

I would like to support the proposed ban of Stage 1 aircraft at Centennial Airport and the ban of Stage 2 between 10 p.m. and 7 a.m.

My family's residence is directly under the flight path of the these jets and the noise is often intolerable, waking children and causing much disturbance. I have written twice to Mr. Fronapfel registering this complaint and would like register it yet again.

Most airports around the world ban night flights of this type yet Centennial is very slow to do this, without regard to the surrounding communities' quality of life that is suffering

Please let me know the outcome of the FAA decisions on this matter.

Sincerely,

Jill Bausch
