

CHAPTER 4. WEIGHT-MILE TAX

The weight-mile tax is one of two components of transportation taxes in Oregon; the other is the Gas, Use, and Jet Fuel Taxes (see Chapter 3). In general, vehicles are subject to only one of these two components. Heavy vehicles that are generally subject to the weight-mile tax are not subject to the use fuel tax. Revenue from the weight-mile tax is projected to be \$418.2 million in the 2003–05 biennium and \$455 million in the 2005-07 biennium. This tax revenue is dedicated to the construction and maintenance of roads in Oregon.

This tax is imposed on heavy vehicles according to a combination of the number of axles and/or combined weight of the vehicle and the number of miles driven. Studies show that, although fuel consumption increases with vehicle size and weight, it does not increase proportionately with cost responsibility. Above 26,000 pounds registered weight, the overall weight and axle loads become important factors in determining requirements for the strength of pavements, bridges, and other structures. Therefore, fuel tax is not a proper measure of cost responsibility for heavy vehicles.

The tax rate schedule changes as the weight of the vehicle increases from 26,000 pounds to 105,500 pounds, and the number of axles increases. Within each weight or axle group, a truck pays the stated amount multiplied by the number of miles the truck travels each year on Oregon public roads. The weight-mile tax schedules are based on results of cost responsibility studies that determine the fair share that heavy vehicles should pay for the maintenance, operation, and improvement of the state's highway system.

The tax rates consist of separate schedules for vehicles with registered weights between 26,001-80,000 pounds (Tax Table A) and those operated under special permit with registered weights between 80,001-105,500 pounds (Tax Table B). The tax tables and additional information are posted on the Internet at http://www.oregon.gov/ODOT/MCT/FORMS.shtml#Taxes_Fees.

Since 1947, the weight-mile tax schedules have been adjusted as the result of updated cost responsibility studies and revenue measures passed by the Legislature. The Office of Economic Analysis is responsible for producing the Highway Cost Allocation Study. The most recent edition of this study is available at <http://www.oregon.gov/DAS/OEA/highway.shtml>.

4.001 FARMING OPERATIONS

Oregon Statutes: 825.017(4), 825.017(18), and 825.024

Sunset Date: None

Year Enacted: 1983

| | Total |
|-------------------------|-------------|
| 2003–05 Revenue Impact: | \$2,800,000 |
| 2005–07 Revenue Impact: | \$3,000,000 |

DESCRIPTION: Vehicles used in conjunction with farming operations are exempt from the payment of weight-mile taxes. This includes implements of husbandry, low speed vehicles, and farm related equipment as referenced in the three Oregon statutes cited.

Implements of husbandry are those vehicles and trailers used exclusively in agricultural operations. The definition for farm related equipment is more inclusive and identifies uses incidental to farming operations such as transportation of supplies and equipment, as well as the personal use of vehicles by the farmer and the farmer’s family or employees. Low speed vehicles must be designed for off-road use, and no more than 15 percent of their mileage can be on the road.

Vehicles registered as farm equipment are used primarily off the road system, and in most cases, the transportation of such vehicles on the road is incidental to their use. Approximately two thirds of the vehicles operated in conjunction with farming weigh less than 26,000 pounds and are not subject to weight-mile taxation. This provision applies only to those farm vehicles that exceed 26,000 pounds.

It should be noted that farm vehicles are subject to the fuel taxes unless they are operated off the road system, in which case a refund is allowed under ORS 319.320(3). Because farm vehicles over 26,000 pounds pay fuel tax, they are not subject to weight-mile tax. Therefore, the revenue impact reported here is the difference between what they pay in fuel tax and what they would pay under the higher weight-mile tax.

PURPOSE: These laws may have been enacted to relieve all farmers of the recordkeeping necessary to comply with the weight-mile tax and perhaps to recognize the partial or seasonal use of this transportation system by these users.

WHO BENEFITS: There are approximately 39,500 farming operations in the state and about 43,400 registered farm vehicles.

EVALUATION: This expenditure appears to achieve its purpose. However, the benefit per farm is very small and probably does not provide a competitive edge for farming in Oregon. Of course, larger farming operations benefit according to the amount of equipment in operation. *[Evaluated by the Oregon Department of Transportation.]*

4.002 FOREST PRODUCTS ON COUNTY ROADS

Oregon Statute: 825.017(8)

Sunset Date: None

Year Enacted: 1977

| | Total |
|-------------------------|-------|
| 2003–05 Revenue Impact: | \$0 |
| 2005–07 Revenue Impact: | \$0 |

DESCRIPTION: Under certain conditions, vehicles used for the removal of forest products on a public road are exempt from the payment of weight-mile taxes. An agreement with the State Board of Forestry, the state forester, or an agency of the United States must authorize the use of the road and require the user to pay for or perform the construction or maintenance of the county road. In some cases, construction of specific roadway is necessary for the removal of forest products. This provision allows counties to contract with the users of a roadway for the maintenance and improvement of the specific section of roadway used.

