## I. Introduction

The personal income tax, Oregon's largest source of revenue, accounts for 89 percent of the General Fund for the 2005–07 biennium. Because it is the state's primary revenue source for discretionary spending, information about this tax program is valuable to businesses, government officials, policymakers, and taxpayers, as well as the general public.

The purpose of this publication is to provide a foundation for understanding Oregon's personal income tax and to present statistical summaries of information about the personal income tax system. This edition of *Oregon Personal Income Tax Statistics* provides detailed statistics for tax year 2005 as well as historical tables and graphs comparing 2005 to previous years. The information is based on 2005 income tax returns received by the Department of Revenue in the 2006 calendar year.

This chapter highlights key statistics such as the number of filers, total income, and total tax liability for 2004 and 2005. It also outlines the structure of the report and explains how personal income tax is currently calculated, including a diagram outlining its main components. Chapter II provides a historical summary of returns and the following components: income and tax, adjustments, additions, subtractions, deductions, and credits.

Chapter III, the largest chapter, contains a series of tables detailing different components of the tax system for various groups of taxpayers. The tables provide data based on both an adjusted gross income distribution and an income quintile distribution. Other tables provide information by county or city.

Finally, the Appendices provide a history of the income tax brackets and rates (Oregon and federal); the Oregon exemption deductions and credits; federal personal exemptions and standard deductions; the 2 percent surplus refund (kicker); income tax law changes since 1980; a description of the data compiled in this report; and a glossary of terms.

### Highlights

- Tax year 2005 marked several records. The number of returns, the total Oregon adjusted gross income (AGI), and the total tax liability each reached higher values than any previous tax year.
- For tax year 2005, the Oregon Department of Revenue received over 1.69 million personal income tax returns, a 2.6 percent increase from 2004.

### Oregon Personal Income Tax Selected Statistics, 2004 and 2005

(Dollars in millions except where indicated)

	2004	2005	% Change
<b>Number of Returns</b>	<b>1,653,203</b>	<b>1,696,517</b>	<b>2.6%</b>
Full-Year	1,461,735	1,494,542	2.2%
Part-Year & Nonresident	191,468	201,975	5.5%
<b>Adjusted Gross Income</b>	<b>\$74,577</b>	<b>\$83,075</b>	<b>11.4%</b>
Full-Year	\$69,415	\$77,267	11.3%
Part-Year & Nonresident	\$5,162	\$5,808	12.5%
<b>Taxable Income</b>	<b>\$57,654</b>	<b>\$64,224</b>	<b>11.4%</b>
Full-Year	\$53,181	\$59,246	11.4%
Part-Year & Nonresident	\$4,473	\$4,978	11.3%
<b>Tax Liability</b>	<b>\$4,245</b>	<b>\$4,787</b>	<b>12.8%</b>
Full-Year	\$3,939	\$4,439	12.7%
Part-Year & Nonresident	\$306	\$348	13.9%
<b>Avg. AGI (dollars)</b>	<b>\$45,111</b>	<b>\$48,968</b>	<b>8.6%</b>
Full-Year	\$47,488	\$51,699	8.9%
Part-Year & Nonresident	\$26,962	\$28,756	6.7%
<b>Avg. Tax Liability (dollars)</b>	<b>\$2,568</b>	<b>\$2,822</b>	<b>9.9%</b>
Full-Year	\$2,695	\$2,970	10.2%
Part-Year & Nonresident	\$1,597	\$1,724	8.0%
<b>Effective Tax Rate*</b>	<b>5.7%</b>	<b>5.8%</b>	<b>1.2%</b>
Full-Year	5.7%	5.7%	1.2%
Part-Year & Nonresident	5.9%	6.0%	1.2%

\* Tax liability divided by adjusted gross income

- The total Oregon adjusted gross income of 2005 Oregon filers grew to \$83 billion, up 11.4 percent from 2004.
- The average AGI for all filers was \$48,968, 8.6 percent above the 2004 level. For full-year resident filers, the average AGI was \$51,699.
- The 2005 total tax liability for all filers was \$4.8 billion, up 12.8 percent from 2004. This is the third year of increasing liability.
- The average tax liability for all filers was \$2,822, growing 9.9 percent from \$2,568 in 2004. The average tax liability for full-year filers was \$2,970 in 2005.
- The number of taxpayers choosing to file their return electronically grew 15 percent from 2004 to roughly 860,000. Electronic returns now represent 50.7 percent of all returns.

## Report Structure

Because the starting point on Oregon's main tax form (Form 40) is federal adjusted gross income (AGI), this report includes information found on the federal tax forms — components of income and federal adjustments (gross income minus adjustments equals AGI).<sup>1</sup>

The federal and Oregon tax returns are organized into distinct sections, each focusing on a certain component of the income tax system. This report follows that structure and discusses each component separately. The flowchart on page five outlines the calculation of income taxes, while Chapter II provides summaries and historical trends for the following components:

- **Income and Tax** – The components of income are listed on the federal form and include wages, interest, and capital gains. The total of these components is referred to as gross income. Tax refers to the tax amount reported on the 2005 Oregon tax forms.
- **Adjustments** – These elements on the federal form are deductions (often referred to as “above-the-line deductions”) that all filers are allowed to take, including those who claim the standard deduction. They reduce the amount of income that is taxed. Examples include IRA contributions, moving expenses, and student loan interest. Gross income reduced by adjustments is referred to as federal adjusted gross income.
- **Additions** – These elements represent income that the federal government does not tax, but Oregon does. They are added to AGI on the Oregon form. Examples include interest on government bonds of other states and long-term care insurance premiums (if claiming a federal deduction and an Oregon credit for those premiums).
- **Subtractions** – These elements represent income that the federal government taxes, but Oregon does not. They are subtracted from AGI on the Oregon form. Examples include Social Security income and federal pension income.
- **Deductions** – Taxpayers are allowed to reduce the amount of income that is taxed by the total of their itemized deductions or the standard deduction, whichever is greater. Oregon allows the same itemized deductions as the federal government with two exceptions: (1) Oregon does not allow a deduction for state income taxes; and (2) Oregon does allow a deduction for certain medical expenses for elderly

---

<sup>1</sup> Technically, Oregon law ties to the federal definition of taxable income; however, it can be helpful to think of federal adjusted gross income as the starting point for determining Oregon taxes.

taxpayers. Examples of itemized deductions include property taxes paid, charitable gifts, and mortgage interest.

- **Credits** – These elements reduce tax liability on a dollar-for-dollar basis. The Working Family Child Care Credit and the Claim of Right Income Repayment Credit are refundable, while all others are non-refundable. If total credits exceed gross tax liability (tax before credits are applied), then part of the non-refundable credits remain unused, although some could be carried over to subsequent years. Refundable credits, on the other hand, can be viewed as payments to taxpayers. The credits are first used to reduce tax, but if the tax is reduced to zero, any unused credits are refunded to the taxpayer.

Chapter II, “2005 Summary and Historical Trends,” discusses each of the components in an historical context. Key figures from 2005 are compared to historical numbers to show trends and changes over time. Chapter III contains tables that provide detailed information for various groups of taxpayers for tax year 2005 only. For tables that include part-year resident and nonresident returns, only the Oregon portion of income is used.

Most exhibits and tables in Chapters I and II are devoted to full-year resident returns (as opposed to part-year resident and nonresident returns), which represent about 88 percent of all returns and constitute the most stable base for statistical inference. Focusing on full-year resident returns provides a clearer understanding of the income tax program for two reasons. First, the calculations involved with full-year returns are more straightforward because they do not involve the sharing of any income, deductions, or credits among states. Second, part-year resident and nonresident returns may reflect significant amounts of income and deductions that are not related to economic activity in Oregon.

Understanding how the tables are labeled is helpful when sorting through the detail provided in Chapter III. In general, the tables provide statistical information (counts, sums, and means) on the various components of tax calculations both overall and by AGI level or primary filer age for different groups of filers/types of returns. Additional tables provide county and city level information.

The two key pieces of information to knowing what data are in a given table are the letter designation and the group of taxpayers listed at the top of each table. Tables that have the same letter designation contain the same data but for different groups of taxpayers. For example, Table A provides a summary of total income and tax, so there is a “Table A” for full-year resident returns, part-year resident returns, each county, etc. For a more complete description of these tables, refer to page 31.

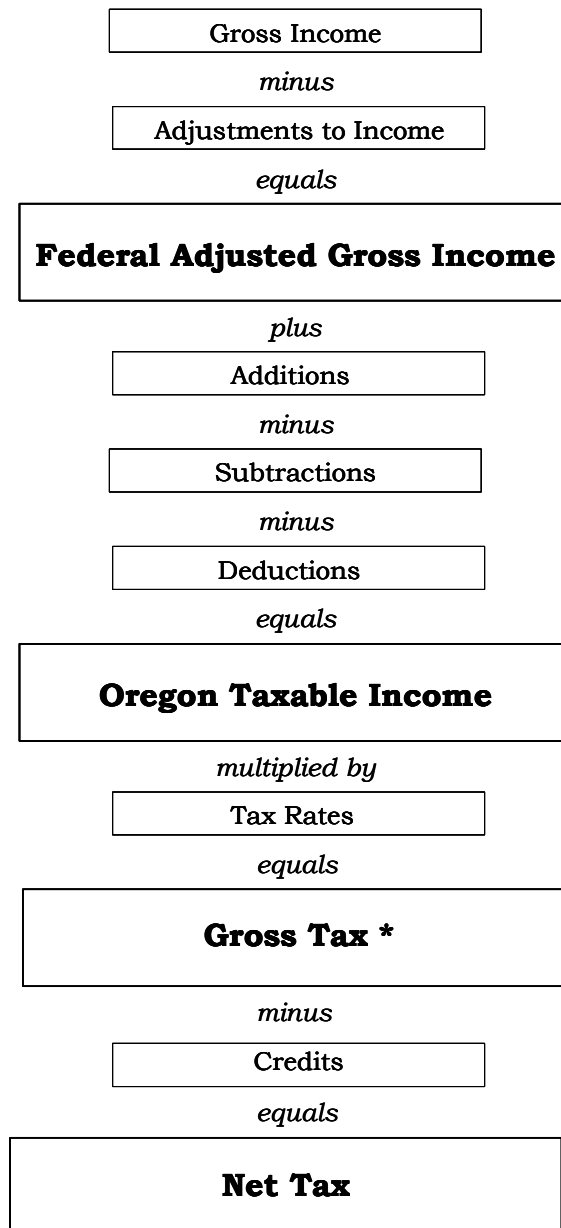

There are three terms to keep in mind when using this report:

- **Filer** refers to individuals who file a personal income tax return. Each return is associated with one filer (including joint returns which represent two taxpayers).
- **Taxpayer** is an individual who is represented by a return. In the case of joint returns, there are two taxpayers represented: the filer and the spouse.
- **Return** is an individual Oregon state personal income tax return. This may refer to the physical return or to the data information making up the return.

## Personal Income Tax Calculation

From 1997 to 2002, Oregon personal income tax law was continuously tied to the federal definition of taxable income. Oregon law automatically adopted changes made at the federal level that affected taxable income. The 2003 Legislature suspended this “rolling reconnect” for tax years 2003 through 2005. In 2005, the Legislature again established a rolling reconnect to the federal definition of taxable income (other definitions were connected to the federal law as of the end of 2004). The diagram below shows the full-year resident tax computation. See the next page for details about specific elements.

### How Oregon Personal Income Tax is Computed

\* For a small number of filers, Gross Tax includes interest on installment sales, farm capital gains taxed at five percent, or farm taxes calculated from income averaging.

The following examples are elements from the preceding diagram:

**Gross income includes:**

- Salaries and wages
- Interest
- Dividends
- State income tax refunds (if deductions were itemized in the prior year)
- Alimony received
- Business income/loss
- Farm income/loss
- Capital gains/losses
- Rental income
- Royalties
- Partnership income/loss
- Estate and trust income
- S corporation income
- Unemployment compensation
- Social Security income taxed at the federal level
- Retirement plan distributions

**Adjustments to income include:**

- IRA, SIMPLE, and SEP contributions
- Self-employment health insurance
- Forfeited interest
- Moving expenses
- Alimony paid
- Self-employment tax
- Student loan interest
- Tuition and fees
- Educator expenses
- Qualified business expenses
- Health savings account contributions

**Additions include:**

- Interest on bonds of other states
- Federal deduction for long-term care insurance premiums
- Federal income tax refunds from an amended or audited return
- Federal deduction of unused business credits
- Lump-sum payment from a qualified retirement plan

**Subtractions include:**

- Oregon income tax refunds
- Social Security income
- Federal income tax (up to \$4,500 or \$2,250 if married filing separately)
- Federal pension income
- U.S. bond interest
- Military active duty pay
- Scholarship awards used for housing expenses

**Deductions (standard or itemized):**

- **Standard deduction:**
  - \$3,545 if joint filer, or
  - \$2,855 if head of household filer, or
  - \$1,770 if single filer, or
  - \$1,770 if married filing separately, or
  - One of the listed four amounts plus an additional \$1,000 for each taxpayer age at least 65 or blind. The additional amount is \$1,200 for single and head-of-household filers.
- **Itemized deductions include:**
  - Medical and dental expenses
  - Property taxes
  - Home mortgage interest
  - Investment interest
  - Charitable gifts
  - Casualty or theft losses
  - Special medical deduction

**Tax credits include:**

- Personal exemption of \$154
- Earned income
- Working family childcare (refundable)
- Child and dependent care
- Political contribution
- Elderly or permanently disabled
- Retirement income
- Income tax paid to other states

**Tax Rates**

The tax rates and brackets for tax year 2005 are in the table below. The rates are applied to Oregon taxable income of taxpayers represented by individual returns. Income for returns with filing status of single or married filing separately is subject to lower brackets. Income for returns with filing status of either joint or head of household is subject to higher brackets. The three tax rates have not changed since 1987, but the tax brackets have been indexed for inflation since 1993, and currently use the U.S. City Average Consumer Price Index (CPI) as the gauge of inflation.

