Salinity data collected by R. Halley of the U.S. Geological Survey between 23-27 January 1995. Data provided by the National Park Service, Everglades National Park was collected at monitoring stations between 23-27 January 1995. Data provided by South Florida Water Management District was collected by the Southeast Environmental Research Program of Florida International University on 3-5 January 1995. Salinity is calculated using Unesco algorithms from conductivity and temperature field measurements. Contours are based on interpolation and trends within the data set; developed and annotated using contouring software. This map has not been reviewed for conformity with U.S. Geological Survey editorial standards.
