

I'm writing in support of the FAA's proposed basic 12 recommendations for changes at Centennial Airport. I'm a resident of Heritage Hills and am quite concerned about the amount of air traffic over our heads at all hours and about the traffic which flies over Lone Tree Elementary, my son's school. Just a few moments ago, at about 6:10 p.m., an aircraft flew over our home, so low, that we thought it might touch our roof. Our children were playing in the backyard at the time, obviously a huge concern for a parent. Thank you for taking the time to study this problem and to make recommendations for change. I believe that the proposed changes will make our neighborhood and our school a safer place for our kids.

Sincerely,

Cheryl Jolley