<b>For persons filing single or married filing separately</b>	
If taxable income is:	then tax is:
Not over \$2,650 .....	5% of taxable income
Over \$2,650 but not over \$6,650 .....	\$133 plus 7% of excess over \$2,650
Over \$6,650 .....	\$413 plus 9% of excess over \$6,650
<b>For persons filing joint, head of household, or qualifying widow(er) with dependent child</b>	
If taxable income is:	then tax is:
Not over \$5,300 .....	5% of taxable income
Over \$5,300 but not over \$13,300 .....	\$265 plus 7% of excess over \$5,300
Over \$13,300 .....	\$825 plus 9% of excess over \$13,300

For part-year residents, tax rates are applied to federal income (the sum of Oregon and non-Oregon income). The resulting tax is apportioned to Oregon based on the ratio of Oregon income to federal income. For nonresidents, federal tax and standard or itemized deductions are prorated based on the ratio of Oregon income to federal income and the tax rates are applied to income from Oregon sources.

Some Oregon credits, such as the exemption credit, child and dependent care credit, and credit for the elderly or the disabled, are prorated for part-year residents and nonresidents.

A history of Oregon tax rates and brackets is on page 179. For additional information, please refer to the Oregon Department of Revenue's *Publication 17½, Oregon Individual Income Tax Guide*, 2005 edition. For additional information on adjustments, deductions, subtractions, and credits, refer to the State of Oregon 2007–09 *Tax Expenditure Report*. This publication is available on the web at [www.oregon.gov/DOR/STATS](http://www.oregon.gov/DOR/STATS).

## II. 2005 Summary and Historical Trends

In this chapter, data for the 2005 tax year are summarized and compared to data from previous years. The number and types of returns filed are discussed first, followed by income and tax trends. Summaries of adjustments, additions, subtractions, deductions, and credits are followed by information on part-year filers and county level data. When making year-to-year comparisons, tax law changes should be considered. Appendix F provides a synopsis of tax law changes affecting tax years 1980–2005. Appendix G provides detail about the data on which this report is based.

### Returns

Exhibit 1 shows the number of 2005 returns by form type and filing status. Full-year residents are required to use either Form 40 or Form 40S, part-year residents Form 40P, and nonresidents Form 40N. Of over 1.69 million returns filed for tax year 2005, roughly 69 percent (1.17 million) used Oregon’s Form 40. Full-year residents are allowed to use Form 40S only if they meet certain requirements, including using the standard deduction and having income from only wages, interest, ordinary dividends, and unemployment compensation.

#### EXHIBIT 1

All 2005 Returns	Married-					Total
	Single	Joint	Filing-Separately	Head-of-Household	Qualifying Widow(er)	
<b>Long Form (40)</b>	440,091	605,246	14,904	108,159	718	1,169,118
<b>Non-Resident (40N)</b>	45,027	73,996	2,648	9,294	40	131,005
<b>Part-Year (40P)</b>	36,826	27,203	1,652	5,264	25	70,970
<b>Short Form (40S)</b>	227,442	43,478	4,792	49,632	80	325,424
<b>Total</b>	<b>749,386</b>	<b>749,923</b>	<b>23,996</b>	<b>172,349</b>	<b>863</b>	<b>1,696,517</b>

### Returns – Historical Trends

Following three years of decline in the number of income tax returns, the number of returns increased in both 2004 and 2005, exceeding the previous peak number found in tax year 2000. Growth was seen in both resident and nonresident returns. It is most likely due to underlying increases in employment, improvements in economic conditions, and population growth due to migration. Exhibit 2 shows the trend in returns filed since 1995 for all returns and full-year resident returns.

#### EXHIBIT 2

The table to the right shows the number of filers in each tax bracket. In 2005, Oregon’s top tax rate of 9 percent took effect at \$6,650 of taxable income for single filers and \$13,300 for joint filers. Most filers (70 percent) have some income taxed at the top rate. It should be noted that a portion of the income of these taxpayers is also taxed at the 5 and 7 percent rates.

All 2005 Returns		
	Returns	Share
No Taxable Income	137,206	8.1%
5% bracket	152,421	9.0%
7% bracket	218,443	12.9%
9% bracket	1,188,447	70.1%

There was no significant change in the percentage of returns at each bracket as compared to tax year 2004.

**Electronic Returns**

The state of Oregon started offering electronic filing with a limited pilot project in 1993. Since 1994, the growth of electronic filing has been dramatic, as shown in Exhibit 3. This growth can be attributed to a number of factors. Between 1994 and 1997, only professional tax preparers could file electronic returns. During this time, the number of electronic filers tripled from roughly 35,000 to just over 113,000. In 1998, individuals who prepared their own returns were allowed to file electronically for the first time and growth was 45 percent. In 1999, nonresident and part-year resident filers were allowed to file electronically, and growth again increased to 52 percent. A strong growth in electronic filing for 2004 can be explained by several factors. The IRS introduced ‘e-services,’ a web incentive service for tax preparers who e-file. Additionally, more software companies supported Oregon electronic filing and more e-filing training was offered to tax preparers by the IRS and Department of Revenue. Growth was stronger among nonresident and part-year resident returns than full-year returns. This is likely associated with e-file mandates in other states.

**EXHIBIT 3**

Notes: 1998 was the first year self-prepared returns could be filed electronically.  
 1999 was the first year part-year resident and nonresident returns could be filed electronically.

Exhibit 4 shows the percent of full-year electronic filers by income level for 2004 and 2005. The exhibit shows that for both 2004 and 2005, as income rises, filers are less likely to file an electronic return. It also shows that the increase in the percentage of electronic filers seen in 2005 occurred over all income levels. Though not shown here, it is also true that the increase occurred across the full range of filer ages.

It is important to note that even though electronic returns were filed for all AGI levels, they do not necessarily represent all returns in a statistically valid manner.

**Age of Taxpayers**

Exhibits 5 and 6 show information on returns filed by age of the taxpayers represented (i.e., for joint returns both the primary and the spouse are represented). There was at least one return filed for every age between 0 (younger than 1 year old) and 100, as well as many filers above the age of 100. (If parents set up investments in the child’s name, then taxable income from the investment would require a return to be filed in the child’s name.) The estimated number of Oregonians at each age is also displayed for reference; note that Oregon income taxpayers are not all Oregonians.

**EXHIBIT 4**

**EXHIBIT 5**

Notes: Age is not known for some taxpayers, so some are not represented. The chart represents 2.22 million taxpayers including non-residents. Oregon population age is based on Department of Administrative Services data.

Exhibit 6 shows the percentage of all returns filed electronically by age of the primary filer. At least half of filers between ages 22 to 49 filed electronically. Filers 34 years old were most likely to file electronically (59 percent). This is a slight increase over the previous year's peak of 55 percent, which occurred at the age of 35.

**EXHIBIT 6**

### Income and Tax

Exhibit 7 is a summary of the number of returns, adjusted gross income (AGI), and Oregon tax liability by residency status. Full-year resident returns account for 88 percent of the returns and 93 percent of Oregon AGI and tax liability in 2005. This is nearly identical to the previous year, except for the overall increase in the number of returns.

**EXHIBIT 7**

Return Type (All 2005 Returns)	Returns		AGI		Tax Liability	
	Number	Percent	\$ (Million)	Percent	\$ (Million)	Percent
<b>Full-Year (40 &amp; 40S)</b>	1,494,542	88%	77,267	93%	4,439	93%
<b>Non-Resident (40N)</b>	131,005	8%	4,048	5%	243	5%
<b>Part-Year (40P)</b>	70,970	4%	1,760	2%	106	2%
<b>Total</b>	<b>1,696,517</b>	<b>100%</b>	<b>83,075</b>	<b>100%</b>	<b>4,787</b>	<b>100%</b>

### Income – Historical Trends

Total Oregon adjusted gross income (AGI) increased by 11.4 percent to \$83 billion (its highest level) in 2005. Exhibit 8 shows the level of AGI for tax years 1995 to 2005. Between 1995 and 2000, AGI grew 8.2 percent annually; from 2000 to 2002 it fell by an average of 3.1 percent per year, followed by 7.7 percent annual growth from 2002 to 2005.

Over one-third of the total growth in 2005 can be attributed to increased wage income which grew by 6 percent, while 59 percent growth in capital gains accounted for another 34 percent of the total growth (based on full-year residents). 2005 saw near record AGI growth of 11.4 percent, close to the all-time high of 11.7 percent growth in 1997.

**EXHIBIT 8**

### Tax – Historical Trends

Exhibit 9 shows the history of total personal income tax liability from 1995 to 2005. Oregon personal income tax liability followed the same general trend as income but in a more exaggerated fashion. This can

be seen by comparing Exhibit 8 to Exhibit 9. More pronounced peaks and dips can be linked to the progressive nature of Oregon income tax.

In 2005, tax liability totaled \$4.79 billion, a 12.8 percent increase over the previous year, and reached a new peak. As with AGI the last ten years, the growth rate of tax liability peaked in 1997 — at 13.1 percent — due largely to significant growth in capital gains. For the full-year returns tax liability growth also reached its maximum of 12.7 percent in 2005. The increases in 2003-2005 followed two years of decreases.

**EXHIBIT 9**

Tables A and B on pages 35 and 36 provide additional detail on the number of returns, AGI, and tax for all 2005 returns. Tables A and B on pages 47 and 48 provide the same detail for full-year filers.

**Effective Tax Rates**

Exhibit 10 shows two effective tax rates – tax as a percent of AGI, and tax as a percent of taxable income – for full-year resident filers in 2005.

Tax as a percent of AGI (the top chart in Exhibit 10) provides a sense of the tax rate necessary to apply to AGI to raise the same amount of revenue as current tax law. It essentially averages all deductions and credits used across all filers.

The rate climbs quickly from zero to 4.5 percent for filers with income of roughly \$35,000. The rate continues to increase but at a slower pace and gradually reaches 7.4 percent for the top income filers.

**EXHIBIT 10**

The effective tax rate is influenced significantly by subtractions and deductions (standard and itemized), which tend to lower it. The effective tax rate increases for taxpayers with higher incomes because the effect of subtractions and deductions wears off fast for high income, while at the same time a greater share of it taxed at 9 percent. The overall effective tax rate is 5.7 percent, which corresponds to the rate at an AGI level of roughly \$95,000.

Tax as a percent of taxable income (the bottom chart in Exhibit 10) shows the average tax rate at each income level. It has the same general shape as the top chart, just shifted up on the percent axis. The rate increases quickly to 7 percent, then gradually approaches 9 percent. The rate will not reach 9 percent, because every taxpayer has some income taxed at the 5 and 7 percent rates.

**Distribution of Returns, Income, and Tax by AGI Level**

Exhibit 11 contains three charts that show the percentages of full-year resident returns, the percentages of total AGI, and the percentages of total tax by AGI levels for 1995 and 2005.

The information conveys two main points: (1) the differences among the concentrations of returns, AGI, and tax liability; and (2) how those differences have changed over the last ten years.

Starting with the first of these points, the charts show that the majority of returns report lower income while returns representing higher-income taxpayers have a higher share of income and an even higher share of tax liability.

Based on the number of returns, low-income returns represent a relatively small part of the total AGI, and an even smaller part of the total tax liability. On the other hand, high-income returns represent a relatively large part of the total AGI, and an even larger part of the total tax liability.

**EXHIBIT 11**

**Returns by AGI Level**

(Full-Year Returns, 1995 and 2005)

For example, consider two different groups: low-income returns reporting under \$25,000 in AGI, and high-income returns reporting over \$300,000 in AGI. For 2005 full-year resident returns, the low-income group accounted for 41 percent of the returns, 9 percent of the AGI, and 5 percent of the tax liability. On the other hand, the high-income group accounted for only 1 percent of the returns, almost 18 percent of the AGI, and 24 percent of the tax liability. This uneven distribution of AGI and tax liability is more exaggerated this year than in tax year 2004.

