

# Expected Outcomes

- It takes commitment, accountability and time for implementation to succeed
- **Long-term (~50+ years)**
  - Landscape strategies
    - Forest lands
      - Incremental improvements riparian/WQ/instream conditions
      - Benefits really don't appear for 60+ years
      - Rate and magnitude varies by ownership
    - Agricultural lands
      - Incremental improvements in WQ, limited habitat benefits?
  - Targeted Restoration
    - Creating HQ habitat for coho (and other sp.)

# Expected Outcomes (cont'd)

- **Short-term (now ~ 50+ years)**
  - Harvest management supports recovery
  - Hatchery management
    - Salmon and N. Umpqua populations viable
    - Existing hatchery programs support recovery
  - Habitat
    - Maintain existing land management protections
    - Targeted restoration
      - Increasing HQ habitat
      - Restore watershed processes to improve coho habitat
