

The list below shows the Transportation Enhancement applications currently under consideration in the 2008 project selection cycle. Each entry provides a link to a PDF copy of the application, which includes the project description, maps, and funding request.

IMPORTANT NOTE: These PDF files are the original applications submitted in May 2008. **They may contain errors** in the Cost Summary (pg. 1) or Matching Funds Commitment (pg. 2) and may describe elements of work that do not qualify for TE funding. ODOT staff is working with these applicants to clarify project scope and funding eligibility. If advanced or selected, these projects will be approved for only a portion of the scope or funding indicated in the application.