Exhibit 11 also shows the changes in the distributions between 1995 and 2005. Compared to tax year 1995, there are more returns at higher income levels. Following the general increase in income, the percentage of total income and percentage of total tax has also shifted to higher income returns.

### EXHIBIT 12

Income Component (2005 Full-Year Returns)	Gross Income (\$ Million)	Tax Liability (\$ Million)
<b>Wages, Salaries, Tips</b>	51,051 (65%)	2,881 (65%)
<b>Dividends &amp; Interest</b>	3,431 (4%)	169 (4%)
<b>Capital Gains</b>	7,158 (9%)	501 (11%)
<b>Business</b>	3,103 (4%)	151 (3%)
<b>Retirement</b>	8,497 (11%)	301 (7%)
<b>Rent, Partnership, S Corp</b>	5,132 (7%)	376 (8%)
<b>Farm</b>	-241 (0%)	-7 (0%)
<b>Miscellaneous</b>	526 (1%)	67 (2%)
<b>Total</b>	<b>78,657 (100%)</b>	<b>4,439 (100%)</b>

Note: Tax liability values represent the sum of individual returns' tax apportioned to each income component based on the relative size of the component.

Another way to see the uneven distribution is to compare the group of all returns reporting less than the median tax to the group reporting more than the median tax. Each group represents 50 percent of the returns, but the first group accounts for only 6 percent of the total tax liability while the second group accounts for the remaining 94 percent.

### Components of Income and Tax

Exhibit 12 shows federal gross income components based on the federal tax forms: The retirement component includes pension income, social security income, and IRA distributions. The miscellaneous component includes alimony, unemployment, and other income. The tax liability associated with each component is determined by apportioning the tax according to the component's share of gross income on an individual return basis.

As shown in Exhibit 12, wages are the dominant source of income, representing \$51 billion of the \$78.7 billion total, or 65 percent. Taxes apportioned to wages in 2005 amounted to roughly \$2.9 billion of the \$4.4 billion (65 percent) total for full-year resident filers.

The capital gains and rent, partnership, and S corporation income components represent 9 and 7 percent of the total income respectively, but comprise 11 and 8 percent of the total tax. This indicates that returns with a higher proportion of these income components tend to pay somewhat higher tax. The reverse is true of the retirement income component. It represents 11 percent of the total income, but only 7 percent of the tax, indicating that returns with a high proportion of retirement income tend to pay somewhat lower tax.

**Components of Income - Historical**

This section discusses federal gross income historically using similar income components. Exhibit 13 shows these income sources for tax years 1995 through 2005 for full-year resident filers. In this exhibit, income from rent, partnerships, and S corporations is included in the business category; farm income is included in the miscellaneous category.

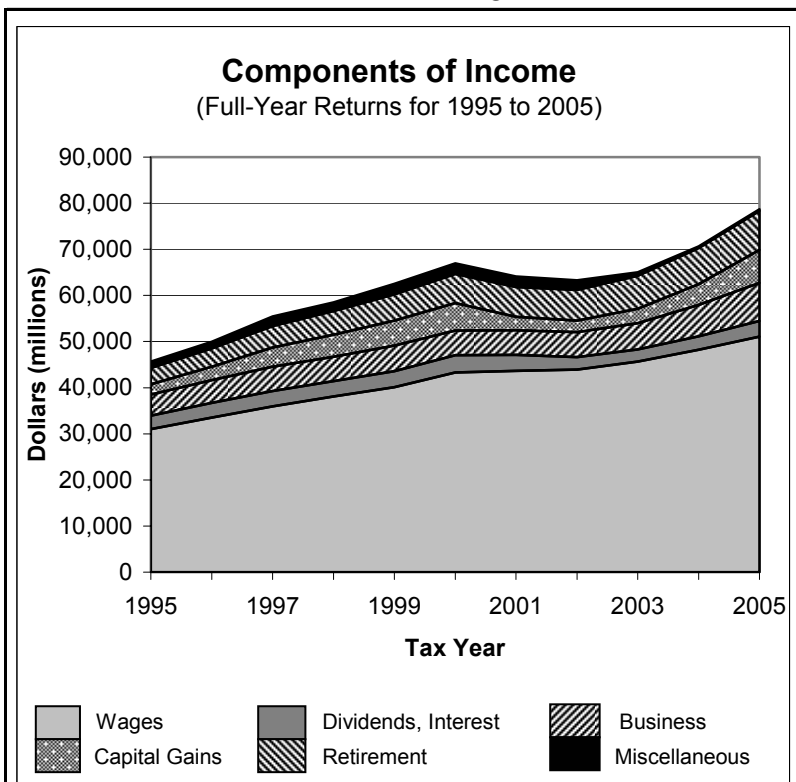

Overall, gross income rose steadily throughout the 1990s, followed by a dip in 2001 and 2002. Two things caused the dip. The total of all income components except capital gains simply experienced a flattening in 2001 and 2002. In addition, there was a significant decline in capital gains. These effects resulted in net declines in 2001 and 2002, followed by increases in 2003-2005.

The composition of income for 2005 differed somewhat from 2004: wage income as a percentage of the total declined by 3.4 percent and capital gains income increased by 2.7 percent. This was the result of 5.9 percent annual growth in wages compared to 59 percent growth in capital gains.

Wages comprised the greatest share of income, representing roughly 65 percent of income for all full-year returns in 2005; the next two most significant income sources were pensions (11 percent) and capital gains (9 percent).

Exhibit 13 also shows that gross income in 2005 set new record over previous peak last year. More information on the components of AGI is in Tables D and D.1 on pages 50-60.

**EXHIBIT 13**

Note: Due to improvements in data handling for 2003, roughly \$1.1 billion has been moved from Miscellaneous to all other categories, with most (86%) going to Wages.

### Adjustments

Exhibit 14 illustrates the distribution of federal adjustments to gross income (above-the-line deductions) claimed on full-year returns in 2004 and 2005. Adjustments are deductions that all filers may take if qualified, regardless of whether deductions are itemized. They are found on federal Forms 1040 and 1040A and are subtracted from gross income when computing federal AGI. Oregon ties to federal AGI with a few exceptions. For example, domestic production activities deduction allowed on federal return, is not permitted for Oregon, so it is not shown. (See Table E.1, page 66.)

#### EXHIBIT 14

#### Federal Adjustments to Gross Income

(Full-Year Returns, 2004 and 2005)

Exhibit 15 shows that the most frequently claimed deduction was for federal self-employment taxes. Taxpayers who are self-employed are required to make payments in lieu of Social Security and Medicare taxes. These payments, called self-employment taxes, represent the taxes that are usually paid by both the employer and employee. Essentially, this deduction allows self-employed taxpayers to subtract the employee portion of the payments from their gross income. Oregonians deducted \$266 million of self-employment taxes for tax year 2005.

The three adjustments associated with self-employment (self-employment tax, self-employment health insurance, and tax deferred SEP and SIMPLE plans) together account for 61 percent of the total amount claimed. Over 17 percent of full-year resident returns claimed one of these adjustments. Additional detail on income adjustments for 2005 can be found in Tables E and E.1 on pages 61-66.

### EXHIBIT 15

<b>Federal Adjustments*</b> (2005 Full-Year Returns)	<b>Number of Claims</b>	<b>Percent of Total</b>	<b>Amount Claimed (\$000)</b>	<b>Percent of Total</b>	<b>Average Claim (\$)</b>
<b>IRA Contributions</b>	47,278	8.9%	174,073	12.9%	3,682
<b>Student Loan Interest</b>	102,864	19.4%	70,193	5.2%	682
<b>Moving Expenses</b>	7,018	1.3%	12,993	1.0%	1,851
<b>Self-Employment Tax</b>	178,272	33.7%	266,193	19.7%	1,493
<b>Self-Emp Health Insurance</b>	61,402	11.6%	292,799	21.6%	4,769
<b>SEP, SIMPLE</b>	20,712	3.9%	271,694	20.1%	13,118
<b>Penalty on Early Wthdrw</b>	8,876	1.7%	2,248	0.2%	253
<b>Alimony Paid</b>	9,779	1.8%	119,026	8.8%	12,172
<b>Tuition/Fees</b>	54,372	10.3%	120,759	8.9%	2,221
<b>Educator Expenses</b>	30,774	5.8%	7,334	0.5%	238
<b>Employee Business Exp.</b>	1,346	0.3%	2,771	0.2%	2,058
<b>Health Savings Accnts</b>	5,547	1.0%	13,190	1.0%	2,378
<b>Other/Unknown</b>	978	0.2%	435	0.0%	444
<b>Total</b>	<b>529,218</b>	<b>100.0%</b>	<b>1,353,706</b>	<b>100.0%</b>	

\* This table only contains information on federal adjustments that Oregon ties to. The deduction for domestic production activities is not shown, since Oregon does not tie to it.

### Additions and Subtractions

Additions and subtractions adjust the federal AGI to account for income that Oregon taxes or does not tax, respectively. Exhibit 16 shows the amount of Oregon additions and subtractions in the past 10 years for full-year resident filers.

#### Additions

The top chart in Exhibit 16 shows that additions over the decade from 1995 to 2005 ranged between \$144 million in 2000 and \$239 million in 2005.

Although total additions are small compared to gross income or subtractions, they are very significant for some returns. Some taxpayers pay a significant amount of Oregon income tax due solely to Oregon additions. Without the additions, they would have little or no tax liability.

#### Subtractions

The bottom chart in Exhibit 16 shows Oregon total subtractions generally increasing since 1995. Because the federal income tax subtraction represents nearly half of all subtractions, it is shown separately in the exhibit and throughout this publication.

There was 12 percent growth in subtractions in 2005, due primarily to a 13.1 percent increase in the federal tax subtraction and 16.1 percent hike in the Social Security income subtraction.

The federal tax subtraction has historically been the largest subtraction. Although the limit on the maximum amount that can be subtracted has increased significantly in recent years, the increases have not caused commensurate growth in the amount claimed. This is most likely due to federal tax reductions. The federal tax cuts in 1998 and 2001 and the recession of 2001 and 2002 caused this subtraction to decline by 0.7 percent in 1998, 2 percent in 2001, and 3.7 percent in 2002.

For each major subtraction, Exhibit 17 shows the number of claimants, the average and total amount of the subtraction claimed, and the share each subtraction represents of the total amount subtracted. Additional detail on additions and subtractions for 2005 can be found in Tables F and F.1 on pages 67 and 68.

**EXHIBIT 17**

<b>Subtractions</b> (2005 Full-Year Returns)	<b>Number of Claims</b>	<b>Average (\$)</b>	<b>Total (\$ millions)</b>	<b>Percent</b>
<b>Federal Tax</b>	1,054,129	2,765	2,915	46%
<b>Social Security</b>	163,861	9,760	1,599	25%
<b>Income Tax Refunds</b>	398,596	1,056	421	7%
<b>U.S. Bonds</b>	71,581	2,429	174	3%
<b>Federal Pension</b>	41,026	20,540	843	13%
<b>Other</b>	119,718	3,659	438	7%
<b>Total</b>			6,389	100%

### Deductions

In general, taxpayers who itemize their federal deductions also itemize their Oregon deductions. The most significant of these deductions include home mortgage interest, local income and property taxes, charitable contributions, and some medical expenses.

Exhibit 18 shows the percent of filers claiming either a standard deduction or itemized deductions on their Oregon return. Overall, the share of full-year resident filers using itemized deductions has grown steadily since 1995. Although the quantity of returns was similar for the two deduction types, the total dollar amount for itemized deductions far exceeded the amount for standard deductions, accounting for 87 percent of the \$13.6 billion in total deductions for full-year returns.

**EXHIBIT 18**

When a taxpayer itemizes deductions, their federal and Oregon deductions must equal each other, with two exceptions. First, Oregon does not allow the deduction for state income taxes. Second, Oregon allows a special medical deduction for taxpayers age 62 or older. This deduction is the amount of medical and dental expenses that could not be deducted on the federal Schedule A.

While most filers use the same type of deduction on both the federal and Oregon returns, some taxpayers will itemize deductions only for the federal return or only for the Oregon return, but not both. The exception can occur if a significant share of the federal itemized amount is due to state income taxes. In this case, some filers find that their Oregon standard deduction is greater than the total of their other itemized deductions. Similarly, some filers who itemized their deductions for Oregon due to a significant special medical deduction may use the standard deduction on their federal return.

Tables G and H on pages 71 and 72 contain additional detail concerning standard and itemized deductions for full-year resident filers.

## Credits

### Credits Claimed vs. Credits Used

Exhibit 19 shows the credits claimed and used by full-year return filers in 2005. If the total credit amount exceeds the pre-credit tax liability then a credit remains unused for a tax year. The personal exemption credit was the most widely claimed credit with more than 1.39 million full-year filers claiming a total of \$462.5 million. About 90 percent of this amount could be used with the remaining 10 percent being unused by filers because their credits claimed exceeded their pre-credit tax liability.

While the average personal exemption credit claimed was \$331, on average only \$297 was used. The credit for income taxes paid to another state was the largest average claim and the second largest total amount used. Filers used almost all of this credit. In contrast, only 55 percent of the retirement credit was used, and just 9 percent of the elderly or disabled credit amount claimed could be used.

