

This email is in regards to Federal Register Notice No. 73 FR 9847 - we have lived in Castle Pines North for 8 years and have noticed a dramatic increase in aviation noise since then. I'm very upset when I hear how residents near Centennial Airport have previously requested to have traffic diverted to reduce noise- how can one complain about aviation traffic when moving so close to a busy airport?

I don't mind a little traffic- but the noise and the altitude at which things come over our house out here is ridiculous! It's actually woke our children out of bed.

Thank you for your consideration-

Sincerely,

Chris Hassett