PURPOSE: In most cases, the fuels and weight-mile taxes pay for the general use of the transportation system where tracking user damage to identifiable areas is difficult. In this case, however, the section of roadway over which heavy loads are moved is easily identified, and cost to the user can be more directly allocated to a specific section of roadway.

WHO BENEFITS: Nobody has used this provision recently. Potential beneficiaries include businesses that transport forest products to the extent that any required road maintenance costs are surpassed by the amount of refunds.

EVALUATION: This expenditure is ineffective in achieving its purpose as the costs of construction or maintenance of the county road would be higher than that of weight-mile tax.

Furthermore, virtually no one knows about this provision. The public works department of counties with major timber operations, the Forest Service, and timber industry representatives were contacted. There was only one case identified where this provision had been exercised, and it was approximately 30 years ago. *[Evaluated by the Oregon Department of Transportation.]*

4.003 ELEMENTARY AND SECONDARY SCHOOLS

Oregon Statute: 825.017(1)

Sunset Date: None

Year Enacted: Pre-1953

| | Total |
|-------------------------|-------------|
| 2003–05 Revenue Impact: | \$1,600,000 |
| 2005–07 Revenue Impact: | \$1,800,000 |

DESCRIPTION: Vehicles used by, or under contract with, any elementary or secondary school district are exempt from the payment of weight-mile taxes when engaged exclusively in

Weight-Mile Tax

transporting students to or from school or authorized school activities or those activities sponsored by the State Board of Higher Education.

Some vehicles are exempt from both the use fuel and weight mile taxes. Those vehicles are included in the revenue impact reported here and also in the fuels tax expenditure for Public Services (3.004), which has information for schools and Education Service Districts. However, it should be noted that vehicles would not be subject to both taxes. Vehicles that were subject to the weight-mile tax would be exempt from taxation on use fuel and vice-versa.

- PURPOSE:** Weight-mile taxation is generally applied to for-hire commercial vehicles. School buses are either owned by a school district or contractor supplying services to a school district and are not for-hire vehicles. This provision reduces the record keeping and audit cost of the refund application process.
- WHO BENEFITS:** There are about 230 school districts operating more than 1,200 elementary and secondary schools. This provision applies only to school buses that exceed 26,000 pounds. Approximately 70 percent of the miles traveled by school buses are in weight classes equal to or less than 26,000 pounds.
- EVALUATION:** This expenditure achieves its purpose. There is a significant change from the revenue impact from that previously reported. Vehicles in this category were previously exempt from weight-mile tax only, and, as a result, the benefit was calculated to be the difference between what would have been paid under weight mile taxation and that paid through taxes paid on use fuels. Effective September 1, 2000, and retroactive to September 1, 1999, a refund can be claimed for use fuels as well. *[Evaluated by the Oregon Department of Transportation.]*

4.004 GOVERNMENT OWNED OR OPERATED VEHICLES

Oregon Statutes: 825.017(11) and 825.017(13)

Sunset Date: None

Year Enacted: Pre-1953

| | Total |
|-------------------------|-------------|
| 2003–05 Revenue Impact: | \$4,700,000 |
| 2005–07 Revenue Impact: | \$5,200,000 |

- DESCRIPTION:** Vehicles being used in the performance of public services are exempt from weight-mile taxes. Exempt vehicles include those:
- Owned or operated by the United States, the state of Oregon, any county, city, town or municipality in this state, or any department of any of them except when owned or operated as a carrier for hire; or
 - Involved in transportation of United States mail on rural or star routes by contract or employed by the Postal Service.
- Those vehicles are included in the revenue impact reported here and also in the fuels tax expenditure Public Services (3.004). However, it should be noted that vehicles would not be subject to both taxes. Vehicles that were subject to weight-mile tax would be exempt from taxation on use fuel and vice versa.

PURPOSE: To avoid reciprocal taxation among public entities when the tax revenue would be used largely for the same purpose as the activity being taxed (road construction and maintenance).

WHO BENEFITS: Beneficiaries include 240 incorporated cities and towns, 36 counties, and the Postal Service. Some public service vehicles are exempt from both the use fuel and weight-mile taxes.