### EXHIBIT 19

Credits Claimed and Used (2005 Full-Year Returns)	Number of Claims	Total (\$ Million)		Average (\$)		Percent Used
		Amount Claimed	Amount Used	Amount Claimed	Amount Used	
Personal Exemption	1,396,531	462.5	414.8	331	297	89.7%
Earned Income	194,119	16.8	12.9	86	67	77.1%
Working Family Child Care	26,554	21.7	21.7	817	817	100.0%
Retirement	9,122	2.3	1.3	250	138	55.2%
Child and Dependent Care	44,514	9.9	8.4	222	189	85.0%
Elderly or Disabled	807	0.1	0.0	167	15	8.7%
Political Contributions	79,160	5.4	5.2	69	65	95.0%
Income Taxes Paid to Another State	12,268	35.2	35.1	2,867	2,863	99.9%
Other	69,652	45.5	39.0	653	560	85.7%
<b>Total</b>		<b>599.4</b>	<b>538.4</b>			<b>89.8%</b>

Note: The number of claims reflects counts of all returns which claim the credit amount. This differs from Table I.1 which provides the number of returns with an amount used (as opposed to claimed).

The working family child care credit is the only credit listed above that is refundable, which means that it can be viewed as a payment of tax (like withholding or estimated payments). This means that any portion of the credit that is greater than the filer's pre-credit tax liability is refunded to the filer (such returns are termed *nontaxable*). If the tax liability is reduced to zero and a credit amount remains, the filer receives a refund payment for the remaining excess. Essentially, the income tax system pays out to the taxpayer as opposed to the taxpayer paying into the system. Consequently, Exhibit 19 shows that the amount of this credit claimed equaled the amount used. Of the \$21.7 million in working family credits, roughly \$5.5 million acted to directly offset tax liability, while roughly \$16.2 million was in excess of tax liability and was refunded to taxpayers.

Considering both resident and nonresident filers, there were over 16,000 nontaxable returns warranting a refund-of-credit payment of this refundable credit, with an average refund-of-credit payment of \$1,044 (the actual net amount refunded would also include the filer's withholding and estimated payments, as well as the refund-of-credit, and then be reduced by any outstanding balance from other tax years).

**Credits – Historical Trends**

Exhibit 20 shows the recent history of Oregon credits used by full-year resident filers. Because 77 percent of the total is due to the personal exemption credit, it is shown separately.

Growth in total credits has been relatively stable. The earned income and working family childcare credits were first allowed in 1997. Together, they accounted for roughly 58 percent of the growth between 1996 and 1997. In total, full-year resident filers claimed \$538.4 million in credits for 2005, with the personal exemption credit accounting for \$414.8 million.

Of the remaining \$123.6 million of credits, the largest shares (\$35.2 million and \$21.7 million) were due to the credit for income taxes paid to another state and the working family childcare credit respectively. The growth in total credits used in 2003 was largely due to the working family childcare credit becoming refundable; the recent growth in 2005 is largely due to the exemption credit growing. More information on credits can be found in Table I and I.1 on pages 73 and 74.

**EXHIBIT 20**

### Part-Year Residents

The number of part-year return filers moving to Oregon (based on the address reported on the return) ranged between roughly 32,000 and 41,000 from 1995 to 2005. Exhibits 21, 22, and 23 show information on part-year residents entering or leaving Oregon.

Exhibit 21 shows the total number of filers moving to and from Oregon between 1995 and 2005. In every year, the number of filers moving into Oregon exceeded the number moving out. Table A on page 117 provides a breakdown of part-year filers by AGI category.

#### EXHIBIT 21

Exhibit 22 shows the number and percent of in-migrants by county of destination for selected tax years. In 2005, as in previous years, in-migrants were drawn to counties roughly in proportion to current county populations. The three counties that comprise the Portland metropolitan area—Multnomah, Washington, and Clackamas—contain 42.5 percent of the state’s population and attracted 49 percent of the in-migrants. Lane and Deschutes counties were the next most popular destinations.

Exhibit 23 shows the number of income tax filers moving from Oregon for selected tax years by state of destination. In 2005, taxpayers moved from Oregon to all 49 other states, Washington, D.C., some U.S. territories, and several other countries. The most frequent destinations were the border states of Washington and California, which attracted almost 44 percent of all out-migrants.

**EXHIBIT 22**

**Number of Filers Moving to Oregon by County of Destination**

County	1995		2004		2005		County Share of State Population
	Number	Percent	Number	Percent	Number	Percent	
Baker	161	0.4%	149	0.4%	143	0.3%	0.5%
Benton	1,108	2.9%	762	2.1%	969	2.4%	2.3%

## County Data

This section provides tax information by county to show how taxpayer characteristics vary by region. Exhibit 24 shows a breakdown of the number of returns, total Oregon AGI, and total tax liability by county, and the percent change from 2004 to 2005. Exhibits 25 and 26 are maps showing average AGI and tax liability for all returns in each county, and Exhibit 27 shows effective tax rates by county.

Most counties showed growth in the number of returns, and all showed growth in income. The following Central and Eastern Oregon counties led the state in percentage growth:

- Number of returns: Benton, Clackamas, and Jefferson
- Income: Benton, Deschutes, and Jefferson
- Tax liability: Benton, Jefferson and Deschutes

The map in Exhibit 25 shows that 21 counties had average adjusted gross incomes above \$40,000—Benton, Clackamas, Clatsop, Columbia, Crook, Curry, Deschutes, Douglas, Jackson, Josephine, Hood River, Klamath, Lane, Linn, Lincoln, Marion, Multnomah, Polk, Tillamook, Washington, and Yamhill. The counties with the highest averages were Benton (\$54,897), Clackamas (\$64,622), Deschutes (\$55,099), Multnomah (\$52,771), Washington (\$67,290), and Yamhill (\$52,826).

The map in Exhibit 26 shows that counties with highest AGI also had the highest tax liabilities, with the exception of Josephine and Tillamook counties. The largest average of \$4,209 was in Washington County. The statewide average was approximately \$2,970.

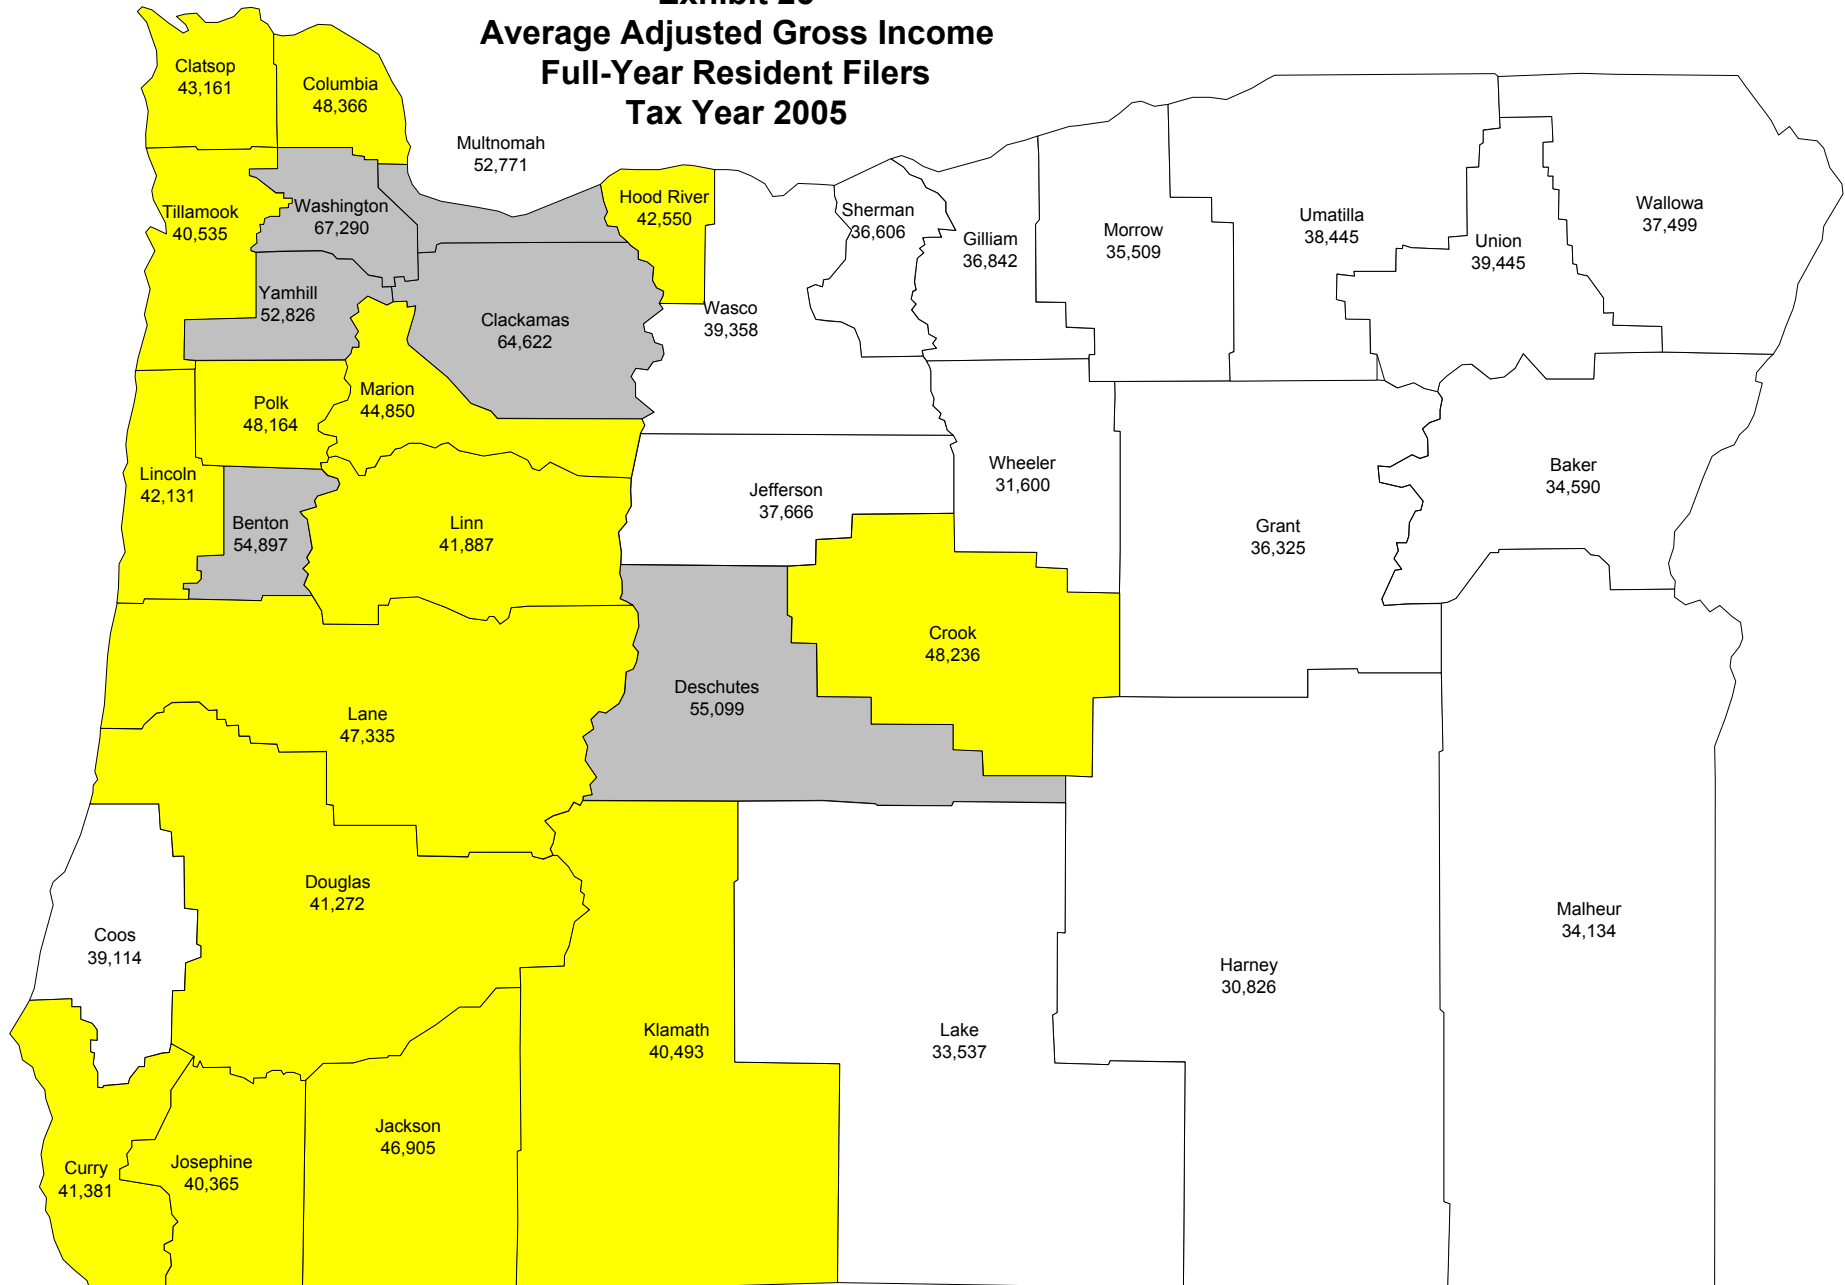

The map in Exhibit 27 shows effective tax rates (tax divided by AGI) for each county. Washington County's effective tax rate was 6.3 percent, followed by Clackamas with 6.0 percent, and Multnomah (5.9 percent) and Benton Counties (5.8 percent). Jefferson County had the lowest rate at 4.7 percent.

