

OREGON SAFETY CORRIDOR MAP

MARCH 2008

LEGEND

ACTIVE SAFETY CORRIDORS

Safety corridors are segments of the state highway system that have a local three-year average fatal and serious-injury crash rate that is at or above 110% of the statewide three-year average fatal and serious-injury crash rate for similar types of roadways. Safety corridors receive enhanced enforcement, minor engineering, education, and emergency medical service enhancements as limited funds allow. For additional information, call ODOT Transportation Safety Division (503) 986-4195 or see <http://www.oregon.gov/ODOT/TS/roadwaysafety.shtml>

A	OR Route 11 (Milton-Freewater) MP. 31.5 – 35.32 Last four miles to WA border	Comm. Date 1/1995
