81181900-Geological Survey, RESTOR, LW-1996, 80*20'
Salinity data collected by K. Ludwig and Rita Byrd of the U.S. Geological Survey between 5-8 August 1996. Data provided by the National Park Service, Everglades National Park, was collected at monitoring stations between 5-8 August 1996. Data provided by South Florida Water Management District was collected by the Southeast Environmental Research Program of Florida International University on 5-8 August 1996. Salinity is calculated using Unesco algorithms from conductivity and temperature field measurements. Contours are based on interpolation and trends within the data set; developed and automated using contouring software. This map has not been reviewed for conformity with U.S. Geological Survey editorial standards.
