

I cannot attend the meetings due to my kiddos, but I pray that whatever actions are taken are such that the air noise is either the same or less than it is now over CPN. We moved here specifically because of the lack of air noise pollution from cars, trains and planes. We do occasionally hear air plane noise. Mostly appears to be small air craft or fighter pilots (my hubby could name the jets). Any increased noise means lower property values and a lesser quality of life. Please work to help us maintain the same or better standard of living in CPN.

Thank you,

Kristine Ng