EXHIBIT 24

DISTRIBUTION OF RETURNS, AGI, AND TAX LIABILITY, BY COUNTY

County or Area	All 2005 Returns						% Change 2004 to 2005

## Exhibit 25 Average Adjusted Gross Income Full-Year Resident Filers Tax Year 2005

Statewide Average AGI equals \$51,699

\$30,000 to \$39,999   
  \$40,000 to \$49,999   
  \$50,000 to \$68,000

## Exhibit 26 Average Tax Liability Full-Year Resident Filers Tax Year 2005

Statewide Average Net Tax Equals \$2,970

□ \$1,500 to \$2,099	■ \$2,100 to \$2,699	■ \$2,700 to \$4,300
----------------------	----------------------	----------------------

**Exhibit 27**  
**Effective Tax Rates**  
**Full-Year Resident Filers**  
**Tax Year 2005**

Statewide Average Effective Rate Equals 5.7%

4.7% to 5.3%   
  5.4% to 5.7%   
  5.8% to 6.3%

### III. Detailed Tables

Two items noted in each table in this chapter can help explain their parameters:

- (1) the letter designation (e.g., Table A); and
- (2) the group of taxpayers (e.g., All 2004 returns).

There are 12 different types of primary tables (Tables A through L) and seven secondary tables (Tables D.1, E.1, F.1, I.1, J.1, K.1, and L.1). Each secondary table provides additional detail for the corresponding primary table.

Tables that have the same letter designation contain the same type of information, except for different groups of taxpayers. For example, Table A is a summary of total income and tax, so there is a “Table A” for both full-year resident returns and part-year resident returns, as well as other groups of taxpayers. The list below shows the categories used in each table.

<b>Table A:</b>	Total AGI, deductions, credits, and net tax.
<b>Table B:</b>	Average AGI, deductions, credits, and net tax.
<b>Table C:</b>	Number of filers for each filing status, itemized returns, and form used.
<b>Table D:</b>	Total for each component of income (e.g., wages) and federal adjustment.
<b>Table D.1:</b>	Average amounts and number of claimants for each component of income (e.g., wages) and federal adjustment.
<b>Table E:</b>	Total for each federal adjustment (i.e., above-the-line deduction).
<b>Table E.1:</b>	Average amounts and number of claimants for each federal adjustment (i.e., above-the-line deduction).
<b>Table F:</b>	Total for each Oregon addition and subtraction.
<b>Table F.1:</b>	Average amounts and number of claimants for each Oregon addition and subtraction.
<b>Table G:</b>	Number of filers who claimed the Oregon standard deduction and the additional deduction for the elderly or blind.
<b>Table H:</b>	Number of filers who itemized their federal and Oregon deductions, including the special medical deduction for the elderly.
<b>Table I:</b>	Total for each Oregon credit.
<b>Table I.1:</b>	Average amounts and number of claimants for each Oregon credit.
<b>Table J:</b>	Number of personal, severely disabled, and disabled child exemptions.
<b>Table J.1:</b>	Number of personal exemption credits.
<b>Table K:</b>	Total amounts of withholding, estimated payments, tax paid with returns, refunds, and donations to charities.
<b>Table K.1:</b>	Average amounts and number of returns with withholding, estimated payments, tax paid with returns, refunds, and donations to charities.
<b>Table L:</b>	Total amounts of federal taxes and credits.
<b>Table L.1:</b>	Average amounts and number of returns with federal tax and credits.

## Tables for All Returns

The tables in this section include information for all 2005 personal income tax returns filed during calendar year 2006. Only certain tables are included in this section because some information is available only for full-year resident returns.

For part-year resident and nonresident returns, the adjusted gross income (AGI) reported in the tables is the Oregon amount, and the AGI level in which each return appears is determined by its Oregon AGI. The table below shows the AGI levels for each quintile group provided in the detailed tables.

<b>Quintile Group</b>	<b>AGI Range</b>
First 20%	Less than \$9,500
Second 20%	\$9,500 - \$21,600
Middle 20%	\$21,600 - \$38,900
Fourth 20%	\$38,900 - \$68,000
Next 15%	\$68,000 - \$131,600
Next 4%	\$131,600 - \$307,400
Top 1%	\$307,400 +

## Tables for All Full-Year Resident Returns

This section contains tables for full-year resident returns, which comprise approximately 88 percent of all returns. These tables represent the strongest base for statistical reference because Oregon adjusted gross income and federal adjusted gross income are identical.

The table below shows the AGI levels for each quintile group provided in the detailed tables.

<b>Quintile Group</b>	<b>AGI Range</b>
First 20%	Less than \$11,200
Second 20%	\$11,200 - \$23,600
Middle 20%	\$23,600 - \$41,400
Fourth 20%	\$41,400 - \$70,900
Next 15%	\$70,900 - \$135,900
Next 4%	\$135,900 - \$316,000
Top 1%	\$316,000 +

# Tables for Part-Year Resident and Nonresident Returns

This section contains two tables summarizing Oregon adjusted gross income and tax by Oregon income range for both part-year resident returns and nonresident returns.

The tables below show the AGI levels for each quintile group provided in the detailed tables.

## Part-Year Resident Returns

Quintile Group	AGI Range
First 20%	Less than \$3,500
Second 20%	\$3,500 - \$8,400
Middle 20%	\$8,400 - \$16,400
Fourth 20%	\$16,400 - \$33,700
Next 15%	\$33,700 - \$79,100
Next 4%	\$79,100 - \$168,600
Top 1%	\$168,600 +

## Nonresident Returns

Quintile Group	AGI Range
First 20%	Less than \$1,800
Second 20%	\$1,800 - \$8,500
Middle 20%	\$8,500 - \$23,400
Fourth 20%	\$23,400 - \$47,200
Next 15%	\$47,200 - \$96,800
Next 4%	\$96,800 - \$258,600
Top 1%	\$258,600 +

<sup>1</sup>Schedule E income sources include: rental real estate, royalties, partnerships, S corporations, and trusts.

<sup>2</sup>All other income includes: taxable state income tax refunds, alimony received, unemployment compensation, and other income.

## **Tables for Individual Counties and Other States**

This section summarizes total income and tax by adjusted gross income level for each of the 36 Oregon counties and five areas outside Oregon.

Clark County, Washington, is reported separately from the remainder of Washington because so many Clark County residents work in Portland. Idaho and California also have individual tables. Returns from all other states are grouped together in one table.

**TABLE A: TOTAL INCOME AND TAX (THOUSANDS OF DOLLARS)**

**All 2005 Baker County returns**

## **Tables for All Returns by City**

This section contains two tables for the top 80 cities in terms of returns filed for tax year 2005. The tables summarize total adjusted gross income and tax, and average income and tax. The returns are categorized according to the city identified with the address provided on the return.

**TABLE A: TOTAL INCOME AND TAX (THOUSANDS OF DOLLARS)**

**All 2005 returns**

\* For incomes in these ranges, a special worksheet provided by the IRS is needed to determine tax liability.

## APPENDIX C

### OREGON PERSONAL EXEMPTION DEDUCTIONS AND EXEMPTION CREDITS

(TAX YEARS 1930 TO 2005)

#### Personal Exemption Deductions 1930 to 1982

Tax Years		Deduction for Single Return	Deduction for Joint Return	Deduction for Each Dependent
From	To			
1930	1932	\$1,500	\$2,500	\$400
1933	1944	\$800	\$1,500	\$300
1945	1946	\$750	\$1,500	\$300
1947	1947	\$500	\$1,000	\$300
1948	1952	\$750	\$1,500	\$300
1953	1954	\$600	\$1,200	\$600
1955	1956	\$500	\$1,000	\$500
1957	1969	\$600	\$1,200	\$600
1970	1970	\$625	\$1,250	\$625
1971	1974	\$675	\$1,350	\$675
1975	1978	\$750	\$1,500	\$750
1979	1982	\$1,000	\$2,000	\$1,000

#### Personal Exemption Credits 1983 to 2005

Tax Year	Amount
1983 - 1986	\$85
1987	\$86
1988	\$89
1989	\$94
1990	\$98
1991	\$104
1992	\$109
1993	\$113
1994	\$116
1995	\$120
1996	\$124
1997	\$128
1998	\$132
1999	\$134
2000	\$139
2001	\$142
2002	\$145
2003	\$147
2004	\$151
2005	\$154

Beginning with 1983 returns, the personal exemption deduction was changed to a personal exemption credit. Since 1987, the personal exemption credit has been adjusted for inflation.

## APPENDIX D

### Federal Personal Exemptions and Standard Deductions

(Tax Years 1988 to 2005)

#### Federal Personal Exemption and Phaseouts

Tax Year	Personal Exemption	Phaseout by Filing Status			
		Single	Joint	Separate	Head of Household
1988	\$1,950				
1989	\$2,000				
1990	\$2,050				
1991	\$2,150	\$100,000	\$150,000	\$75,000	\$125,000
1992	\$2,300	\$105,250	\$157,900	\$78,950	\$131,550
1993	\$2,350	\$108,450	\$162,700	\$81,350	\$135,600
1994	\$2,450	\$111,800	\$167,700	\$83,850	\$139,750
1995	\$2,500	\$114,700	\$172,050	\$86,025	\$143,350
1996	\$2,550	\$117,950	\$176,950	\$88,475	\$147,450
1997	\$2,650	\$121,200	\$181,800	\$90,900	\$151,500
1998	\$2,700	\$124,500	\$186,800	\$93,400	\$155,650
1999	\$2,750	\$126,600	\$189,950	\$94,475	\$158,300
2000	\$2,800	\$128,950	\$193,400	\$96,700	\$161,150
2001	\$2,900	\$132,950	\$199,450	\$99,725	\$166,200
2002	\$3,000	\$137,300	\$206,000	\$103,000	\$171,650
2003	\$3,050	\$139,500	\$209,250	\$104,625	\$174,400
2004	\$3,100	\$142,700	\$214,050	\$107,025	\$178,350
2005	\$3,200	\$145,950	\$218,950	\$109,475	\$182,450

#### Federal Standard Deductions and Phaseouts for Itemized Deductions

Tax Year	Federal Standard Deductions				Phaseout	
	Single	Joint	Separate	Head of Household	Single/Joint/HoH	Separate
1988	\$3,000	\$5,000	\$2,500	\$4,400		
1989	\$3,100	\$5,200	\$2,600	\$4,550		
1990	\$3,250	\$5,450	\$2,700	\$4,750		
1991	\$3,400	\$5,700	\$2,850	\$5,000	\$100,000	\$50,000
1992	\$3,600	\$6,000	\$3,000	\$5,250	\$105,250	\$52,625
1993	\$3,700	\$6,200	\$3,100	\$5,450	\$108,450	\$54,225
1994	\$3,800	\$6,350	\$3,150	\$5,600	\$111,800	\$55,900
1995	\$3,900	\$6,550	\$3,250	\$5,750	\$114,700	\$57,350
1996	\$4,000	\$6,700	\$3,350	\$5,900	\$117,950	\$58,975
1997	\$4,150	\$6,900	\$3,450	\$6,050	\$121,200	\$60,600
1998	\$4,250	\$7,100	\$3,550	\$6,250	\$124,500	\$62,250
1999	\$4,300	\$7,200	\$3,600	\$6,350	\$126,600	\$63,300
2000	\$4,400	\$7,350	\$3,675	\$6,450	\$128,950	\$64,475
2001	\$4,550	\$7,600	\$3,800	\$6,650	\$132,950	\$66,475
2002	\$4,700	\$7,850	\$3,925	\$6,900	\$137,300	\$68,650
2003	\$4,750	\$9,500	\$4,750	\$7,000	\$139,500	\$69,750
2004	\$4,850	\$9,700	\$4,850	\$7,150	\$142,700	\$71,350
2005	\$5,000	\$10,000	\$5,000	\$7,300	\$145,950	\$72,975

## Appendix E

### 2 Percent Surplus Refund (Kicker) History

The 1979 Oregon Legislature passed the “2 percent kicker” law, which requires the state to refund excess revenue to taxpayers when actual General Fund revenues exceed the forecast amount by more than 2 percent.

