR CRIME RATES BY CRIME CATEGORY

The chart below represents the rate of crime, by crime category, per 10,000 in population. Crime rates are based on simple averages. For example: in 2002 the rate of Crimes Against Persons (violent crimes) was 116.6 offenses per 10,000 in population. What this means is that for every 10,000 people, there was an average of 116.6 Crimes Against Persons.

A key point to remember is that while the actual number of criminal offense may increase from one year to the next, generally the population increases, as well. This means that the number of criminal offenses may be higher in 2002 than in 1993, but with the increase in population the actual rate of crime per 10,000 in population can be less.

In the ten years since 1993, the total number of criminal offenses has increased by 4.2 percent. However, with the increase in population, the rates of crime (by category) have changed as follows:

Crimes Against Persons (violent crimes) decreased by 33.3 percent.

Crimes Against Property decreased by 9.5 percent.

Behavioral Crimes (society crimes) decreased by 0.8 percent.

All three crime categories combined decreased by 9.7 percent.

The end result is that the average Oregonian's chance of being a victim of crime was less in 2002 than at any time since 1993.

Further information on crime rates by crime category can be found in sections 2, 3 and 4 of this report.
