

We support all 12 recommendations to the FAA to improve the noise pollution created by planes at Centennial Airport. We are homeowners in a subdivision north of Centennial airport. The planes fly directly over our subdivision (and very low) as they head in to land at Centennial. Our address is 6014 S. Paris Place, Greenwood Village, Colorado 80111. We have children ages 7, 5, 3 and 1 who like to play outside. It is awful and frightening at times to live under continual airplane traffic. Many times we cannot hear what one of our children is saying until after a plane passes by. Some of the planes seem WAY TOO LOUD! Please do all that you can to improve the noise pollution caused by planes flying in and out of Centennial. Please email us or call if there is any more we need to do to support improvements.

Sincerely,
Lauren and Stephen Maloney