This limitation is applied separately to corporate income tax revenue and the sum of personal income tax revenue and all other General Fund revenue. If revenues from the corporation income tax exceed their forecast by more than 2 percent, then all revenue in excess of the forecast is refunded to corporations. If revenues from all other General Fund sources exceed their forecast, the total excess is refunded to individuals through the personal income tax program. The information included here pertains only to the personal income tax kicker.

Prior to 1994, these refunds were made via a tax credit on the Oregon tax form for the calendar year in which the biennium ended. For example, actual revenues exceeded the forecast amount for the 1987–89 biennium (which ended on June 30, 1989), so the credit was allowed on the 1989 tax returns.

The 1995 Oregon Legislature changed the law governing the method by which the refund was issued to taxpayers. Since 1995, the refunds have been made as direct payments to taxpayers via a check based on their liability for the first full calendar year of the biennium.

These checks are mailed to taxpayers in the year in which the biennium ends and are commonly referred to as “kicker checks.” For example, actual revenues exceeded the forecast amount for the 1997–99 biennium so refunds were required. Based on 1998 income tax liability, taxpayers were issued checks in the fall of 1999.

Since the inception of the kicker law, refunds have been issued for seven of the 12 biennia. In the first two biennia (1979–81 and 1981–83) the state experienced a budget shortfall. Surpluses in each of the next three biennia resulted in refunds.

For the 1989–91 biennium, the surplus of \$186 million would have resulted in a credit of approximately 10 percent, but the Legislature voted to suspend the kicker. The state experienced a surplus for 1991–93 but it was less than 2 percent, so refunds were not issued. In each of the following four biennia, surpluses exceeded the 2 percent limit so refunds were issued that ranged from 4.6 percent to 14.4 percent of a taxpayer’s liability. A kicker is being forecast for the 2005-07 biennium.

<b>2 Percent Personal Income Kicker History</b>					
Biennium	Year*	Surplus/ Shortfall (\$ Million)	Credit or Refund*		
			Percentage	Mean (\$)	Median (\$)
1979-81	1981	-141.0	None	----	----
1981-83	1983	-115.2	None	----	----
1983-85	1985	88.7	7.7%	81	48
1985-87	1987	224.2	16.6%	192	103
1987-89	1989	175.2	9.8%	133	69
1989-91	1991	185.9	Suspended	----	----
1991-93	1993	60.1	None	----	----
1993-95	1995	162.8	6.27%	111	55
1995-97	1997	431.5	14.37%	287	140
1997-99	1999	167.3	4.57%	103	49
1999-01	2001	253.6	6.02%	155	70
2001-03	2003	-1249.5	None	---	---
2003-05	2005	-401.3	None	---	---

\* Prior to 1995, the kicker was returned to taxpayers via a credit on the tax return, so "Year" corresponds to the tax year. Since 1995, refund checks have been mailed directly to taxpayers. In these cases, "Year" reflects the year when the kicker was distributed.

# Appendix F

## Tax Law Changes 1980 to 2005

This appendix is a synopsis of tax law changes from 1980 to 2005. This information is helpful when comparing the personal income tax statistics from year to year.

### Adjusted Gross Income (AGI)

The definition of Oregon AGI has been the same as federal AGI, except for tax year 1984. In 1983, changes in federal tax law began the taxation of part of Social Security income and eliminated the disability income exclusion.

Oregon has never taxed Social Security income; the state also continued the disability income exclusion for tax year 1984. Oregon AGI was computed, for tax year 1984 only, as federal AGI minus taxable Social Security and disability income exclusion.

Starting with tax year 1985, Oregon AGI has been the same as federal AGI, and federally taxed Social Security income has been treated as a subtraction from AGI.

### Personal Exemptions and Exemption Credits

Prior to 1983, personal exemptions were deductions from Oregon AGI. In 1983, the personal exemption deduction was replaced by an \$85 exemption credit.

Since tax year 1987, the personal exemption credit has been indexed for inflation. From 1987 to 2001, the index was based on the Portland Consumer Price Index (CPI).

In 2002, the inflation index was changed to the U.S. city average. See Appendix C for the history of the personal exemption deduction and credit.

### Surplus Refunds

Under a law passed in 1979, the state must refund excess revenue to taxpayers when actual General Fund revenues exceed the forecast amount by more than 2 percent.

This limitation, termed the “2 percent kicker,” is applied separately to corporate income tax revenues and to the sum of personal income tax and all

other General Fund revenue. The state is required to refund to corporate and personal income tax filers the full amount by which each forecast was exceeded, not just the amount exceeding the 2 percent limit.

See Appendix E for detail and a history of the personal income tax kicker.

### Part-Year Resident and Nonresident Returns

Before 1983, both part-year residents and nonresidents were taxed on the portion of federal income attributable to Oregon sources.

Oregon tax law was changed so that tax for both part-year residents and nonresidents was computed on federal AGI and then prorated based on the ratio of Oregon to federal adjusted gross income. This resulted in higher tax for most filers.

Objections by Washington residents led to a special legislative session in 1984. The tax computation for nonresident filers was changed back to the way it had been before 1983, but part-year residents’ tax continued to be computed on federal income and prorated.

### Tax Law Changes by Year

#### Tax Year 1981

##### *Federal Law*

- The Economic Recovery Tax Act (ERTA) was passed. Generally, it lowered tax rates and made adjustments to counter the effects of inflation. Many of these changes became effective in subsequent tax years.
- The Accelerated Cost Recovery System (ACRS) went into effect for claiming depreciation of tangible assets.

##### *Oregon Law*

- No major changes.

#### Tax Year 1982

##### *Federal Law*

- The rates for all tax brackets were reduced.

- A new deduction was allowed for married couples filing a joint return; the maximum deduction was \$1,500.
- Non-itemizers could deduct 25 percent of their charitable contributions, up to \$25.

#### ***Oregon Law***

- The tax rates increased from 4 percent through 10 percent to 4.2 percent through 10.8 percent. The increase lasted for three years. Appendix A shows the complete rate and bracket structure.
- The weatherization and jobs tax credits ended in 1981 and could no longer be claimed.

### **Tax Year 1983**

#### ***Federal Law***

- The rates for all tax brackets were reduced.
- The two-earner married couple deduction increased to a maximum of \$3,000.
- Itemizers could deduct medical and dental expenses only to the extent they exceeded 5 percent of AGI.
- Nonbusiness casualty and theft losses could only be deducted to the extent they exceeded 10 percent of the taxpayer's AGI.

#### ***Oregon Law***

- The personal exemption deduction was changed to a personal exemption credit.
- A credit for fish habitat improvements became effective.

### **Tax Year 1984**

#### ***Federal Law***

- The number of tax brackets increased from 13 to 15 while the tax rates for most brackets were reduced.
- Non-itemizers could deduct 25 percent of their charitable contributions, up to \$75.
- The holding period for long-term capital gains for property acquired between June 22, 1984, and January 1, 1988 was reduced from one year to six months.
- A portion of Social Security benefits became taxable under certain circumstances.

#### ***Oregon Law***

- A subtraction was created for Social Security benefits that were taxed at the federal level. In

effect, these benefits remained untaxed by Oregon.

### **Tax Year 1985**

#### ***Federal Law***

- Non-itemizers could deduct one-half of their charitable contributions.

#### ***Oregon Law***

- The tax rates decreased from 4.2 percent through 10.8 percent to 4 percent through 10 percent. Appendix A shows the complete rate and bracket structure.
- The childcare credit was modified to be 40 percent of the federal childcare credit.
- A new credit was created for donating unsaleable fish to a gleaning cooperative or a member of Oregon Food Share.

### **Tax Year 1986**

#### ***Federal Law***

- Non-itemizers could deduct all of their charitable contributions.

#### ***Oregon Law***

- An additional exemption credit was allowed for disabled children.
- Two other new credits were created: the alternative transportation credit and the reclaimed plastic credit.

### **Tax Year 1987**

#### ***Federal Law***

Many features of the Tax Reform Act of 1986 first took effect in 1987. Some key features of the law included:

- The number of tax brackets was reduced from 15 to five. Tax rates, which had ranged from 11 percent to 50 percent, were reduced to between 11 and 38.5 percent.
- The personal exemption was increased from \$1,080 to \$1,900.
- The zero bracket was replaced by a standard deduction based on filing status.
- The additional personal exemption for those 65 or older or blind was changed to an additional standard deduction.

- A taxpayer claimed as a dependent on someone else's return could no longer claim a personal exemption on their own return.

The standard deduction for those claiming zero exemptions was the greater of \$500 or their earned income, up to the standard deduction amount of their filing status.

- Itemized deductions were curtailed in several ways: elimination of deduction for sales tax, more stringent limitations on medical expenses (7.5 percent floor), establishment of a 2 percent of AGI floor for miscellaneous itemized deductions, and a deduction limitation of 65 percent of consumer credit interest.
- The dividend exclusion, the deduction for married couples when both work, and the moving expense deduction (except as an itemized deduction) were eliminated.
- The referential treatment of capital gains was eliminated, making capital gains 100 percent taxable.
- A deduction for charitable contributions was available only to itemizers.
- "Passive activity" losses were no longer allowed to shelter income from other sources.
- The Accelerated Cost Recovery System (ACRS) was modified. The most significant change was the increase in the depreciation period for real estate investments.
- Income averaging was repealed.
- More stringent requirements were added to eligibility for the adjustment for Individual Retirement Account contributions.
- Added a new adjustment for self-employed health insurance deduction.
- The alternative minimum tax (AMT) rate increased to 21 percent.

#### ***Oregon Law***

- The tax rate structure was simplified by limiting the number of brackets to three, with tax rates of 5, 7, and 9 percent.
- The standard deduction amounts were raised and simplified: single, \$1,800; joint, \$3,000; head of household, \$2,640; and married filing separately, \$1,500.
- The personal exemption credit was indexed to inflation.

- The special tax on preference items was repealed.
- The maximum subtraction for federal tax was reduced from \$7,000 to \$3,000 for single, joint, and head-of-household returns and from \$3,500 to \$1,500 for married-filing-separate returns.
- The maximum subtraction for U.S. public retirement was increased from \$3,400 to \$5,000 per person; less restrictive requirements were adopted.
- The additional personal exemption for those 65 or older or blind was changed to an additional standard deduction. The additional standard deduction is \$1,200 for single or head-of-household filers and \$1,000 for married filing either jointly or separately.
- A taxpayer who could be claimed as a dependent on someone else's return was no longer allowed to claim a personal exemption on their own return. The standard deduction for those claiming zero exemptions was the greater of \$500 or their earned income, up to the standard deduction amount of their filing status.
- The credit for the permanently and totally disabled was increased from 15 percent of the federal amount to 40 percent of the federal amount.

### **Tax Year 1988**

#### ***Federal Law***

- The two top marginal rates – 35 percent and 38.5 percent – were replaced with a maximum rate of 33 percent.
- The home mortgage interest deduction became unlimited depending on the date of the mortgage.
- Consumer interest deduction was limited to 40 percent.

#### ***Oregon Law***

- Two new credits became effective: dependent care assistance for employers and health insurance for small business employers.

### **Tax Year 1989**

#### ***Federal Law***

- Parents could elect to report minor children's investment income on their own federal return rather than filing a separate return for each child.

- Consumer interest deduction was limited to 20 percent.

#### ***Oregon Law***

- In response to the federal change regarding a minor child's investment income, a new addition — “federal election on interest and dividends of a minor child” — was added to Oregon forms.
- Oregon's childcare credit computation was changed. A separate Oregon rate schedule based on federal taxable income was applied to federally allowed childcare expenses.

### **Tax Year 1990**

#### ***Federal Law***

- If used for higher education purposes, interest from Series EE U.S. savings bonds was excluded from income.
- Filers were required to pay interest on the deferred tax liability for certain installment sales.
- Consumer interest deduction was limited to 10 percent.

#### ***Oregon Law***

- The United States public retirement subtraction was no longer limited to \$5,000 per person.
- Filers who deferred the tax liability for certain installment sales were required to make an interest payment.
- Three new credits became effective:
  - Rural medical practitioners.
  - Farm worker housing.
  - Fish screening devices.
- The alternative transportation credit was eliminated.

### **Tax Year 1991**

#### ***Federal Law***

- The top marginal tax rate was reduced to 31 percent.
- The top capital gains tax rate was limited to 28 percent.
- The AMT rate increased to 24 percent.
- Personal exemptions were phased out for taxpayers above a threshold amount.

- Itemized deductions were phased out for taxpayers above a threshold amount.
- Consumer interest deduction was eliminated.

#### ***Oregon Law***

- The Oregon subtractions for Oregon and United States public retirement income were eliminated. They were replaced by a credit available to all taxpayers age 58 and older meeting the income limit and having public or private retirement income.
- Four new subtractions became effective:
  - IRA and Keogh distributions on which tax has already been paid to another state while the taxpayer was not an Oregon resident.
  - Oil heat tank cleanup costs.
  - Special medical deduction for taxpayers age 58 and older.
  - Underground storage tanks pollution grants.
- Three new credits became effective:
  - Bone marrow donation program expenses.
  - Child development contributions.
  - Youth apprenticeship programs expenses.

