F.D.A.

Rockville, Md.

Mrs. Thomas Percy,

I was taking the prescription drug, Lotronex until it was removed from market. Lotronex was doing very, very well for me for relief from miseries of irritable bowel syndrome, even with a smaller dose of $\frac{1}{2}$ tablet (0.5 mg.) daily. I would like to see it approved again, for I am sure there are many people, like myself, who are able to take Lotronex without any problems and did get the relief from IBS.

Sincerely,

Mrs. Robert W. Drains
