

I have read, reviewed and agree with all 12 approved recommendations as submitted by Centennial Airport in its Part 150 study. Centennial Airport has aircraft of all kinds and being a resident in Heritage Hills I hear this noise frequently. I appreciate Centennial Airport taking steps to correct the adverse impact of the noise to our community.

I would strongly encourage the FAA to adopt the recommendation to fly a 170-degree departure heading for approximately 4 miles before executing a (+ or -) 20-degree turn. I would also appreciate this same standard for approaches to the airport.

I may be contacted at fitzgeraldsmaill@yahoo.com. Thankyou for the opportunity to address this very concerning issue.

Thankyou,
Kathleen Fitzgerald