### **Tax Year 1992**

#### ***Federal Law***

- The federal deduction for 25 percent of health insurance costs of self-employed individuals ended June 30. Oregon allowed this deduction for all of 1992, with the amount from July 1 to December 31 claimed as an “other subtraction.”

#### ***Oregon Law***

- A credit for the involuntary moving of a mobile home was created.
- Six other credits were modified:
  - The credit for income tax paid to another state had to be claimed on a nonresident return if income was taxed by both Oregon and one of the following: Arizona, California, Indiana, Virginia, or Guam.
  - Employees who purchased medical insurance through the Oregon Medical Insurance Pool could claim the health insurance credit.

- The credit for sewage treatment works hook-up was increased to \$160 per year for hook-ups after December 31, 1991.
- The business energy, pollution control, and reclaimed plastics credits were limited to those giving preference to Oregon producers of the recycled materials.

### **Tax Year 1993**

#### ***Federal Law***

Congress passed and the president signed the Revenue Reconciliation Act of 1993. Some key features of the law included:

- Two marginal rates – 36 percent and 39.6 percent – were added to the rate structure. The complete rate and bracket structure are provided in Appendix B.
- The federal deduction for 25 percent of health insurance costs of self-employed individuals was reinstated retroactive to June 30, 1992. Oregon allowed this deduction under a separate law.
- The exclusion for employer-provided educational assistance was extended.
- Nonresidential real property placed in service on or after May 13, 1993, was depreciated under the Modified Accelerated Cost Recovery System (MACRS) general depreciation system over a 39-year period.
- The expensing allowance of qualifying assets (section 179 expenses) increased to \$17,500.
- Goodwill and related intangibles (section 197 intangibles) began to be amortized over 15 years.

#### ***Oregon Law***

- The minimum age requirement for the retirement income credit and the special Oregon medical deduction was increased to 59.
- Three credits were modified:
  - The disabled child credit was expanded to include serious emotional disturbance and traumatic brain injury.
  - The rural medical practice credit no longer had a required three-year period.
  - The crop gleaning credit was extended indefinitely.

### **Tax Year 1994**

#### ***Federal Law***

- Up to 85 percent of Social Security benefits became taxable under certain circumstances.
- The federal deduction for 25 percent of health insurance costs of self-employed individuals that expired December 31, 1993, was retroactively reinstated and made permanent in April 1995. On 1994 returns, Oregon allowed this deduction under a separate law.
- Moving expenses were changed from an itemized deduction to an adjustment; some requirements were made more stringent. For 1994, Oregon followed prior federal law until the Legislature reconnected to federal law as of April 15, 1995.

#### ***Oregon Law***

Because Oregon law was tied to federal law as of December 31, 1992, a number of changes that resulted from the Revenue Reconciliation Act of 1993 had no impact on Oregon taxes. Examples of these provisions include:

- Employer-provided educational assistance exclusion.
- Depreciation of nonresidential real property.
- Expensing certain tangible property (section 179 expenses).
- Amortization of goodwill and related intangibles.

### **Tax Year 1995**

#### ***Federal Law***

- The self-employment health insurance deduction became permanent and set at 30 percent for 1995.

#### ***Oregon Law***

- Unused business credits that could be taken as a deduction on the federal return were not allowed on the Oregon return. They required an Oregon addition.
- The minimum age requirement for the retirement income credit and the special Oregon medical deduction was increased to 60.

### **Tax Year 1996**

#### ***Federal Law***

- No major changes.

### ***Oregon Law***

- Depreciation differences due to the Omnibus Budget Reconciliation Act of 1993 required certain adjustments or amended returns to be filed.

If an Oregon addition or subtraction was taken for 1993 or 1994 for Section 179 expense, the taxpayer could either amend the 1993 or 1994 return or take a one-time adjustment on the 1996 Oregon return. For assets placed in service between 1981 and 1985 (ACRS assets), the taxpayer had to make a one-time adjustment on the 1996 return to align the Oregon basis with the federal basis.

The one-time adjustment did not apply to depreciation of nonresidential real property placed in service in 1993 or 1994. Instead, the 1993 or 1994 return had to be amended.

- Effective January 1, 1996, the retirement income credit was figured on pension income only if it is included in Oregon taxable income.

Prior to 1996, the credit was figured on pension income included in federal taxable income. Taxpayers may have needed to amend their 1996 returns due to this tax law change.

- The gain on the sale of certain business assets could be deferred if the proceeds were reinvested in qualifying business assets within six months.

### **Tax Year 1997**

#### ***Federal Law***

Congress passed and the president signed the Taxpayer Relief Act of 1997. Many provisions became effective in 1998, but some provisions took effect immediately. Some key features of the law included:

- The maximum long-term capital gains tax rates for sales or exchanges of property after May 6, 1997, were reduced to 10 percent for taxpayers in the 15 percent tax bracket and 20 percent for taxpayers in a higher tax bracket.
- For transactions after May 6, 1997, an exclusion of up to \$250,000 (\$500,000 if filing joint) on the capital gain of a principal residence was created.

Other changes included:

- A new federal adjustment on medical savings was allowed to persons covered only under a high-deductible health plan.

- The maximum individual retirement arrangement (IRA) for a spouse with little or no income was increased to \$2,000.
- A new tax credit could be claimed for qualified adoption expenses. The maximum credit was \$5,000 (\$6,000 for a child with special needs).

#### ***Oregon Law***

- Oregon's definition of taxable income was no longer tied to the federal definition of taxable income as of a specific date. A "rolling reconnect" was established so that changes made at the federal level would immediately impact Oregon.
- Two new credits began in 1997, the earned income credit and the working family childcare credit. The earned income credit was equal to 5 percent of the federal earned income credit. The amount of working family childcare credit depended upon household size and adjusted gross income.
- The minimum age requirement for the retirement income credit and the special Oregon medical deduction was increased to 61.

### **Tax Year 1998**

#### ***Federal Law***

- An above-the-line deduction of up to \$1,000 for interest paid on a qualified student loan became effective.
- Three new tax credits could be claimed:
  - A child credit of up to \$400 for each qualifying child.
  - The Hope credit with a maximum of \$1,500 for qualified expenses for each student who qualified.
  - The lifetime learning credit with a maximum of \$1,000 per return.

#### ***Oregon Law***

- Filers could subtract the portion of a federal pension that was earned before October 1, 1991.

### **Tax Year 1999**

#### ***Federal Law***

- The maximum student loan interest deduction was increased to \$1,500.
- The self-employed health insurance deduction was increased to 60 percent.

- The maximum child credit was increased to \$500 for each qualifying child.

### ***Oregon Law***

- The minimum age requirement for retirement income credit and special Oregon medical deduction was increased to 62.

### **Tax Year 2000**

#### ***Federal Law***

- The maximum student loan interest deduction was increased to \$2,000.
- Credits were allowed to offset the alternative minimum tax.

#### ***Oregon Law***

- Two additional charitable check-off deductions were added to the tax forms: Habitat for Humanity and Head Start.
- Three new credits took effect: long-term care insurance, adoption expenses, and contributions to an Individual Development Account.
- Five new subtractions took effect:
  - Land donated to a school.
  - Contributions to an Individual Development Account (by an account holder).
  - Scholarship income used for expenses other than tuition.
  - Taxable health insurance benefits of same-sex partners.
  - Payment from the Public Safety Memorial Fund Board.

### **Tax Year 2001**

#### ***Federal Law***

The Economic Growth and Tax Relief Reconciliation Act of 2001 was passed, with some elements taking effect retroactively to January 1, 2001. Some key features of the law included:

- A new 10 percent bracket was introduced, with taxpayers getting an advance payment or tax credit.
- All other tax rates (except for the 15 percent rate) were reduced by one-half a percentage point. Appendix B shows the rates and brackets.
- The child credit was increased to \$600.
- The student loan interest deduction was increased to \$2,500.
- The AMT exemption amounts were increased.

### ***Oregon Law***

- A subtraction for up to \$2,000 for contributions made to a qualified state tuition program took effect.
- Six new charities were added to the charitable check-off list:
  - American Diabetes Association.
  - Oregon Coast Aquarium.
  - Start Making A Reader Today (SMART).
  - SOLV.
  - St. Vincent de Paul Society of Oregon.
  - The Nature Conservancy.

### **Tax Year 2002**

#### ***Federal Law***

The Job Creation and Worker Assistance Act of 2002 was passed and took effect retroactively. Some highlights of the law included:

- An additional 30 percent first-year (bonus) depreciation deduction was allowed for business that purchased equipment on or after September 11, 2001, and before September 11, 2004.
- An above-the-line deduction for certain expenses incurred by educators was created.

Other changes included:

- All rates above 15 percent were reduced by half a percent. For example, the 27.5 percent rate was reduced to 27 percent.
- The 10 percent bracket that became effective in 2001 became part of the rate structure.
- A retirement savings contributions credit went into effect.
- The IRA deduction limit was increased to \$3,000 (\$3,500 if age 50 or older).
- The self-employed health insurance deduction was increased to 70 percent.

#### ***Oregon Law***

- The federal tax subtraction was increased to \$3,250 (\$1,625 if married filing separately).
- The standard deductions were changed to \$1,640 for single or married filing separate filers; \$3,280 for joint or qualified widow(er) filers; and \$2,640 for head of household filers.
- Seven new credits became effective:
  - Advanced telecommunications facilities.
  - Childcare division contributions.

- Electronic commerce zone investment.
  - Employer scholarship.
  - On-farm processing facilities.
  - Oregon cultural trust.
  - Reservation enterprise zone.
- Taxpayers could use the federal farm income averaging method to compute tax liability from farm income.
  - Capital gains on certain assets that had been used in farming were taxed at a rate of 5 percent.
  - Four new charities were added to the charitable check-off list:
    - Doernbecher Children’s Hospital.
    - Oregon Humane Society.
    - The Oregon Salvation Army.
    - Oregon Veterans’ Home.

### **Tax Year 2003**

#### ***Federal Law***

The Job and Growth Tax Relief Reconciliation Act of 2003 was passed and took effect retroactively. Some highlights of the law included:

- Tax rates above the 15 percent bracket were reduced. Appendix B contains all the rates and brackets.
- The child credit was increased to \$1,000.
- The bonus depreciation was increased to 50 percent and extended through December 31, 2004.
- Dividends and capital gains were taxed at a maximum of 15 percent (5 percent for taxpayers in the 10 percent or 15 percent brackets).
- The self-employed health insurance deduction was increased to 100 percent.

#### ***Oregon Law***

- The federal tax subtraction was increased to \$3,500 (\$1,750 if married filing separately).
- The working family childcare credit became refundable, which means that taxpayers benefited from the entire amount of the credit even if it was greater than their tax liability.
- Capital gains from the liquidation of farm assets are taxed at 5 percent.

- Farmers were allowed to use income averaging when calculating Oregon taxes.
- One new charity was added to the charitable check-off list:
  - Planned Parenthood of Oregon.

### **Tax Year 2004**

#### ***Federal Law***

The Working Families Tax Relief Act of 2004 made changes including:

- Extended the expanded 10 percent tax bracket with inflation adjustment, and reduced the marriage penalty and a number of credits.
- Provided a uniform definition of a child (beginning in 2005).

The American Jobs Creation Act of 2004 made changes including:

- Increased the number of shareholders an S corporation can have.
- Allowed a state and local sales tax deduction.
- Other changes primarily related to business taxation and international provisions.

#### ***Oregon Law***

The federal tax subtraction was increased to \$4,000 (\$2,000 if married filing separately).

Riparian land credit (passed in 2001 session) became effective.

### **Tax Year 2005**

#### ***Federal Law***

Katrina Emergency Tax Relief Act (KETRA) of 2005, providing tax relief for persons affected by Hurricane Katrina, was passed. Major provisions of KETRA that automatically flow through from the federal return to the Oregon return are for charitable gifts, donations, and relief efforts by individuals and businesses to victims of Katrina.

#### ***Oregon Law***

- Oregon reconnected to the IRS Code as of December 31, 2004 and provisions of the Military Family Tax Relief Act now flow through to Oregon. Under this act, mem-

bers of the Oregon National Guard called to active duty under Title 10 may be eligible for an active duty pay subtraction, retroactive to TY 2001.

- The federal tax subtraction was increased to \$4,500 (\$2,250 if married filing separately).
- Dependent care assistance credit was extended to December 31, 2016.

- Oregon adoption credit expired December 31, 2005.
- Two new credits became effective:
  - Film production development contribution credit
  - Diesel engine replacement credit.

# Appendix G

## Methodology

Information presented in this publication comes primarily from Oregon tax returns filed for tax year 2005 that were received by the Department of Revenue (DOR) during the 2006 calendar year. Amended returns, a small number of manually processed returns and returns received after 2006 are not included.

Aside from initial adjustments made during return processing, data concerning return adjustments (e.g., from audit activity) is not included nor accounted for. Considerable data validation is used in an attempt to maintain accuracy of reported information and ensure the internal consistency of individual returns.

