

I appreciate the efforts of all parties involved with studies of noise abatement at Centennial. Unfortunately, all the studies, banned aircraft, and flight pattern deviations do not address the long range and apparent cure. The metro area has grown completely around the airport and it needs to be moved out of the future urban growth pattern with proper zoning in place to retard growth within the flight patterns.

We own two properties:  
12425 Swansea Dr  
Meridian Hills, Parker

7510 S. Jackson Gap Way  
Tallyn's Reach, Aurora

We are subjected to dozens of noisy twin prop cargo planes passing over Tallyn's Reach all hours of the night.

Sincerely,  
Darrell & Pat Larson
