

I've owned and lived in the home at 2473 S Lima since 1983. We moved after ten years at 12683 E Exposition when the Stapleton aircraft noise became bothersome. Our neighborhood, Eastridge, began in the late 1960s. My spouse and I would like to live in our home until we no longer can live independently, hopefully another twenty years. In the last year, disrupting aircraft noise has markedly increased. During daylight savings time, aircraft sounds often make us pause back yard conversation in evenings and on week-ends.

As best I'm able, I've studied the issue. Please follow the Aurora City Council recommendations and specifically reject these recommendations:

- #3--implement 010 degree departure heading for jet aircraft at night
- #4--Test 24-hr flight track between 350 and 010 degree headings
- #5--elimination of preferential runway use.

I don't expect NIMBY but respectfully request FSIMBY--fair share in my back yard.

Thank you,