### Data Handling

As returns are received, initial screening is performed to identify obvious errors. Following that, the return data are independently double-entered into the DOR computer system and processed through a system that identifies tax amount errors.

Some of the errors will result in letters to taxpayers or some human intervention to make corrections before final processing can be completed. Following processing, additional data checks are performed to identify returns that are not internally consistent. In many cases, the physical returns (or some percentage thereof) are inspected in an effort to identify systematic errors and encode data handling rules for those returns.

To the extent possible, inconsistent data are modified in a manner believed to correct errors on the returns. The data handling procedures are used for the purpose of this report and are not connected with other DOR business. Examples of the data handling procedures used include:

- If the return reports a tax liability that is incorrect given the reported income and tax rates, the reported amount is replaced with the corrected amount.
- If the return claims a credit or subtraction that is larger than what is statutorily allowed, the reported amount is replaced by the maximum amount allowed.
- If the amount reported for the total of non-refundable credits exceeds the amount of pre-credit tax liability, the amount used for each credit is calculated by proportionally reducing those credits so their sum equals the pre-credit tax liability.
- The city reported in the address on a return is screened for spelling and corrected as appropriate. (Reported cities do not always match with officially incorporated cities.)
- To determine counties and cities accurately address standardization software is used.
- If a line on a return is blank, the associated value is set to zero.
- Missing data concerning the federal tax is imputed using data provided by the IRS.
- If the date of birth would make a filer's age unreasonable, the age is set to missing. (Age is the taxpayer's age on July 1 of the tax year.)

If an amount on a return is computed based on other line items (e.g., tax liability depends on income, subtractions, credits, etc.) and data handling alters the line items on which it depends, the amount is recomputed.

### Statistical Reporting

Following the finalization of the data handling, statistical summaries are created. All summaries are derived from the complete base of returns; they are not based on statistical samples. Means, sums, percentages, etc. are computed using their simple arithmetic definitions (computations are performed using SAS and Excel).

Rates that span several years (e.g., percent increase in income from 1993 to 2000) are computed as the percentage change between the first and last years, and then annualized. For summaries associated with claims of

certain adjustments, additions, subtractions, or credits, zeros in the data are excluded when calculating means (except as noted). A return is counted as having claimed the item if the associated amount is nonzero.

In tables summarizing amounts by AGI quintile, ranking is used to determine what quintile each return is placed in. Due to ties in ranks, the number of returns represented by each quintile differs slightly.

### **Components of Income**

Components of income as displayed in Exhibits 12 and 13 use simple categorization of income based on the line items of the income section of the federal tax returns. They are summarized by line item with several exceptions.

- Interest and Dividends component: interest and dividend line items are grouped to form this component.
- Retirement component: IRA distributions, pensions and annuities, and taxable social security line items are grouped to form this component.
- Miscellaneous component: alimony, unemployment and other income line items, as well as income that is of unknown source due to missing data, are grouped to form this component.

For Exhibit 13, additional grouping is done. Farm income is grouped in the Miscellaneous component and rental real estate, royalties, partnerships, S corporations, trusts, etc. are grouped with the Business component.

# Appendix H

## Glossary of Terms

**Additions.** Amounts added to federal AGI to reflect differences between Oregon and federal tax laws.

**Adjusted gross income (AGI).** AGI consists of income subject to federal tax minus federal adjustments. For full-year returns, Oregon AGI corresponds to line 8 on the 2005 Oregon Form 40 and equals federal AGI.

**Adjustments.** Federal adjustments include IRA deductions, student loan interest deductions, medical savings account deductions, moving expenses, one-half of self-employment taxes, self-employed health insurance deductions, self-employed SEP deductions, penalties on early withdrawal of savings, alimony paid, certain business expenses, and health savings account deductions.

These adjustments are subtracted from total taxable income to compute federal AGI on Forms 1040 and 1040A.

**AGI level.** Adjusted gross income ranges by which personal income tax information is grouped in all but the four county summary tables. The AGI levels are increments of \$5,000 for low-income returns and \$10,000 or more for higher income filers.

**Amortization.** The gradual reduction of any amount over a period of time.

**Basis.** A taxpayer's cost of acquiring an asset, which is used to determine the asset's capital gain or loss.

**Biennium.** The period of two fiscal years for which the state budgets are determined. For example, July 1, 2005, to June 30, 2007, is referred to as the 2005–2007 biennium.

**Business income.** Profit or loss from sole proprietorship business (not partnership and corporate income). Reported on federal Schedule C.

**Capital gains.** For tax years 1986 and earlier, this figure indicates the amount after the 60 percent capital gains exemption. Beginning with tax year 1987, this figure indicates 100 percent of the net capital gains. Reported on federal Schedule D.

**Capital gain distributions.** Non-Schedule D capital gains reported separately from Schedule D capital gains on federal Form 1040 for tax years 1988 through 1993.

**Credits (Table A).** Total amount of tax credits, excluding exemption tax credit. Includes Oregon earned income credit, working family childcare credit, retirement income credit, credit for elderly and disabled, child and dependent care credit, political contribution credit, credit for taxes paid to another state, and other credits.

**Deductions.** Items that may be subtracted from income to arrive at taxable income.

**Demographic.** A statistical characteristic of human populations.

**Donations.** Optional check-offs by which taxpayers may designate all or part of a tax refund as a contribution to charities such as:

- Oregon Nongame Wildlife Fund.
- AIDS/HIV Education and Services Fund.
- Child Abuse Prevention Fund.
- Alzheimer's Disease Research Fund.
- Stop Domestic and Sexual Violence Fund.
- Habitat for Humanity.
- Oregon Head Start Association.

**Earned income credit.** *See Federal earned income credit or Oregon earned income credit.*

**Effective tax rate.** Tax liability divided by income.

**Exemptions (number of).** Total number of exemptions claimed (self, spouse, and dependents plus special exemptions for severely disabled adults and disabled children). Individuals who are claimed as dependents on their parents' returns but who receive separate income claim zero exemptions on their own return.

**Exemption tax credit.** A \$154 credit for each exemption claimed on a 2005 return. This replaced a \$1,000 exemption deduction in 1983. Exemption credits have been indexed for inflation since tax year 1987.

**Expensing.** To distribute qualifying, deductible expenses over several years.

**Farm income.** The amount of farm income reported on farm Schedule F. It does not include the farm

income of any farm operated as a partnership or corporation.

**Federal adoption credit.** A credit for qualifying adoption expenses, up to a maximum of \$10,630, for an eligible child.

**Federal child credit.** A maximum credit of \$1,000 for each qualifying child is allowed.

**Federal earned income credit.** A federal, refundable income tax credit for low-income working taxpayers. The amount depends on income and the number of dependents.

**Federal education credits.** The Hope credit has a maximum of \$1,500 for qualified expenses for each student who qualifies, and the lifetime learning credit has a maximum of \$2,000 per return.

**Federal election on interest and dividends of a minor child.** The amount of interest and dividend income earned by a minor child that is subject to the special federal tax.

Beginning in 1989, this addition to federal AGI is required when parents elect to report the child's income on their own return. This addition was combined with other additions beginning on 1996 returns.

**Federal pension subtraction.** The portion of federal pension income earned before October 1, 1991, can be subtracted from adjusted gross income.

**Federal tax deduction.** An Oregon deduction for federal income tax liability. Limited to \$4,500 per return (\$2,250 for married filing separately).

**Federally taxable Social Security.** Oregon does not tax Social Security income. The taxable portion of Social Security from the taxpayer's federal return is reported in Table D.1. The Social Security subtraction is reported in Table F.1.

**Full-year returns.** Returns filed by full-year Oregon residents (Form 40 or Form 40S).

**HARRP.** The Homeowner's and Renter's Refund Program, established in 1973 to provide property tax relief to low- and middle-income Oregonians. The limit on household income of HARRP recipients was reduced from \$17,500 to \$10,000 for tax year 1990, and the program was discontinued for 1991 and subsequent tax years.

**Head of household.** Returns filed by unmarried persons who furnished over half of the cost of maintaining a household for the entire year for at least one qualifying relative.

**Interest on installment sales.** Interest on deferred tax liability for certain installment sales. Added to Oregon tax before credits.

**Itemized returns.** Returns claiming itemized deductions rather than taking the standard deduction.

**Joint returns.** A return representing the combined income of husband and wife, i.e., a return representing two taxpayers.

**Kicker.** *See State surplus refund.*

**Minor child income addition.** *See Federal election on interest and dividends of a minor child.*

**Miscellaneous income.** Positive and negative income from rents, royalties, estates, trusts, S corporations, and partnerships reported on federal Schedule E.

**Net federal tax.** The sum of basic federal tax, alternate minimum tax, and tax on IRAs, minus federal tax credits.

**Nonresident returns.** Returns filed by individuals with income earned in Oregon whose permanent homes were outside Oregon for the entire tax year (Form 40N).

**Nontaxable returns.** Returns with no tax liability. Such returns are filed to receive a refund of withholding, estimated payments, or refund-of-credit payment.

**Oregon deferral of reinvested gain.** Beginning with 1996 returns, filers may defer capital gains on the sale of certain business assets if they reinvest proceeds in qualifying business assets within six months. On 1999 returns, the deferral of reinvested capital gains was combined with other subtractions.

**Oregon earned income credit.** In 1997, Oregon gave its own earned income credit, equal to 5 percent of the federal credit amount. Unlike the federal credit, it is not refundable.

**Oregon medical deduction.** Beginning with 1991 returns, filers who itemized and met the age requirement were entitled to an additional deduction of the lesser of Schedule A, line one or line three.

The age eligibility was 58 or older for 1991 and 1992 returns, and increased by one year every two years until it reached 62 in 1999. It was fixed at this level for consecutive tax years.

**Other income.** Income derived from a variety of sources such as gambling winnings, activity not for profit, credit card insurance, estate and trust income, cancelled debts, etc.

**Part-year resident returns.** Returns filed by individuals who permanently moved either into or out of Oregon during the tax year (Form 40P).

**Property sales.** The sum of capital gains/losses and supplemental gains/losses (lines 13 and 14 on federal Form 1040).

**Quintile (income).** A subset of a database that contains 20 percent of all records; it is determined by arranging the records from the lowest income to the highest income and then dividing the database into five, equally-sized subsets.

**Real property.** Land and land improvements, including buildings, timber, and orchard trees.

**Retirement income credit.** Beginning with 1991 returns, filers who meet the income and age restrictions and have income from pensions, annuities, IRAs, or deferred income compensation plans are entitled to a retirement income credit.

Household income limits are \$45,000 for joint returns and \$22,500 for other returns. The age eligibility was 58 or older for 1991 and 1992 returns, and increased by one year every two years until it reached 62 in 1999. It was fixed at this level for consecutive tax years.

**Returns (number of).** The number of returns filed. For low AGI levels, this figure can be misleading. For example, the Oregon Department of Revenue receives returns each year from individuals who are claimed as dependents on their parents' returns but who receive individual earnings.

**Separate return.** The return of a married individual not filing a joint return.

**Single return.** The return of a single individual who does not qualify as head of household.

**Standard and itemized deductions.** The total deduction amount taken, whether a standard deduction or itemized deductions.

**State surplus refund (kicker).** Oregon is required by law to refund excess revenue when revenues collected for the biennium are more than 2 percent higher than was forecast at the time the budget was adopted.

Before 1995, refunds were made in the form of a credit on the tax return for the second year of the biennium. Refunds are now made as direct payments to taxpayers based on their tax liability for the first year of the biennium.

**Subtractions.** Amounts subtracted from federal AGI

to reflect differences between Oregon and federal tax laws.

**Supplemental income.** Income derived from the sale of business property and reported on federal Form 4797.

**Tangible property.** Any capital asset having physical existence, including real property.

**Tax after credits.** Amount of tax liability after subtracting credits.

**Tax due.** Amount of final tax liability after subtracting tax credits, when applicable.

**Tax from rates.** The amount of state tax computed from rates and assessed before tax credits are subtracted.

**Tax liability.** The amount of tax owed by a taxpayer. It is the total tax reduced by non-refundable credits and further reduced by any portion of refundable credits up to the amount of remaining tax.

**Tax withheld.** Amounts withheld by employers from salaries and wages. Amount withheld is based on wages earned during the pay period and the number of withholding allowances claimed. Tax also may be withheld from other income sources such as pensions and IRA distributions.

**Taxable balance.** Oregon AGI plus additions, minus subtractions, minus allowable deductions. The amount of income subject to Oregon tax. Set to zero, if negative.

**Taxable pensions (Table D).** Includes taxable pension income, federally taxable Social Security income, and IRA distributions. These items are reported separately in Table D.1.

**Taxable returns.** Returns with positive final tax liability (i.e., tax due greater than zero).

**Unknown income.** Total adjusted gross income is listed as "unknown" when the taxpayer does not identify the specific component(s) of income. Unknown income is included with "Other Income" in Table D and reported separately in Table D.1.

**Working family childcare credit.** A credit available to low-income families with qualifying childcare expenses. The amount is based on adjusted gross income and household size.
