RE: Proposed change in flight patterns from Centennial Airport

Dear Sir or Madam:

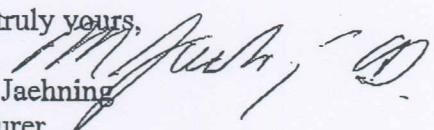

I am writing you as the Board Treasurer of the HighPointe Homeowners Association. The eighty-six families who reside within the association, bounded by Carson Court on the East, Cherry Creek State Park on the West, Cherry Creek Rancho on the South and Cherry Creek Villas on the North, are opposed to any change in current approved flight patterns which will bring more aircraft in landing and take-off patterns above our homeowners property or that of our near neighbors. The map coordinates of the HighPointe Association are approximately N 39 37 and W 104 49.

My question in this matter is in the necessity for change in the existing flight patterns. It appears to have satisfied all homeowners up until this point. It doesn't seem fair that those who have accepted the inconvenience of the already existing flights be subjected to more rather than less due to a change in population density.

Another, more reasonable decision would be to require flights landing or taking off be required to do so in a longer flight plan that takes it further over to reservoir itself. This would allow a heightened elevation be reached prior to entering a more populous area.

Thank you for your consideration. Please feel free to contact me at my email address if you have any questions or comments.

Very truly yours,

Mark Jaehning
Treasurer
