A copy of Each Invoice listed must be provided with this Report

Signature of Person Completing Form - Signature of person certifying accuracy of report

Printed Name - Printed name of person certifying accuracy of report

Date - Date report completed

Telephone Number - Telephone number at which licensee can be reached.

GALLON / BARREL CONVERSION INFORMATION

The total amount of Gallons per invoice can be calculated by:

Multiplying the number of containers by factors shown below for that case size.

If other size containers are received, the factor can be calculated by

Number of bottles in case multiplied by number of liters in each bottle = total liters.

Total liters Multiplied by .26417 = Factor

Converting Liters to Gallons: Liters X .26417 = Gallons 31 Gallons = 1 Barrel (Cider)

Gallon Factors for Common Container Sizes

12 bottles @ .750 Liters = 2.37753 12 bottles @ .375 liters = 1.18877

When reporting Gallons or Barrels carry the decimal to two places.

Decimals of .005 or larger should be rounded up. Example 12.387 would be reported as 12.39.

Decimals of .004 and lower should be dropped. Example 12.384 would be 12.38.

This form should be prepared in duplicate: One copy to OLCC, One copy for your records. This report is not required if there are no shipments into Oregon in a given month.
