INTERDISCIPLINARY SURVEY, RESTORATION, AND MONITORING PROGRAM
Salinity data collected by K. Ludwig and L. Roulier of the U.S. Geological Survey between 3-6 June 1996. Data provided by the National Park Service, Everglades National Park was collected at monitoring stations between 3-6 June 1996. Data provided by South Florida Water Management District was collected by the Southeast Environmental Research Program of Florida International University on 3-6 June 1996. Salinity is calculated using Unesco algorithms from conductivity and temperature field measurements. Contours are based on interpolation and trends within the data set, developed and smoothed using contouring software. This map has not been reviewed for conformity with U.S. Geological Survey editorial standards.
