

As a resident of Huntington Pines Development, (near Arapahoe and Dayton which is about 1.5 miles NW of the airport), I am writing this letter to convey my support for all 12 noise abatement recommendations from the Part 150 Study for Centennial Airport.

In past years our neighborhood has experienced an increase in the noise level from flights arriving at and leaving Centennial Airport. We are constantly aware of various types of planes and helicopters that fly very low over our home at all hours. In the past I have discussed this annoyance with representatives at the airport and tried to call in each flight and time, but it is too time consuming to do on a regular basis. I strongly support the Part 150 Noise Study recommendation to acquire radar link noise monitoring equipment. This will allow the airport to better identify areas with significant noise problems and to further identify the aircraft generating the noise.

In addition, I wish to express my support for the recommendation that is highly important to me as it impacts my neighborhood directly:

Fly a 010-degree departure heading between the hours of 10 PM and 7AM.

The 010 heading allows planes to take off over the Cherry Creek State Park at night when the park is least populated instead of over the homes directly northwest of the airport. The Part 150 Study seems to indicate that the 010 heading would result in significant noise reduction for the residents and homes impacted northwest of the airport.

Also, I strongly support implementation of the Fly Quiet Program and banning of stage two jets! The environmental impact as well as noise should be considered as this is a highly residential area with several schools located here.

The Part 150 recommendations are the result of years of collaboration and involvement of airport representatives, elected officials, local businesses and civic leaders, as well as airport users and tenants. I believe these recommendations represent the best solution to noise abatement for the entire region and I urge you to support all the recommendations.

Thank you for your time and consideration regarding this important matter.

Sincerely,

Cynthia Wexler
Huntington Pines Resident