EVALUATION: This expenditure achieves its purpose. Cities and counties, the major beneficiaries of this provision, operate equipment subject to this tax largely in conjunction with the construction and maintenance of roads. Revenue generated through this tax is dedicated for this purpose, and this provision reduces the processing of funds prior to returning them to public agencies to be used for this purpose. This is an effective continuation of established policies that avoid the reciprocal taxation of governing agencies. *[Evaluated by the Oregon Department of Transportation.]*

4.005 PUBLIC MASS TRANSIT VEHICLES

Oregon Statute: 825.017(12)
 Sunset Date: None
 Year Enacted: 1977

| | Total |
|-------------------------|-------------|
| 2003–05 Revenue Impact: | \$3,200,000 |
| 2005–07 Revenue Impact: | \$3,500,000 |

DESCRIPTION: Vehicles owned or operated by a mass transit district are exempt from weight-mile taxes. Mass transit districts are units of government and many transit vehicles are owned by units of government.

Some transit vehicles are exempt from both the use fuel and weight-mile taxes. Those vehicles are included in the revenue impact reported here and also in the fuels tax expenditure Public Transportation (3.005). However, it should be noted that vehicles would not be subject to both taxes. Vehicles that were subject to weight-mile tax would be exempt from taxation on use fuel and vice versa.

PURPOSE: To lower the cost of providing public transportation services.

WHO BENEFITS: There are three mass transit districts in Oregon.

EVALUATION: This expenditure achieves its purpose. Without this exemption, fares could be higher, which would decrease ridership, particularly those from lower income groups. *[Evaluated by the Oregon Department of Transportation.]*

4.006 FIRE PROTECTION

Oregon Statute: 825.017(23)

Sunset Date: None

Year Enacted: 1977

| | Total |
|-------------------------|--------------------|
| 2003–05 Revenue Impact: | Less than \$50,000 |
| 2005–07 Revenue Impact: | Less than \$50,000 |

DESCRIPTION: Vehicles used for the purposes of forest protection and fire suppression are exempt from weight-mile taxes when directed by the state forester. This exemption also applies to the vehicles being moved to or from the work area.

It should be noted that fire protection vehicles are subject to fuel tax. Since they pay fuel tax, they are not subject to weight-mile tax. Therefore, the revenue estimate reported here is the difference between what they pay in fuel tax and what they would pay under the higher weight-mile tax. It should further be noted that many fire-fighting vehicles are owned by units of government.

PURPOSE: To lower the cost of providing fire protection services normally provided through public services, and to station additional water supply trucks near logging operations when deemed necessary by forestry officials.

WHO BENEFITS: The timber industry, forest owners, and firefighters.

EVALUATION: This expenditure appears to achieve its purpose. These fire protection vehicles are very few in number and operate primarily off the highway system; they would not be subject to taxation, with the exception of the provision that allows movement to and from the work area. This provision is effective, as the cost associated with record keeping and weight-mile audit would likely exceed any revenue generated. This is a minimal investment in supporting activities to protect Oregon’s forest resources.
[Evaluated by the Oregon Department of Transportation.]

4.007 CHARITABLE ORGANIZATIONS

Oregon Statute: 825.017(15)

Sunset Date: None

Year Enacted: 1977

| | Total |
|-------------------------|--------------------|
| 2003–05 Revenue Impact: | Less than \$50,000 |
| 2005–07 Revenue Impact: | Less than \$50,000 |

DESCRIPTION: Vehicles owned, or under contract with, a charitable organization are exempt from the payment of weight-mile taxes when engaged exclusively in performing transportation necessary to the operation of the charitable organization.

It should be noted that vehicles used by charitable organizations are subject to fuel tax. Because they pay fuel tax, they are not subject to weight-mile tax. Therefore, the revenue estimate reported here is the difference between what they pay in fuel tax and what they would pay under the higher weight-mile tax.

- PURPOSE: To help support services provided by charitable organizations that fulfill a socially desirable function.
- WHO BENEFITS: Charitable organizations operating vehicles that are registered by weight.
- EVALUATION: Although the benefit in this case is relatively small, this provision is believed to be effective in achieving its purpose. There are relatively few vehicles being operated by charitable organizations that exceed the 26,000 pounds lower limit of the rate schedules.
- Charitable organizations are excluded from all provisions of Chapter 825 of the ORS, which include operating authority and regulatory requirements prior to deregulation. At the time this exemption was passed, the exclusion from the provisions of Chapter 825 would have granted such organizations greater operating freedom and may have been the original incentive to provide this exemption. *[Evaluated by the Oregon Department of Transportation.]*
