
Alzheimer's Disease Centers Directory

The National Institute on Aging funds Alzheimer's Disease Centers (ADCs) at major medical institutions across the Nation. Researchers at these Centers are working to translate research advances into improved diagnosis and care for Alzheimer's disease (AD) patients while, at the same time, focusing on the program's long-term goal—finding a way to cure and possibly prevent AD.

Areas of investigation range from the basic mechanisms of AD to managing the symptoms and helping families cope with the effects of the disease. Center staff conduct basic, clinical, and behavioral research and train scientists and health care providers who are new to AD research.

Although each center has its own unique area of emphasis, a common goal of the ADCs is to enhance research on AD by providing a network for sharing new ideas as well as research results. Collaborative studies draw upon the expertise of scientists from many different disciplines.

For patients and families affected by AD, the ADCs offer:

- Diagnosis and medical management (costs may vary—centers may accept Medicare, Medicaid, and private insurance).
- Information about the disease, services, and resources.
- Opportunities for volunteers to participate in drug trials, support groups, clinical research projects, and other special programs for volunteers and their families.

Some ADCs have satellite facilities which offer diagnostic and treatment services and research opportunities in underserved, rural, and minority communities.

National NIA-funded AD resources are listed at the end of the directory.

NIA-Funded National Alzheimer's Disease Resources

Alzheimer's Disease Education & Referral Center

The Center provides information, publications, and referrals.

PO Box 8250
Silver Spring, MD 20907-8250
Website: www.nia.nih.gov/Alzheimers
Information Line: 1-800-438-4380 (toll free)
E-mail: adear@nia.nih.gov
Fax: 301-495-3334

National Alzheimer's Coordinating Center

The Center coordinates data collection and fosters collaborative research among the ADCs.

Walter Kukull, Ph.D., Director
National Alzheimer's Coordinating Center
4311 11th Avenue NE, #300
Seattle, WA 98105
Website: www.alz.washington.edu
Information Line: 206-543-8637
E-mail: naccmail@u.washington.edu
Fax: 206-616-5927

National Cell Repository for Alzheimer's Disease

The Repository maintains a database of family histories and medical records and provides genetic researchers with cell lines and/or DNA samples.

Tatiana Foroud, Ph.D., Director
Indiana University Medical Center
Department of Medical and Molecular Genetics
975 West Walnut Street, Room IB-130
Indianapolis IN 46202-5251
Website: www.ncrad.org
Information Line: 1-800-526-2839 (toll free)
E-mail: alzstudy@iupui.edu
Fax: 317-274-2387

Alzheimer's Disease Cooperative Study

The ADCS conducts clinical trials on promising compounds designed to improve cognitive functioning, slow the rate of decline, or delay the onset of Alzheimer's disease.

University of California, San Diego
